Have you read and agree to follow the Taught AI Academy Acceptable AI Use Policy — and confirm you will not include any personal names or identifying information about pupils, staff or families?

Type “Yes” to proceed.

You said:

yes

Taught AI Academy - Behaviour strategies said:

Thought for 20s

Summary of the Challenge

You've got a lively Year 7 group who ignore directions and escalate when you raise your voice. You need a calm, low-stress reset that rebuilds routines, predictability and teacher–pupil trust.

Goal or Desired Outcome

To re-establish simple classroom routines, increase compliance with first-time instructions, and reduce mocking/escalation—without relying on shouting.

Suggested Strategies (low-stress, ready tomorrow)

Universal (Tier 1): whole-class routines & calm signals

- **Do a 2-week “routine reset”: explicitly teach and practise 3–4 micro-routines (entry, attention signal, handing out/collecting, exit). Keep them short, model–practise–feedback, then repeat daily. This mirrors effective instruction (teach in small steps; model; guided practice; check for understanding).**

- **Predictable attention signal:** choose one silent signal (hand up, countdown on board). Rehearse it like content learning: you say it, they do it, you positively notice correct responses first. Avoid “Any questions?”—use quick checks to ensure all have it.
- **Calm, brief language:** one-step directions, neutral tone, repeat once. Trauma-informed guidance shows short, simple instructions and avoiding threats reduce escalation.
- **Positive narration > praise gush:** notice the behaviour you want (“I can see 3 tables tracking, pens down—thank you”). Keep praise specific to task/behaviour rather than personal traits for better uptake.
- **Seat & space tweaks:** pre-plan seating to reduce distractions; proximity and quiet prompts before public corrections. (This sits with school policy’s immediate, non-punitive strategies.)
- **Short, frequent review of expectations:** 30–60s at the start: “Today we’ll practise the attention signal once, then straight into task.” Consistency and predictability lower stress and improve behaviour.

Targeted (Tier 2): for frequent non-compliance

- **Least-intrusive redirect ladder:** (1) non-verbal cue → (2) private, quiet prompt → (3) choice framed neutrally (“Now or in 1 minute—your call.”) → (4) follow school consequence flow. This aligns with your policy’s staged approach and keeps learning moving.
- **Pre-correction:** before likely hotspots (“In 30s I’ll ask for eyes; show me first time”), then immediate, specific feedback when they do. (Clear, concise feedback that pupils can act on is more effective.)
- **Micro-conference after class (60–90s):** “What was the instruction? What will you do first next time?” Keep it task/behaviour focused to build reciprocity and trust in feedback.
- **Environmental supports:** post the mini-agenda and timers; warn of transitions (“2 minutes left, then books closed”). Predictability reduces arousal and oppositional reactions.

Intensive (Tier 3): if a small group drives most disruption

- **Check-in, Check-out (CICO) lite** with a simple behaviour goal (e.g., “Respond to first signal”): start/end of lesson 20-second check, specific feedback, small privilege tied to goal. (Fits with targeted, behaviour-specific reinforcement evidence.)
- **Guided practice of routines** with those pupils: 2–3 minute rehearsal at break/start of day—model → practise → quick feedback (the same modelling/scaffolding cycle used for learning content).
- **Calm space/brief movement:** offer a quick, agreed “reset” option before escalation (e.g., water/errand/desk switch), then swift return.

Trauma-responsive approaches recommend calm, choice-based resets over power struggles.

Optional Add-Ons (scripts, routines & tools)

- **Entry routine script (30–40s):**
“Line at the door, quiet. In, bags under, planners out, title/date. When my hand is up, pens down and eyes.” (Teach, practise twice, recognise tables that meet it.)
 - **Attention signal script:**
“Hand up means silent in 3...2...1. Thank you to those already tracking.” (Then proceed immediately—link the signal to something to do.)
 - **Private correction script (10s):**
“I’m keeping everyone successful. The direction was ‘pens down’. Do that now—thank you.” (Specific, neutral, one step.)
 - **Mini-agenda on board:**
 1. Do Now (3) 2) Teach (6) 3) Practice (10) 4) Check/Exit (3). Short chunks and high success rates keep attention and reduce side-talk.
 - **Feedback that lands:**
“You followed the signal first time—that moved us on quickly. Keep that for the next transition.” (Task/behaviour-specific; concise.)
-

Implementation tips for the next fortnight

1. Pick 3 routines, teach them explicitly (model → practise → feedback) every lesson for 5 days.
2. Use one attention signal and hold it—no voice-raising; re-teach if ignored.
3. Narrate compliance before correcting—keep corrections private and brief.
4. Follow your staged consequence pathway consistently; avoid debates.
5. End each lesson with a 15-second reflect & reset (“What went well in transitions? One target for tomorrow.”) to build metacognitive awareness of behaviour.

