Thought for 19s

Great—thanks for confirming.

LESSON: Year 10 Functional Reading (45 minutes)

Text Type: Takeaway Menu (fictional, anonymised)

Lesson Objective

- Read a real-life text (a takeaway menu) and use skimming and scanning to locate key information quickly.
- Compare prices and “deals” to make a best-value decision and justify it in discussion and writing.
- Meet Functional Skills Reading outcomes at L1–L2: identify main points, compare information across options, and use organisational features to locate details.

Key Vocabulary (scaffolded)

- Skim – quick read to get the gist (what it's about).
- Scan – look for specific words/numbers (e.g., “delivery fee”).
- Deal/meal deal – items bundled for a set price.
- Surcharge – extra charge (e.g., delivery).
- Minimum order – least you must spend to buy.
- Allergy information – ingredients that could cause a reaction.
- Portion size – how much food you get.

Starter (5 minutes) – “30-Second Skim”

1. Hand out the menu. Learners have 30 seconds to skim and then tell a partner:
 - What kind of food is sold?
 - How is the menu organised? (sections, headings, icons)Rosenshine routine: rapid review and oral check for understanding.

Main Teaching (10 minutes) – I do / We do

- I do (modelling on visualiser/board):
 - Teacher models scanning for: vegetarian mains; delivery fee; cheapest side; allergy symbol. Explain how headings, icons and £ signs help locate info fast.
- We do (guided practice):
 - In pairs, learners scan to find: the most expensive pizza; the cheapest drink; any lunchtime offer; delivery radius/fee. Share answers; teacher probes reasoning and highlights “tricks” (small print, bundle conditions).

Why: FS English expects use of organisational features (menus, tabs) and comparing information across the text.

Pedagogy: short steps, modelling, guided practice, frequent checks.

Discussion Focus (5 minutes) – Price Comparison Mini-debate

Prompt questions on the board:

- Which option gives best value for a group of 3? Why?
- How do delivery fees/minimum spend change the real price?
- Where might there be hidden costs?

Structure talk with sentence stems and turn-taking norms (e.g., “I agree because...”, “However, the delivery fee means...”) to meet speaking/listening expectations for Functional Skills.

Independent Practice (20 minutes)

Set up: Give learners the differentiated comprehension sheet (A–C). Learners choose or are directed to the right level; TA circulates with prompt cards. Scaffold removal as confidence grows (EEF SEND guidance).

A. Multiple-Choice (5 Qs) – Skim/Scan (all learners)

1. The delivery fee is: A £1.50 B £2.00 C £2.50 D Free over £20
2. The cheapest side is: A Garlic bread £3.20 B Fries £2.50 C Onion rings £2.80 D Coleslaw £1.90
3. The “Lunchtime Deal” runs: A Mon–Fri 11–3 B Sat–Sun 12–4 C Mon–Fri 5–7 D Every day 11–3
4. Vegetarian symbol appears next to: A BBQ Wings B Margherita C Mixed Grill D Tuna Melt
5. Minimum delivery order: A £10 B £12 C £15 D No minimum

B. Short-Answer (5 Qs) – Retrieve/Explain

1. Name two menu sections that help you navigate quickly.
2. Find an item that mentions an allergen. What is it?
3. Which single pizza and side together make the cheapest two-item order? Show prices.
4. If you spend £18 for delivery, what is the total including the delivery fee?
5. Write one reason a “2 for £14” pizza deal might be better than buying two £7.50 pizzas—and one reason it might be worse.

C. GCSE-Style Functional Questions (5 Qs) – Compare/Infer/Justify (L1–L2)

1. Compare the “Meal for 1” and “Meal for 2” offers. Which is better value per person? Show calculations and justify.
2. A customer has £20 and wants a vegetarian main, a drink and delivery. Create the best-value combination and explain your choice.
3. The menu advertises “Family Feast £24.99 (feeds 4).” Evaluate whether this is actually cheaper than buying 4 individual mains at £6.50 each when delivery is added.
4. Identify two language/format features that help a reader locate information fast on this menu. Explain how they help.

5. The small print states “Prices may vary. Extras charged separately.” What could this imply about the final cost? Use evidence from the menu.

Challenge/Stretch (choose any 2)

- Write a 90-word consumer advice note: “How to spot a real deal on a menu.”
- Create a ranked list (best to worst value) of three different deals; defend your ranking with calculations (cost per item/person).

(Links to comparing texts and evaluating value; disciplinary literacy in real contexts.)

Plenary (5 minutes) – Exit Ticket

- One sentence: “Skimming helps me when...; Scanning helps me when...”
- Circle one: Today I can (a) find key info fast (b) compare deals (c) explain best value, or (d) need more practice with ____.

Trauma-informed close: predictable routine and low-stakes reflection.