Follow-up Prompt

Would you like me to draft a one-page “2-Week Reset Plan” for your room—with your three chosen routines, exact scripts, and a mini tracking sheet you can print?

You said:

Please put this into tabves for me with a flow chart of how tio escalate things

Taught AI Academy - Behaviour strategies said:

Year 7 Behaviour Reset – Tables & Escalation Flowchart

Use anonymously. Adapt consequence steps to your setting's policy.

A) Two-Week Routine Reset Plan (teach, practise, revisit)

Routine	Teacher Script (30–40s)	Practice & Frequency	Success Check
Entry	“Line up silently. In, bags under, planners out, title/date. When my hand is up, pens down and eyes.”	Rehearse first 2 mins of every lesson for 5 school days	90%+ seated, planners out in 60s
Attention Signal	“Hand up means silent in 3...2...1. Thank you for tracking.”	Practise once each transition	Silence + eyes in 3s
Handing Out /	“Monitors at end of rows. One per row collects.	Rehearse twice in lesson 1; then daily	Books out/in

Collecting	Books closed, hands empty.”		within 60s
Exit	“On cue: pack quietly, chairs in, stand behind chairs. Dismiss by rows.”	Rehearse last 2 mins daily	Calm exit in < 90s

B) Universal Strategies (Tier 1) — Quick Reference

Strategy	What to do	Example language
Positive narration	Publicly notice what’s going right before correcting	“Table 3 are ready—pens down, eyes.”
One-step directions	Keep instructions short & neutral; repeat once	“Pens down.” (pause) “Track.”
Seating & proximity	Place high-interaction pupils near you; circulate early	<i>Move, tap book, quiet nod</i>
Mini-agenda visible	Post timings on board; use timer	“Do Now (3) → Teach (6) → Practice (10) → Exit (3)”
Silent signal	Use one signal only; reteach if ignored	Hand up / visual countdown

C) Targeted Strategies (Tier 2)

Need / Trigger	Response	Script
First signs of drift	Least-intrusive redirect (non-verbal → whisper)	“Direction was ‘pens down’. Do that now—thank you.”
Likely hotspots	Pre-correction just before the moment	“In 30s I’ll ask for eyes—show me first time.”
Persistent avoidance	Choice with control kept	“Now or in one minute—your call. I’ll come back.”
Patterned non-compliance	Micro-conference (60–90s after)	“What was the instruction? What first step next time?”
Transitions dysregulate	Predictability + warnings	“2 mins left; then close books and track.”

D) Intensive Supports (Tier 3) – for the few

Support	How it works	Target
CICO-Lite	20s check at start/end; single goal; small privilege	“Respond to first signal”
Routine rehearsal	2–3 mins practice at start/break with adult	Entry / Attention / Exit
Brief reset option	Planned, time-limited movement or desk switch	Prevent escalation; quick return

E) Lesson Flow Template (print on back of planner)

Phase	Time	Teacher Moves	Pupil Behaviours
Do Now	3 min	Meet/greet, positive narration, circulate	Silent start, books open
Teach (I-Do)	6 min	Model in small steps; check for understanding	Track, note key steps
Practice (We/You-Do)	10–15 min	Prompts, circulate, feedback	Apply steps; ask for help

Check/Exit	3 min	Quick quiz or “exit sentence”; pack to cue	Complete exit, calm dismissal
------------	----------	---	-------------------------------------

F) Attention & Correction Scripts (keep on lanyard)

Situation	Script
Gain attention	“Hand up means silent in 3...2...1. Thank you.”
Correct privately	“I’m keeping everyone successful. The direction was ‘[X]’. Do that now—thank you.”
Reinforce	“You followed the signal first time—that moved us on.”
Pre-correct	“In 30s I’ll ask for eyes; show me first time.”
Choice (avoid power struggle)	“Now or in one minute—your call. I’ll come back.”

G) Low-Stress Escalation Flowchart (adapt to school policy)

Start of issue

|

```
v
1) Positive Narration (name the right)
|
v
2) Non-verbal Cue / Proximity (tap book, hand signal)
|
v
3) Private Prompt (10s, one-step direction)
|
|- Complies → **Praise specific behaviour** → Return to
teaching
|
v
4) Restate + Simple Choice ("Now or in 1 minute")
|
|- Complies → **Acknowledge quickly** → Return to
teaching
|
v
5) Pre-warn Consequence (link to policy; calm tone)
|
v
6) Apply **Stage 1 Consequence** (e.g., move seat / short
reflection)
|
|- De-escalates → **Reset** (brief repair if needed)
|
v
7) **Stage 2** (Remove to buddy seat/timeout; log)
```

```

|
v
8) **Stage 3** (Call-out/on-call as per policy; safeguard
if needed)
|
v
9) Restore & Plan (micro-conference; CICO-lite if
repeated)

```

Notes

- Keep each step brief, neutral, and private where possible.
- Do not skip steps unless there's a safety concern.
- Always follow with a restore (what happened / what next / how I'll help).