Optional Writing Frame (for B/C tiers)

- Purpose: I am choosing food for ... with a budget of £.
- I scanned for: [delivery fee] [minimum order] [deal conditions].
- My calculation: Item(s) £ + delivery £__ = £__.
- Conclusion: The best value is __ because __ (evidence from menu).

Differentiated Comprehension Sheet (printable)

Section 1: Skim/Scan Grid (for all)

Make a quick tick (✓) when you find each item. Record price/notes.

| Find this... | Page/Section | Price/Info | Notes |

| Vegetarian main | | | |

| Cheapest drink | | | |

| Delivery fee | | | |

| Lunchtime deal time | | | |

| Allergy warning | | | |

Section 2: Tiered Questions

- Level C (Support): 5 MCQs + 3 short retrieval (sentence starters provided).

Sentence starters: “I found this under...”, “The price is...”, “This means...”.

- Level B (Core): 5 short-answer + 3 functional calculations (model layout boxes).
- Level A (Stretch): 5 GCSE-style + 2 challenge tasks (justify with calculations; compare options).

Section 3: Price Comparison Table (for calculations)

Option	What’s included	Sticker price	Extra charges	Real total	Cost per person
--------	-----------------	---------------	---------------	------------	-----------------

Meal for 1					
------------	--	--	--	--	--

Meal for 2					
------------	--	--	--	--	--

Family Feast					
--------------	--	--	--	--	--

DIY Pick & Mix					
----------------	--	--	--	--	--

Behaviour/SEMH & SEND Access

- Clear routines, calm tone, choice of task tier, and opt-in oral/ written response formats.
- Visual scaffolds (frames, checklists) and gradual removal of support.
- Frequent checks for understanding and guided practice stages.
- Environment and routines aligned with our trauma-informed approach (predictability, relational stance).

Assessment & Evidence of Learning

- Formative: responses in skim/scan grid, mini-debate contributions, accuracy of calculations, and written justifications.
- Summative (light-touch): mark L1–L2 items against FS descriptors (locate info; compare ideas; use organisational features; infer meaning).

Resources Provided (ready to paste into your worksheet)

Use the tables above plus:

- Fictional Takeaway Menu (teacher creates or adapts—ensure sections like “Starters,” “Pizzas,” “Burgers,” “Sides,” “Drinks,” “Deals,” and small print with “Delivery fee £2.50; Minimum order £12; Lunchtime Deal Mon–Fri 11–3”). This directly supports reading organisational features in a “menu” context.

Why this lesson meets standards & evidence

- Functional Skills alignment: reading menus, extracting main points, using organisational features, comparing information, and discussing value.
- Instructional design: I do–We do–You do, small steps, checks for understanding.
- Inclusive practice: temporary scaffolds, clear visuals, participation options.

Would you like this adapted for a specific year group or learning route? Any literacy, SEMH, or behaviour needs to consider? Would you like this turned into a 3-lesson sequence or exported to Word/Google Docs? Would you like a retrieval or homework version?

Thought for 9s

Brilliant—here are clean, copy-ready TABLES you can drop straight into a worksheet, plus a set of slide titles you can paste into your deck.

LESSON PACK TABLES (Printable/Editable)

Section 1: Pupil Instructions & Learning Objective

Lesson Title	Year/Group	Time	Learning Objective (LO)
--------------	------------	------	-------------------------

Functional Reading: Takeaway Menu	Y10	45 mins	Skim/scan a real-life menu, locate key information quickly, and compare prices to decide best value.
--------------------------------------	-----	---------	--

Today I Will...	Success Criteria
• Skim to get the gist • Scan to find specifics • Compare deals and real costs • Explain my choice	• I can find info fast using headings and symbols • I can calculate total and per-person cost • I can justify the best-value option

Section 2: Skim & Scan Grid (Starter)

Find this...	Where I found it (section/page)	Exact wording/price	Notes (symbols/format that helped)
Vegetarian main			
Cheapest drink			
Delivery fee			
Lunchtime deal time			
Allergy warning			

Section 3: Multiple-Choice (Tick One)

Q	Question	A	B	C	D	My Answer
1	The delivery fee is:	£1.50	£2.00	£2.50	Free over £20	
2	The cheapest side is:	Garlic bread £3.20	Fries £2.50	Onion rings £2.80	Coleslaw £1.90	
3	The "Lunchtime Deal" runs:	Mon–Fri 11–3	Sat–Sun 12–4	Mon–Fri 5–7	Every day 11–3	

	The vegetarian				
4	symbol appears next to:	BBQ Wings	Margherita	Mixed Grill	Tuna Melt
5	Minimum delivery order is:	£10	£12	£15	No minimum

Section 4: Short-Answer (Sentence Boxes)

Q	Prompt	My Response
1	Name two menu sections that help you navigate quickly.	
2	Find an item that mentions an allergen. What is it?	
3	Which single pizza and side make the cheapest two-item order? Show prices.	
4	If you spend £18 for delivery, what is the total including the delivery fee? Show working.	
5	Give one reason a “2 for £14” deal might be better than two £7.50 pizzas and one reason it might be worse.	

Section 5: GCSE-Style Functional Questions (Show Working/Evidence)

Q	Task	Space for Working & Evidence
1	Compare “Meal for 1” vs “Meal for 2”. Which is better value per person?	
2	You have £20 and want a vegetarian main, a drink, and delivery. Build the best-value combo and justify.	
3	Is “Family Feast £24.99 (feeds 4)” cheaper than 4 mains at £6.50 each when delivery is added?	

4	Identify two format features that help a reader find information fast, and explain how they help.
5	Small print says “Prices may vary. Extras charged separately.” What might this imply about the final cost?

Section 6: Price Comparison & “Real Cost” Table

Option	What's included	Sticker price	Extra charges (delivery/extras)	Real total	Cost per person	Best/Worst value? Why?
Meal for 1						
Meal for 2						
Family Feast						
DIY Pick & Mix						

Section 7: Challenge/Stretch (Choose Any Two)

Task	Prompt	Space for Response
Consumer Advice (≈90 words)	“How to spot a real deal on a menu.” Include 3 tips and one warning.	
Value Ranking	Rank three deals (best→worst). Show calculations (cost per item/person) and justify the order.	

Section 8: Plenary – Exit Ticket

Reflection	My Response
Skimming helps me when...	

Scanning helps me when...

Today I can: (circle) find info fast / compare deals / explain best value /
need more practice with _____

Section 9: Optional Writing Frame (Support)

Sentence Starter	Fill In
Purpose: I am choosing food for... with a budget of £__.	
I scanned for... (delivery fee / minimum order / deal conditions).	
My calculation: Item(s) £__ + Delivery £__ = £__.	
Conclusion: The best value is __ because __ (evidence from menu).	

Section 10: Differentiation Selector (Pupil Choice/Teacher-Directed)

Level	Do These Sections	Notes/Support
C (Support)	Sections 2, 3, plus Q1–3 of Section 4	Use writing frame and highlight key parts of the menu.
B (Core)	Sections 2–4, 6	Show working in the price table; sentence stems optional.
A (Stretch)	Sections 2, 4–7	Include cost-per-person and a short justification paragraph.

Bonus: Fictional Takeaway Menu Template (Fill-In Before Printing)

Section	Item	Description/Icons (V/VEG/🌶️)	Price
Starters			
Pizzas			

Burgers/Wraps

Sides

Drinks

Deals

Small print

Delivery fee £__

Minimum order £__

Lunchtime Deal –

SLIDE TITLES (Copy-Paste Ready)

1. Title: Functional Reading – Takeaway Menu (Y10)
2. Learning Objective & Success Criteria
3. Skim vs Scan: What's the Difference?
4. 30-Second Skim: What's this menu about?
5. How to Scan Fast: Headings, £ Signs, Icons, Small Print
6. Guided Practice: Find These 4 Things (live scan)
7. Worked Example: Real Cost vs Sticker Price
8. Price Comparison: Cost-Per-Person Calculation
9. Discussion Mini-Debate: Which Deal Is Best Value?
10. Independent Tasks: Choose Your Level (C/B/A)
11. Challenge: Rank the Deals & Justify
12. Plenary: "Skimming helps me... Scanning helps me..."
13. Next Steps: Retrieval/Homework Options
14. Safety Note: Allergens & Small Print Matter

Y

Taught AI Academy Lesson Generator said:

Thought for 12s

Great—thanks for confirming. Here’s a complete, ready-to-teach 45-minute Year 9 English lesson on writing persuasive paragraphs (topic: “phone use in school”), with sentence starters, peer discussion, and a model paragraph—plus a printable worksheet at the end.

Lesson Title: Persuasive Paragraphs – Should phones be allowed in school?

Duration: 45 minutes

Class: Year 9 (PRU-aware, mixed prior attainment)

Lesson Objective

- Write a clear, persuasive paragraph that states a viewpoint, uses one reason with evidence, and addresses a counter-argument.
- Success criteria (tick off): I clearly state my viewpoint • I use at least one

persuasive device • I include a short example/evidence • I acknowledge or rebut the other side • I use a concluding clincher.

Why these choices (for colleagues)

- Short review, modelling and guided practice before independent writing align with Rosenshine's principles (small steps, models, guided practice, checks for understanding).
- Structured talk and explicit sentence-level scaffolds support reluctant writers and improve disciplinary literacy in English.
- Plan-Monitor-Evaluate prompts build metacognition without overloading working memory.
- Feedback is planned so pupils can act on it (focused on task/strategy, not the person).