H) 2-Week Implementation Tracker (tick each lesson)

Customise to Your Context

- Insert the exact wording of your school's Stage 1/2/3 consequences.
- Add names of agreed buddy classrooms for time-out.
- Decide the one attention signal you will stick to.

Want a printable 1-page version? Say “One-pager please” and I’ll compress this into a single A4 sheet.

Done! I’ve put your strategies into clear tables and added a low-stress escalation flowchart on the canvas. Want me to compress it into a one-page printable, or add your school’s specific Stage 1/2/3 steps?

ChatGPT can make mistakes. Check important info. See [Cookie Preferences](#).

➡ Type "Yes" to proceed.

You said:

Yes

Taught AI Academy - Behaviour strategies said:

Thought for 17s

Summary of the Challenge

You're experiencing covert, intimidating looks from a pupil when unsupervised. This creates a personal safety concern and a safeguarding issue, regardless of whether others have witnessed it. Your school's policies expect early recording, information-sharing, and proportionate action.

Goal or Desired Outcome

- Protect your immediate safety and sense of control.
- Create visibility and clear boundaries so the behaviour stops.
- Ensure the concern is recorded, reviewed, and escalated via the correct safeguarding route.

Suggested Strategies

Tier 1: Universal, in-class safety and clarity (use now, every lesson)

- Work in sightlines: Keep doors open where appropriate, teach from a position with full view of the room, and avoid being alone with the pupil (use corridor visibility/adjacent staff). This maintains psychological safety for all and reduces opportunities for covert intimidation.
- Proactive seating & traffic flow: Place the pupil where staff presence and peer visibility are highest. Avoid tight bottle-necks (doorways, printer areas) that create isolated moments.
- Neutral, predictable script (quiet voice, non-confrontational body language):
 - “I’m keeping everyone safe and learning-focused.”
 - “Eyes on your task—thank you.”
 - If looks recur: “That look feels unsafe—eyes on your work.”Trauma-informed guidance emphasises calm redirection, avoiding escalation responses and power-battles.
- Micro-routines for transitions: Meet-and-greet, clear task steps, and visible expectations (“We keep eyes on work/teacher; we keep everyone feeling safe”). Predictability reduces threat responses and testing behaviours.

Tier 2: Targeted supports & supervision (put in place with pastoral/SLT)

- Buddy/visibility plan: Agree a “drop-in” rota so another adult is present during known hotspots (start/end of lesson, dismissal).
- Formalise expectations with the pupil: A short, restorative check-in with a trusted adult clarifies boundaries (“in our school, behaviour that makes others feel unsafe is not OK”) and names the specific behaviour (intimidating looks) without shame. Use a written, positively-framed classroom agreement.
- Request/refresh an individual risk assessment focusing on staff safety, supervised transitions, and clear responses if intimidation recurs (e.g., removal to a supervised space). Your policy explicitly cites health & safety measures and individual risk assessments where there’s intimidating behaviour.
- Record every incident on your MIS (SchoolPod/SPOD) under Physical/Intimidation the same day; keep your own brief professional log (date/time/location, exact behaviour, your response, witnesses). This creates a pattern for review and triggers support.
- Escalation route: If a line manager minimises it, share the pattern with the Designated Safeguarding Lead (DSL) or deputy—your policy is clear that staff must not assume others will act and that early information-sharing is vital.

Tier 3: Intensive/safeguarding measures (if behaviour persists or escalates)

- Planned timetable adjustments (e.g., supervised entry/exit, temporary relocation, 1:1 or parallel provision blocks) to protect staff and peers while work continues on behaviour change. Your policy allows short-term changes for safety.

- Senior-led meeting with parents/carers to address patterns and agree next steps; record outcomes and review dates.
- Police liaison if there are threats of violence or you feel at risk—explicitly supported by the policy for serious threatened violence.

Optional Add-Ons (tools you can use tomorrow)

- Two-line incident template to keep language objective: “At 10:25 in Room 3, Pupil A maintained prolonged eye contact while others were out of earshot; jaw set, lips pressed; repeated after redirection. I used a calm script and moved to a visible area. Learning continued.” (Mirror this in SPOD.)
- Staff positioning plan (print for your desk): entry, dismissal, printer, and corridor spots that keep you in line-of-sight of colleagues (“never last out” routine).
- Co-regulation cue card for you: slow breath, neutral face, low-arousal stance, short directive (6–8 words), avoid approaching into personal space—trauma-informed de-escalation.
- Request short professional supervision (wellbeing check-in) via SLT/DSL noting the impact on your sense of safety; policy expects leaders to support staff and ensure clear procedures.