Key Vocabulary (scaffolded)

1. Viewpoint – your position or opinion on an issue.
2. Evidence – facts, examples, or brief data that support your point.
3. Counter-argument – the other side's strongest point.
4. Rebuttal – your reply that explains why the counter-argument is weaker.
5. Emotive language – words that make the reader feel something strongly.
6. Cohesive devices – linking words like "because," "therefore," "however."
7. Clincher – a final sentence that leaves a strong impression.

Lesson Flow (45 minutes)

1. Settler & Retrieval (0–5)
 - On the board: "Write one pro and one con for phones in school."
 - Cold-call a few short responses; note useful phrases for later (e.g., "improves safety," "causes distraction").
 - Purpose: activate prior knowledge and give language prompts before modelling.
2. Live Modelling: What a Persuasive Paragraph Looks Like (5–12)
 - Teacher think-aloud: annotate a model paragraph (below) to show: viewpoint → reason → evidence/example → counter-argument + rebuttal → clincher.
 - Highlight cohesive devices and one persuasive device (emotive language/statistic).

Model Paragraph (display and read aloud)

“Phones should be allowed in school in a controlled way because they can enhance learning and keep students safe. For example, in lessons, a quick photo of the board or a school-approved research task can help students who struggle with note-taking, and having a phone means pupils can contact home after clubs. Some people argue that phones cause constant distraction; however, when schools set clear ‘screen-down unless permitted’ rules and teachers use phones only for structured tasks, the benefits outweigh the risks. Ultimately, sensible phone use supports learning and safety without taking over the classroom.”

3. Structured Talk: Pair Dialogue (12–18)

- Talk frames (on slide/handout):
 - “My viewpoint is that phones should/should not be allowed because...”
 - “A strong reason for this is...”
 - “For example...”
 - “Some people say..., however...”
 - “Therefore...”
- Roles: A = Speaker, B = Challenge & Build using “however/therefore/on the other hand.” Switch after 2 mins.
- Purposeful, teacher-guided dialogue raises quality of ideas and language before writing.

4. Guided Writing: Sentence-Starter Scaffolds (18–28)

- Pupils draft one persuasive paragraph using these scaffold choices:
 - Viewpoint: “(Phones) should/should not be allowed in school because...”
 - Reason + evidence: “This matters because... For instance/For example...”
 - Counter + rebuttal: “Some argue that..., however/this overlooks...”
 - Clincher: “Therefore/In the end, ...”
- Teacher roams to prompt and check for understanding; quick mini-conferences for those stuck (use the “because—so—however” strip).

5. Rapid Feedback & Improve (28–36)

- Peer swap (green pen): Partners use the “Two Stars & a Wish” checklist (task/strategy-focused):
 - Star 1: Clear viewpoint?
 - Star 2: Evidence/example used?
 - Wish: Add/strengthen counter-argument & rebuttal or improve clincher.
- 3-minute edit based on peer note. Emphasise “how to improve” not “who you are.”

6. Stretch/Challenge (for early finishers, 28–36)

- A) Add a statistic (realistic or cited source in lesson context) and a rhetorical

question.

B) Flip the stance: write a second, shorter paragraph for the other side.

7. Plenary & Metacognitive Reflection (36–45)

- Hands up: “One sentence starter that helped me was...”
- Exit slip (Plan–Monitor–Evaluate):
 - Plan: “Which starter did I choose and why?”
 - Monitor: “Midway, what did I change?”
 - Evaluate: “What would I do differently next time to make my rebuttal stronger?”

Differentiation & Inclusion (PRU-aware, SEMH/SEND)

- Reduce load: offer a half-page writing frame with sentence starters and word bank.
- Choice & predictability: pupils can choose pro or con; clear timings and calm routines.
- Regulate: allow brief “pause-card” or think time; pair with supportive peer.
- EAL: pre-teach key verbs for argument (allow, ban, distract, benefit), plus cohesive devices; model pronunciation through choral reading.
- Challenge: require a mini-rebuttal using “although/nevertheless” and a clincher that echoes the opening.

Assessment & Feedback

- Formative: circulate during guided writing; target one success criterion per pupil; use verbal prompts (“Name your viewpoint in the first sentence”).
- Peer review focused on task/strategy with explicit time to act on feedback.

Optional Writing Frame (copy to board/handout)

1. Viewpoint: “Phones should/should not be allowed in school because...”
2. Reason: “This is important because...”
3. Evidence/example: “For example/For instance...”
4. Counter-argument: “Some people argue that...”
5. Rebuttal: “However/This view ignores that...”
6. Clincher: “Therefore/Overall/Ultimately...”