Follow-up Prompt

Would you like me to draft:

- a one-page risk-reduction plan (staff positioning, buddy rota, hotspots),
- a restorative conversation script naming the behaviour safely, or
- a model SPOD entry plus an email to the DSL setting out the pattern and requested actions?

Final Safeguards and Summary

- Keep all records anonymous in external tools; use SPOD for official logging.
- Report patterns to the DSL even if a line manager is unconcerned—do not assume others will act.
- Where intimidation poses a serious threat, policy allows police involvement and immediate safety measures.

If any messages or examples you plan to share include identifiers, please anonymise before continuing.

You said:

What does the school policy say about this

Taught AI Academy - Behaviour strategies said:

Thought for 12s

What the school policy says (in brief)

- Intimidation is a serious incident. Violent or intimidating pupil behaviour must be managed through health & safety measures and individual risk assessments; serious threats can involve police liaison. Incidents should be recorded on SPOD under “Physical/Intimidation.”
 - Record every incident and share concerns early. Staff must not assume others will act; early information-sharing with the DSL/deputy is expected. If in doubt about sharing, speak to the DSL—fears about sharing must not block safeguarding.
 - Escalation and oversight. The DSL advises on responses to safeguarding concerns and holds the full picture; governors and leaders must ensure procedures are implemented and resourced. Whistleblowing routes exist if you need to raise concerns about how safeguarding is managed.
 - Practical controls to protect staff. Where risk is identified, the school can put in place supervision/visibility plans, adjustments to movement/timetable (including asking a pupil to leave early for safety with senior approval), and convene parent/carers meetings—all logged and followed up.
 - Concerning behaviours definition. “Any behaviour that makes others feel unsafe, physically or emotionally” is a recordable concern and should be challenged and logged on the MIS.
-

What that means you can do now (policy-aligned steps)

1. Log each incident on SPOD the same day under Physical/Intimidation; keep brief, objective notes.
 2. Inform the DSL/deputy with a summary of the pattern; don't rely on a single manager who has minimised it.
 3. Request an individual risk assessment addressing staff safety, visibility/buddying, and responses if intimidation recurs.
 4. Ask SLT for immediate safety measures (e.g., supervised transitions/doorway presence; temporary timetable or location adjustments) while the plan is drafted.
 5. Use whistleblowing routes if you believe safeguarding isn't being managed appropriately.
 6. If there is a serious threat or actual assault, policy permits calling 999 and liaising with the police.
-

 Want me to draft a policy-referenced SPOD entry and an email to the DSL requesting a risk assessment and visibility plan?

ChatGPT says: 📌 **What the school policy says (in brief)** - **Intimidation is a serious incident.** **Violent or intimidating pupil behaviour** must be managed through **health & safety measures** and **individual risk assessments**; serious threats can involve **police liaison**. Incidents should be **recorded on SPOD** under “Physical/Intimidation.” **Record every incident and share concerns early.** Staff **must not assume others will act**; early information-sharing with the **DSL/deputy** is expected. "I have an EAL learner who is extremely quiet and doesn't respond verbally to instructions. He appears very withdrawn and hard to engage. Can you suggest ways to build trust and encourage participation, without overwhelming him?"

Taught AI Academy - Behaviour strategies said:

Thought for 10s

 Have you read and agree to follow the Taught AI Academy Acceptable AI Use Policy — and confirm you will not include any personal names or identifying information about pupils, staff or families?

 Type "Yes" to proceed.

You said:

Yes

Taught AI Academy - Behaviour strategies said:

Thought for 21s

 Summary of the Challenge

A secondary EAL learner is in a non-verbal/withdrawn phase and doesn't respond to spoken instructions. This likely reflects a normal "silent period" for some EAL learners and/or a stress response; we should prioritise safety, predictability, and low-pressure language opportunities.

 Goal or Desired Outcome

Build trust and predictable routines so the pupil can participate through low-demand, non-verbal responses first, then progress to short, supported verbal contributions over time.

 Suggested Strategies

Universal (Tier 1): whole-class tweaks that help everyone

Normalize non-verbal participation: accept pointing, thumbs cards, mini-whiteboards, matching/sorting, and graphic organisers before speech. Use quick checks like true/false, show-me cards, or "select from 3" to reduce pressure.

Predictable instructions: deliver directions in small steps, with simple visuals on the board; pause and recap. Keep a consistent routine for task starts (“First... Then...”).

Reduce cognitive-language load: pre-teach 3–5 key words with images, and keep a “word bank” visible; provide bilingual dictionary/translation support where appropriate.

Wait time + gentle checks: give extra processing time; check understanding with non-verbal signals or having the pupil show rather than tell. Avoid cold-calling.