Multiple-Choice (low-stakes retrieval – select one)

1. A counter-argument is: a) your main point b) the other side’s best point c) a statistic d) a conclusion.

2. A rebuttal is: a) agreeing with the counter-argument b) ignoring it c) replying to it d) repeating evidence.
3. A clincher sentence should: a) introduce new evidence b) end strongly c) start with “however” d) ask a question only.
4. Which is a cohesive device? a) because b) phone c) safe d) school.
5. Emotive language aims to: a) define terms b) explain methods c) create feelings d) show chronology.

Short-Answer (2–3 lines each)

1. Write one viewpoint sentence for or against phones in school.
2. Give one example that supports your viewpoint.
3. Write a counter-argument in one sentence.
4. Add a one-sentence rebuttal using “however.”
5. Write a clincher that echoes your opening.

GCSE-Style Tasks (choose one)

1. Write a persuasive paragraph for a school newsletter arguing for controlled phone use.
2. Write a persuasive paragraph arguing for a complete ban on phones during the school day.
3. Compare which single persuasive device (emotive language vs. statistic) is more effective in your paragraph—and justify your choice.

Challenge/Stretch

1. Integrate a brief counter-example and explain why it doesn’t change your conclusion.
2. Use a triadic structure (rule of three) in your clincher and underline it.

Plenary Prompts (choose one)

- “One change I made after peer feedback was...”
- “Next time, I will improve my rebuttal by...”

Printable Worksheet (class-ready)

Title: Persuasive Paragraphs – Phones in School

Section A: Vocabulary Boost (match)

- Viewpoint • Evidence • Counter-argument • Rebuttal • Clincher • Emotive language
- Cohesive device

[Teacher can add simple match-up or have pupils write one example of each.]

Section B: Talk Frames (pair work)

- My viewpoint is... because...
- For example...
- Some people say... however...
- Therefore...

Section C: Writing Frame (tick off each box as you write)

- ☐ Viewpoint stated clearly
- ☐ One reason explained
- ☐ Evidence/example included
- ☐ Counter-argument acknowledged
- ☐ Rebuttal given
- ☐ Clincher ends strongly

Sentence Starters (use at least three)

- "...should/should not be allowed because..."
- "This matters because..."
- "For instance/For example..."
- "Some people argue that..."
- "However/Nevertheless/Although..."
- "Therefore/Ultimately/In the end..."

Section D: Peer Review – Two Stars & a Wish

Star: ...

Star: ...

Wish (how to improve): ...

Section E: Edit & Improve (3 minutes)

- Add one cohesive device: however/therefore/meanwhile/although.
- Strengthen your evidence with a short example or mini-statistic.

Section F: Exit Slip (Plan–Monitor–Evaluate)

Plan: Which starter did I choose and why?

Monitor: What did I change while writing?

Evaluate: What will I do next time to improve my rebuttal?

Teacher Notes (evidence reminders)

- Model, guide, then release to independent practice; check understanding frequently.
- Use structured talk to lift quality before writing.
- Build metacognitive reflection with Plan–Monitor–Evaluate.
- Feedback should be actionable and about the task/strategy.

Would you like this adapted for a specific year group or learning route? Any literacy, SEMH, or behaviour needs to consider? Would you like this turned into a 3-lesson sequence, or exported for Word/Google Docs? Would you like a retrieval-quiz or homework version?

You said:

Please put into tables and give me some slide titles and structure to add into ppt

Taught AI Academy Lesson Generator said:

Thought for 12s

Brilliant—here's your lesson reorganised into clean, copy-and-paste tables for Word/Google Docs, plus a ready-made PPT slide structure.

LESSON OVERVIEW (45 MIN) – TABLE

Section & Timing	What Students Do	What You Do	Resources	Evidence/Why
1) Settler & Retrieval (0–5)	List one pro and one con of phones in school.	Cold-call a few answers; capture useful phrases on board.	Slide 1; mini-whiteboards (optional).	Start with review, build background knowledge and language.

2) Live Modelling (5–12)	Listen; annotate features of a persuasive paragraph.	Think-aloud:		
		viewpoint → reason → evidence → counter + rebuttal → clincher (use model below).	Slide 2–3 (model paragraph, colour-coded).	Small steps + worked model raise success rates.
3) Structured Talk (12–18)	Paired dialogue using talk frames; swap roles.	Circulate; prompt use of cohesive devices.	Slide 4 (Talk Frames).	Guided, structured talk improves writing quality.
4) Guided Writing (18–28)	Draft one persuasive paragraph with sentence starters.	Coach with prompts; quick conferences for stuck writers.	Slide 5 (Starters); Writing Frame sheet.	Break down writing; scaffold at sentence level.
5) Peer Feedback & Edit (28–36)	Swap, apply “Two Stars & a Wish”; 3-min edit.	Set focus: viewpoint, evidence, counter+rebuttal/clincher.	Slide 6 (Peer checklist).	Feedback focused on task/strategy and time to act.
6) Stretch (parallel to 5)	Add statistic + rhetorical question or flip stance paragraph.	Target early finishers.	Slide 7 (Challenges).	Motivation through purposeful challenge.
7) Plenary & PME Exit Slip (36–45)	Share one helpful starter; complete Plan-Monitor-Evaluate.	Cold call; collect slips.	Slide 8 (Exit Slip).	Make thinking explicit: plan–monitor–evaluate.