Calm, trauma-sensitive climate: predictable routines, clear expectations, low sensory load, and relational warmth. Avoid rapid instructions or raised voices.

Targeted (Tier 2): light scaffolds for this learner

Safe seating + allies: seat with supportive language role-models (groups of three work well). Where possible, allow short peer talk in the first language to process tasks.

Choice-based entry points: offer two task options (e.g., “match or draw,” “label or sort”) and a no-talk option (pointing/placing) to enter the task without public speech.

Speaking frames for later: when ready, provide sentence starters on a mini card (e.g., “I think... because...”, “It shows...”) and accept whispered or one-word responses to a trusted adult before whole-class share.

Micro-goals: co-set tiny, observable steps (e.g., “today: point to the correct diagram twice”; “by Friday: read one keyword aloud in 1:1”). Celebrate progress privately.

Regulate first, then communicate: build a brief arrival routine (greet at door, visual plan, 60-second settling task). Offer a discreet break card or movement/sensory option if stress rises.

Intensive (Tier 3): for persistent withdrawal

1:1 low-pressure language routine (5 mins daily): preview one visual, rehearse key words with pointing, then optional whisper/read. Keep it predictable and relationship-centred.

Model–guide–fade: demonstrate the target response, practise together with visuals, then let the pupil try independently when ready (Rosenshine’s modelling & guided practice).

Feedback that lowers threat: acknowledge any attempt (“You showed the right graph—great.”), then one precise next step. Avoid public correction. Use recasting if/when speech emerges.

 Optional Add-Ons (ready-to-use tools)

Starter kit: mini-whiteboard, picture cue set, red/green card, and 3 laminated sentence frames (“It is...”, “I choose...”, “Because...”).

Visual lesson map: a simple “Now / Next / Then” strip on desk each lesson to reduce uncertainty.

Gentle scripts for adults (low-arousal tone): “You can show me by pointing,” “Take your time—I’ll come back,” “Thumbs up when ready.”

Home link: encourage families to keep first-language conversation rich (don’t force English at home) and to use subtitles; share 3 key visuals/words for the week.

 Follow-up Prompt

Would you like me to draft a one-page support plan (routines, visuals, sentence frames, and a 2-week micro-goal ladder) you can use with your team?

 Final safeguards: I’ve kept advice anonymous and aligned with trauma-informed, relational approaches and predictable routines as per Taught AI Academy policy.

You said:

Please expand on all for the tier 3 responses for me

Taught AI Academy - Behaviour strategies said:

Thought for 22s

 Summary of the Challenge

You’re asking for deeper, practical detail on Tier 3 supports to help an EAL learner who is very withdrawn and not speaking in class.

 Goal or Desired Outcome

Create a predictable, low-pressure pathway from non-verbal participation → whispered/1:1 verbal attempts → brief, supported class-facing responses—without overwhelming the pupil.

 Tier 3 — Expanded, Ready-to-Run

1) Daily 1:1 Low-Pressure Language Routine (5–7 minutes)

Purpose: Pair relationship-building with tiny, successful language moments.

When/Where: Same time daily (e.g., first 5 mins after arrival), same corner/desk, same adult.

Materials: Mini-whiteboard, 3 picture cues/keyword cards, “Now–Next” strip, one success token (sticker/tick).

Scripted flow (approx. 60–90 sec per step):

Warm arrival (co-regulation; 30–45s)

Adult, soft voice: “Welcome. You can just show today.”

Offer a single calming choice: “Sit or stand?” (accept gesture/point)

Preview (visual first; 60s)

Show one image/diagram related to today’s lesson + 2–3 keywords (on cards).

Prompt a non-verbal response: “Point to photosynthesis.” (Thumbs-up if correct.)

Rehearse (choral/whisper option; 60–90s)

Adult models: “It is a leaf.” (Tap words as you say them.)

Invite echo at any level: nod / mouth silently / whisper / say one word.

Accept any attempt. If silent, pupil points to the matching word card.

Choice response (success guaranteed; 60s)

Offer two paths: “ Point & place the right word on the picture or  whisper it.”

Mark success (tick/sticker). No corrections out loud—just recast softly if needed.

Forecast & exit (20–30s)

“Next, we do the starter. You can use your word card.” Hand the card to keep.

Calm goodbye cue (fist-bump/thumbs-up wave).

Weekly progression (micro-ladder):

Week 1: Pointing/matching only (zero pressure to speak).

Week 2: Optional one-word whisper in 1:1; still accept pointing.

Week 3: Short frame in 1:1 (e.g., “It is a ...”).

Week 4+: Transfer one tiny response to paired setting (trusted peer), then to whole class (non-verbal still fine).

Success rules:

One correct response = success. Don’t stack demands. End on a win.