KEY VOCABULARY – TABLE

Term	Pupil-friendly definition	Example in this topic
Viewpoint	Your position or opinion.	Phones should/should not be allowed.

Evidence	Facts/examples supporting your reason.	"For example, during revision, a timer app helps focus."
Counter-argument	The other side's strongest point.	"Phones distract students."
Rebuttal	Your response to weaken that point.	"However, clear 'screen-down' rules reduce distraction."
Emotive language	Words that create strong feelings.	"Constant distractions damage learning."
Cohesive devices	Linking words to join ideas.	However, therefore, although, because.
Clincher	Final sentence that ends strongly.	"Ultimately, sensible rules keep learning first."

MODEL PARAGRAPH (for Slide 3 / handout)

"Phones should be allowed in school in a controlled way because they can enhance learning and keep students safe. For example, in lessons, a quick photo of the board or a school-approved research task can help students who struggle with note-taking, and having a phone means pupils can contact home after clubs. Some people argue that phones cause constant distraction; however, when schools set clear 'screen-down unless permitted' rules and teachers use phones only for structured tasks, the benefits outweigh the risks. Ultimately, sensible phone use supports learning and safety without taking over the classroom."

SENTENCE STARTERS – TABLE (display on Slide 5)

Purpose	Starters
Viewpoint	"...should/should not be allowed because..."
Reason	"This is important because..." "One key reason is..."

Evidence	“For example/For instance...”
Counter	“Some people argue/claim that...”
Rebuttal	“However/This overlooks/Although/Nevertheless...”
Clincher	“Therefore/Overall/Ultimately/In the end...”

PAIR TALK FRAMES – TABLE (Slide 4)

Role A: Build Case (60s)	Role B: Challenge/Build (60s)
“My viewpoint is... because...”	“On the other hand, some say... however...”
“A strong reason is...”	“Therefore/although/nevertheless...”
“For example...”	“So are you saying...? Could you add evidence?”

DIFFERENTIATION & INCLUSION – TABLE (PRU-aware)

Need	Practical Strategies
Reduce cognitive load	Use the Writing Frame; tick-box success criteria; chunk timings.
SEMH/Anxiety	Predictable routine; choice of stance; short writing bursts + movement break option.
EAL	Pre-teach key verbs (allow, ban, distract, benefit); choral read model; visuals for vocab.
Stretch	Require statistic + rhetorical question; flip-stance mini-paragraph.
Feedback	Task/strategy-focused; allocate edit time.

PRINTABLE WORKSHEET – TABLES

A) Vocabulary Boost (match or example)

Word	My example sentence
------	---------------------

Viewpoint

Evidence

Counter-argument

Rebuttal

Emotive language

Cohesive device

Clincher

B) Talk Frames (pair work)

Prompt	My sentence
My viewpoint is... because...	
For example...	
Some people say... however...	
Therefore...	

C) Writing Frame (tick as you write)

Step	Tick
1. Clear viewpoint in first sentence	☐
2. One reason explained	☐
3. Evidence/example included	☐
4. Counter-argument acknowledged	☐
5. Rebuttal given	☐

6. Clincher ends strongly

D) Sentence Starters (use at least three)

Starters

should/should not be allowed because... • This matters because... • For example/For instance...
• Some people argue that... • However/Nevertheless/Although... • Therefore/Ultimately/In the end...

E) Peer Review – Two Stars & a Wish

Partner's name/initials	Star 1	Star 2	Wish (how to improve)
-------------------------	--------	--------	-----------------------

F) Edit & Improve (3 minutes)

Target	What I changed
Add one cohesive device (however/therefore/although)	
Strengthen evidence with an example or mini-stat	

G) Exit Slip – Plan • Monitor • Evaluate

Plan: Which starter did I choose and why?	Monitor: What did I change while writing?	Evaluate: How will I improve my rebuttal next time?
---	---	---

LOW-STAKES QUESTIONS (for retrieval or homework) – TABLES

Multiple Choice (circle one)

Q	a	b	c	d
1) A counter-argument is...	your main point	the other side's point	a statistic	a conclusion
2) A rebuttal is...	agreeing	ignoring it	replying to it	repeating evidence

3) A clincher should...	add new info	end strongly	start with “however”	be a question only
4) Which is a cohesive device?	because	phone	safe	school
5) Emotive language aims to...	define terms	explain methods	create feelings	show chronology

Short Answer (2–3 lines)

Prompt	Response
1) Write one viewpoint sentence.	
2) Give one supporting example.	
3) Write a counter-argument.	
4) Add a rebuttal using “however”.	
5) Write a clincher.	

GCSE-Style (choose one)

Task	Notes box
1) Newsletter paragraph arguing for controlled phone use.	
2) Paragraph arguing for a full ban during the school day.	
3) Which is more effective in your paragraph—emotive language or a statistic? Justify.	

Challenge/Stretch

Task	Notes
------	-------

Add a brief counter-example and explain why it doesn't change your conclusion.

Use a rule-of-three in your clincher and underline it.

READY-TO-USE PPT SLIDE TITLES + STRUCTURE

1. Title & Objectives (1 min)
 - “Persuasive Paragraphs: Phones in School”
 - Today I will: state a viewpoint; use reason + evidence; address a counter-argument; end with a clincher.
2. Settler – Pros & Cons (4 min)
 - Prompt on screen: “Write one pro and one con of phones in school.”
 - Share a few; build class word bank.
3. What ‘Good’ Looks Like (2 min)
 - Success criteria checklist (tick-box version).
 - Briefly name the five parts: viewpoint, reason, evidence, counter+rebuttal, clincher.
4. Model Paragraph (5 min)
 - Display colour-coded model paragraph.
 - Teacher think-aloud highlights cohesive devices/emotive word and counter→rebuttal.

(Evidence base: model + small steps).
5. Talk It Out – Frames (6 min)
 - Pair roles A/B and sentence frames on screen.
 - Timer visible; swap halfway.

(Why talk? Structured talk improves writing.)
6. Write It – Starters on Screen (10 min)
 - Sentence starter menu; prompt to tick success criteria as they write.
 - Teacher roams for quick prompts.

(Break complex writing into steps; scaffold.)
7. Peer Review: Two Stars & a Wish (6–8 min)
 - Mini checklist: viewpoint? evidence? counter+rebuttal/clincher?
 - 3-minute edit window after feedback.

(Feedback focused on task/strategy; time to act.)
8. Stretch (on the same or separate slide for early finishers)
 - Add a statistic + rhetorical question, or flip the stance.
 - Optional examples provided.
9. Plenary – PME Exit Slip (5 min)
 - Three boxes: Plan / Monitor / Evaluate.
 - Cold-call: “Which starter helped you most, and why?”

(Teach plan–monitor–evaluate explicitly.)

NOTES FOR COLLEAGUES (tiny footer bullets for the deck)

- Short review → model → guided practice → independent → feedback loop.
- Sentence-level scaffolds + structured talk boost reluctant writers.
- Feedback: focus on task/strategy; build in edit time.

Would you like this exported as a Word/Docs pack and PPT template? Want it tweaked for a specific set (e.g., SEMH focus, EAL-heavy, or higher prior attainment), or built into a 3-lesson sequence with retrieval/homework versions?

You said:

Thought for 14s

Year 9 Persuasive Paragraphs – Ppt Template (phones In School)

PRESENTATION TITLE: Persuasive Paragraphs – Phones in School (Year 9)

Design notes (apply once in theme) • Clean, high-contrast theme (dark blue titles, charcoal body, accent teal). • Fonts: Titles = Montserrat (Bold); Body = Calibri/Arial. • Icons: speech bubble (talk), pencil (write), arrows (counter→rebuttal), tick (success). • Consistent footer: “Taught AI Academy • Year 9 English • Persuasive Paragraphs”. • Timing badges on slides (small circles): 1–5 mins each as indicated.

Slide 1 — Title & Today’s Objective (1 min) Layout: Title + Subtitle + 3 bullets

Title: Persuasive Paragraphs: Phones in School Subtitle: Year 9 English | 45 minutes Bullets (Success Criteria) • State a clear viewpoint • Use one reason + evidence • Address a counter-argument and finish with a clincher Speaker Notes: Welcome, quick overview of why persuasive paragraphs matter. Point to the success criteria; pupils will tick these later.

Slide 2 — Agenda & Ground Rules (1 min) Layout: Two-column list Left:

Agenda

1. Settler 2) Model 3) Pair talk 4) Draft 5) Peer edit 6) Plenary Right:
Ground Rules • Respectful talk • Screen-down unless permitted • One voice at a time Speaker Notes: Predictability reduces anxiety. Set the routine calmly.

Slide 3 — Settler: Pros & Cons (4 min) Layout: Prompt + two columns with icons (thumbs up/down) Prompt: Write one PRO and one CON of phones in school. Columns: leave space for live typing or board capture Speaker Notes: Cold-call 3–4 brief answers; build a quick word bank.