2) Model → Guide → Fade (Scaffold you can reuse in lessons)

Purpose: Make the desired response completely clear, then gradually hand control to the pupil.

Target a single response type at a time (e.g., “label with one word” or “choose a sentence frame”).

Cycle outline (2–5 minutes):

Model (I do):

Show exactly what “good” looks like with the same visual/word bank the pupil has.

Say the sentence while pointing at each keyword.

Guide (We do):

Adult starts the frame, pupil completes via gesture, card placement, or a whispered word.

If stuck, reduce the step (two choices; first sound only; or move back to pointing).

Fade (You do):

Pupil produces the response via their lowest-pressure route (point/whisper/one word).

If they hesitate for >5–7 seconds, instantly return to “We do” to avoid stress.

Fading ladder example (from least to more demand):

Point → place word card → mouth silently → whisper first sound → whisper word → say word → say 3-word frame.

Teacher moves that help fading:

Keep identical routine words (“My turn... Our turn... Your turn.”)

Use time cushions (“Take your time—ready sign when done.”)

Keep choices binary (A/B), not open-ended.

3) Feedback that Lowers Threat & Builds Momentum

Principles: Private, precise, next step only. No public correction. Recast gently.

Micro-feedback menu (choose one line, then stop):

Noticing effort: “You looked carefully and pointed to the right word.”

Name the strategy: “Using the card helped. Good plan.”

Tiny next step: “Next time, try a whisper if it feels okay.”

Recast (language shaping): If pupil says “leaf,” adult softly: “It is a leaf,” nod, move on.

Autonomy: “Point or whisper—you choose.”

Safety close: “That’s enough for today. Success.”

What to avoid:

“Use your words,” public praise that spotlights the pupil, or rapid-fire questions.

Stacking corrections (multiple fixes in one go).

Implementation Extras

A) 2-Week Micro-Goal Ladder (example)

Day 1–3: Two accurate points to target vocabulary during 1:1.

Day 4–5: One accurate point + optional whisper of a keyword in 1:1.

Day 6–7: Whisper one word in 1:1 + place that word in the starter task.

Day 8–10: Whisper a 2–3 word frame in 1:1 (“It is ...”) + non-verbal participation in class (card/point).

B) Readiness & Transfer Indicators

Pupil initiates pointing without prompt → introduce whisper option.

Pupil whispers reliably in 1:1 → transfer to trusted-peer pair once per lesson.

After two calm peer successes → allow a non-verbal whole-class response (hold up card/mini-whiteboard).

C) Data Lite (30 seconds/day)

Use a tiny grid (Mon–Fri): columns for “Point,” “Whisper,” “Sentence frame,” “Stress signs.”

Tick once per day; note any stress cue (avoidance, freeze) to adjust next day’s demand down one step.

D) De-escalation & Overwhelm Safeguards

If you see freezing, head down, quick “no”: drop demand immediately back to pointing, give success, end routine.

Maintain same adult, same spot, same script for at least 10 school days before changing.

Never remove the non-verbal option—even after speech appears.

E) Home/Key Adult Link (non-pressure)

Share 3 visuals/keywords for the week; invite first-language talk at home about those images. No expectation to practise English.

 Ready-Made Toolkit (copy/paste to make)

Desk strip: “Now: picture • Next: choose • Then: tick.”

3 sentence frames (laminated): “It is ...” / “I choose ...” / “Because ...”

Cue cards:  “Point”  “Whisper”  “Think time”  “Word bank”

Mini success tracker: 10-box tick card → swap for preferred activity picture when full.

Follow-Up Prompt

Would you like me to draft a one-page plan (routine script, fading ladder, mini data grid, and home link) tailored to your subject and room setup?

 Final safeguards

No names or identifying details used. Strategies keep pressure low, protect dignity, and prioritise predictable routines and relational safety.

****Summary of the Challenge**** You're asking for ****deeper, practical detail**** on Tier 3 supports to help an EAL learner who is very withdrawn and not speaking in class. 🎯

****Goal or Desired Outcome**** Create a ****predictable, low-pressure pathway**** from non-verbal participation → whispered/1:1 verbal attempts → brief, supported class-facing responses—without overwhelming the pupil. --- ## 📅 Tier 3 — Expanded, Ready-to-Run ### 1) Daily 1:1 Low-Pressure Language Routine (5–7 minutes) ****Purpose:**** Pair relationship-building with tiny, successful language moments. ****When/Where:**** Same time daily (e.g., first 5 mins after arrival), same corner/desk, same adult. ****Materials:**** Mini-whiteboard, 3 picture cues/keyword cards, “Now–Next” strip, one success token (sticker/tick). ****Scripted flow (approx. 60–90 sec per step):**** 1) ****Warm arrival (co-regulation; 30–45s)**** - Adult, soft voice: “Welcome. You can just ****show**** today.” - Offer a single calming choice: “Sit or stand?” (accept gesture/point) 2) ****Preview (visual first; 60s)**** - Show ****one**** image/diagram related to today's lesson + 2–3 keywords (on cards). - Prompt a ****non-verbal**** response: “Point to **photosynthesis**.” (Thumbs-up if correct.) 3) ****Rehearse (choral/whisper option; 60–90s)**** - Adult models: “It is ****a leaf****.” (Tap words as you say them.) - Invite ****echo**** at any level: nod / mouth silently / whisper / say one word. - Accept ****any**** attempt. If silent, pupil points to the matching word card. 4) ****Choice response (success guaranteed; 60s)**** - Offer two paths: “****Point & place**** the right word on the picture ****or**** ****whisper**** it.” - Mark success (tick/sticker). No corrections out loud—just recast softly if needed. 5) ****Forecast & exit (20–30s)**** - “Next, we do the starter. You can use your word card.” Hand the card to keep. - Calm goodbye cue (fist-bump/thumbs-up wave). ****Weekly progression (micro-ladder):**** - ****Week 1:**** Pointing/matching only (zero pressure to speak). - ****Week 2:**** Optional ****one-word whisper**** in 1:1; still accept pointing. - ****Week 3:**** Short frame in 1:1 (e.g., “It is a ...”). - ****Week 4+:**** Transfer one tiny response to ****paired**** setting (trusted peer), then to whole class (non-verbal still fine). ****Success rules:**** - One correct response = success. Don't stack demands. End on a win. --- ### 2) Model → Guide → Fade (Scaffold you can reuse in lessons) ****Purpose:**** Make the desired response completely clear, then gradually hand control to the pupil. ****Target a single response type at a time**** (e.g., “label with one word” or “choose a sentence frame”). ****Cycle outline (2–5 minutes):**** 1) ****Model (I do):**** - Show exactly what “good” looks like with the ****same**** visual/word bank the pupil has. - Say the sentence while ****pointing**** at each keyword. 2) ****Guide (We do):**** - Adult starts the frame, pupil completes via ****gesture, card placement, or a whispered word****. - If stuck, reduce the step (two choices; first sound only; or move back to pointing). 3) ****Fade (You do):**** - Pupil produces the response via their ****lowest-pressure route**** (point/whisper/one word). - If they hesitate for >5–7 seconds, ****instantly**** return to “We do” to avoid stress. ****Fading ladder example**

(from least to more demand):** Point → place word card → mouth silently → whisper first sound → whisper word → say word → say 3-word frame. **Teacher moves that help fading:** - Keep **identical routine words** (“My turn... Our turn... Your turn.”) - Use **time cushions** (“Take your time—ready sign when done.”) - Keep **choices binary** (A/B), not open-ended. --- ### 3) Feedback that Lowers Threat & Builds Momentum **Principles:** Private, precise, next step only. No public correction. Recast gently. **Micro-feedback menu (choose one line, then stop):** - **Noticing effort:** “You looked carefully and **pointed to the right word**.” - **Name the strategy:** “Using the **card** helped. Good plan.” - **Tiny next step:** “Next time, try a **whisper** if it feels okay.” - **Recast (language shaping):** If pupil says “leaf,” adult softly: “**It is a leaf**,” nod, move on. - **Autonomy:** “Point or whisper—**you choose**.” - **Safety close:** “That’s enough for today. **Success.**” **What to avoid:** - “Use your words,” public praise that spotlights the pupil, or rapid-fire questions. - Stacking corrections (multiple fixes in one go). --- ## 🧰 Implementation Extras **A) 2-Week Micro-Goal Ladder (example)** - **Day 1–3:** Two accurate **points** to target vocabulary during 1:1. - **Day 4–5:** One accurate **point** + optional **whisper** of a keyword in 1:1. - **Day 6–7:** Whisper **one word** in 1:1 + **place** that word in the starter task. - **Day 8–10:** Whisper a **2–3 word frame** in 1:1 (“It is ...”) + non-verbal participation in class (card/point). **B) Readiness & Transfer Indicators** - Pupil initiates pointing without prompt → introduce **whisper option**. - Pupil whispers reliably in 1:1 → transfer to **trusted-peer pair** once per lesson. - After two calm peer successes → allow a **non-verbal whole-class** response (hold up card/mini-whiteboard). **C) Data Lite (30 seconds/day)** Use a tiny grid (Mon–Fri): columns for “Point,” “Whisper,” “Sentence frame,” “Stress signs.” Tick once per day; note any stress cue (avoidance, freeze) to adjust next day’s demand **down one step**. **D) De-escalation & Overwhelm Safeguards** - If you see freezing, head down, quick “no”: **drop demand immediately** back to pointing, give success, end routine. - Maintain **same adult**, same spot, same script for at least 10 school days before changing. - Never remove the non-verbal option—even after speech appears. **E) Home/Key Adult Link (non-pressure)** Share 3 visuals/keywords for the week; invite **first-language talk** at home about those images. No expectation to practise English. --- ## 🧰 Ready-Made Toolkit (copy/paste to make) - **Desk strip:** “Now: picture • Next: choose • Then: tick.” - **3 sentence frames (laminated):** “It is ...” / “I choose ...” / “Because ...” - **Cue cards:** ✅ “Point” 🗣️ “Whisper” 🧠 “Think time” 📖 “Word bank” - **Mini success tracker:** 10-box tick card → swap for preferred activity picture when full. --- 😊 **Follow-Up Prompt** Would you like me to **draft a one-page plan** (routine script, fading ladder, mini data grid, and home link) tailored to your subject and room setup? --- 🗝️ **Final safeguards** No names or identifying details used. Strategies keep pressure low, protect dignity, and prioritise predictable routines and relational safety.

Summary of the Challenge

A Year 10 learner currently communicates non-verbally. You want gentle, trauma-informed ways to build psychological safety first, then gradually invite low-pressure verbal interaction. A predictable, choice-rich environment and careful pacing are key.

Goal or Desired Outcome

Increase the learner's sense of safety and control so that non-verbal communication can step up—at their pace—towards brief, voluntary spoken responses, without pressure or re-traumatisation.

Suggested Strategies

Universal (Tier 1): whole-class routines that protect safety

- Make the room and routines predictable: posted agenda, advanced warnings for any change, consistent openings/closings. This lowers threat and cognitive load for traumatized learners.
- Create a clear “opt-in” culture: no cold-calling; offer think-time plus multiple ways to respond (thumbs/gesture cards/mini-whiteboard). Praise participation in any mode.
- Establish and rehearse calm exits: a quiet corner/safe space and a discreet break card for when arousal rises.
- Use short, concrete language and visuals when giving instructions; repeat key points.

Targeted (Tier 2): graded communication plan (“slide-in” approach)

- Start where they are strong: keep non-verbal channels (pointing, cards, gestures, symbols) fully acceptable and celebrated; then add micro-steps (e.g., mouth words silently → whisper to trusted adult → one-word answer). Pace by consent.
- Offer controlled choice to boost agency: “Would you like to respond by nodding 👍/card 🟩/whisper?” Choice reduces threat and supports autonomy.
- Pre-agree tiny goals and timings: e.g., “One whispered word to me privately by the end of Friday.” If not met, no penalty—just roll the step again. Predictability + low stakes matter.
- Use 1:1 low-demand practice slots in a quiet space (30–90 seconds) tied to interests (music, sport, gaming). Keep scripts visible so language load stays light.
- Model co-regulation first: soft eye contact, calm tone, increased physical distance, and brief, simple prompts. Avoid escalation moves (crowding, raised voice).
- Map triggers and high-arousal moments (transitions, noise) and pre-empt with signals, countdowns, and sensory regulation before any ask.

Intensive (Tier 3): when progress stalls or anxiety spikes

- Multi-disciplinary check-in (SENCO/EP/mental-health lead) to confirm pacing and avoid inadvertent pressure; align with school pathways and de-escalation scripts.
- Personalised “communication ladder” displayed discreetly (in planner/desk card), co-written with the learner; review weekly to celebrate any step.
- Environmental tweaks for sensory load (seating, dimmer lighting where possible, quieter corridor entry, headphones if appropriate).

Optional Add-Ons (ready to use)

- Micro-scripts (you):
 - “You can answer by card or whisper—both count.”
 - “One word is enough today. Your choice of word.”

- “Would now or end of lesson feel easier?” (timing choice)
Keep language short and repeatable during arousal.
- Co-regulation prompts (you → pupil):
 - “How’s your stress number (1–10)?” → offer break/quiet.
 - “Pick one cool-down: water / deep breaths / step out.” Display as a small menu card.
- Response scaffolds (pupil tools):
 - Yes/No/Maybe cards; topic word bank; sentence starters on a mini-card. These reduce processing load and support safe “first words.”
- Data-light monitoring:
 - Track the *mode* (gesture/card/whisper/word) and *context* (1:1/peer/whole class), not just “spoke/didn’t speak,” to show progress without pressure.

Follow-up Prompt

Would you like me to sketch a 4–6 week graded “communication ladder” with sample scripts and check-ins you can lift straight into your lessons?

Safeguards

No personal or identifying details used. Approaches align with trauma-sensitive practice (predictability, choice, avoidance of re-traumatisation) and your centre’s emphasis on positive, low-key reinforcement.