Slide 4 — What ‘Good’ Looks Like (2 min) Layout: Checklist boxes Checklist:
☐ Viewpoint in the first sentence ☐ Reason explained (why it matters) ☐
Evidence/example included ☐ Counter-argument acknowledged ☐ Rebuttal
(why your view still stands) ☐ Clincher (strong ending) Speaker Notes: Briefly name each part; this mirrors the writing frame.

Slide 5 — Model Paragraph (5 min) Layout: Full-width text box (large spacing); colour-key legend beneath Model text: “Phones should be allowed in school in a controlled way because they can enhance learning and keep students safe. For example, in lessons, a quick photo of the board or a school-approved research task can help students who struggle with note-taking, and having a phone means pupils can contact home after clubs. Some people argue that phones cause constant distraction; however, when schools set clear ‘screen-down unless permitted’ rules and teachers use phones only for structured tasks, the benefits outweigh the risks. Ultimately, sensible phone use supports learning and safety without taking over the classroom.” Legend (use coloured tags): • Blue = Viewpoint • Green = Reason/Evidence • Amber = Counter • Red = Rebuttal • Purple = Clincher Speaker Notes: Think-aloud: label each section; point out cohesive devices and one persuasive device (emotive/mini-stat).

Slide 6 — Deconstruct the Model (2 min) Layout: 5 callouts pointing to lines

Prompts: • Where is the viewpoint? • Highlight 1 cohesive device (however/therefore/although). • Spot the counter → rebuttal move. • What evidence/example is used? • What makes the clincher effective? Speaker

Notes: Quick check-for-understanding before writing.

Slide 7 — Talk Frames (Pair Work) (6 min) Layout: Split screen Role A / Role

B with timer icon Role A: “My viewpoint is... because...”, “A strong reason is...”, “For example...” Role B: “On the other hand, some say... however...”, “Therefore/although/nevertheless...”, “Could you add evidence?” Instructions:

60s each, then swap. Speaker Notes: Circulate and nudge use of cohesive devices.

Slide 8 — Sentence Starter Menu (reference while writing) (1 min intro, stays visible) Layout: Grid of starters Viewpoint: “should/should not be allowed

because...” Reason: “This is important because.../One key reason is...”

Evidence: “For example/For instance...” Counter: “Some people argue/claim

that...” Rebuttal: “However/This overlooks/Although/Nevertheless...” Clincher:

“Therefore/Overall/Ultimately/In the end...” Speaker Notes: Encourage pupils to choose at least three starters.

Slide 9 — Guided Writing (10 min) Layout: Left = Writing frame checklist;

Right = lined space or ‘Now write’ prompt Left checklist (tick boxes):

1. Clear viewpoint in first sentence
2. One reason explained
3. Evidence/example included
4. Counter-argument acknowledged
5. Rebuttal added
6. Clincher ends strongly Speaker Notes: Coach quietly; short conferences for stuck writers.

Slide 10 — Peer Review: Two Stars & a Wish (6–8 min) Layout: Three

sticky-note placeholders Prompts: Star 1: Clear viewpoint? Star 2:

Evidence/example used? Wish: Improve counter+rebuttal or clincher Speaker
Notes: Task/strategy focus. Then 3-minute edit window.

Slide 11 — Edit & Improve (3 min) Layout: Two-row table Row 1: Add a
cohesive device (however/therefore/although) → [type here] Row 2:
Strengthen evidence with an example or mini-stat → [type here] Speaker
Notes: Model one quick upgrade live.

Slide 12 — Stretch / Early Finisher (parallel to Slide 10) (as needed) Layout:
Two options with icons A) Add one statistic + a rhetorical question. B) Flip the
stance: a short paragraph for the other side. Speaker Notes: Invite confident
pupils to attempt both.

Slide 13 — Plenary: PME Exit Slip (5 min) Layout: Three boxes labelled Plan •
Monitor • Evaluate Prompts: Plan: Which starter did I choose and why?
Monitor: What did I change while writing? Evaluate: How will I strengthen my
rebuttal next time? Speaker Notes: Cold-call 2–3 responses; collect slips.

Slide 14 — Vocabulary Boost (optional, for homework or next lesson) Layout:
Matching grid or 'write your own example' boxes Words: Viewpoint • Evidence
• Counter-argument • Rebuttal • Emotive language • Cohesive device •
Clincher Speaker Notes: Use for retrieval practice.

Slide 15 — Parking Lot / Questions Layout: Post-it wall Prompt: Any questions
or examples to add for next time? Speaker Notes: Acknowledge contributions;
signal next steps.

Appendix (copy-ready handouts on separate slides, if exporting to PDF) A)
Talk Frames (Role A/B) B) Sentence Starter Menu C) Writing Frame Checklist
D) Two Stars & a Wish template E) Exit Slip PME

Export Tips • Save as: "Y9_Persuasive_Paragraphs_PhonesInSchool.pptx". •
Print-to-PDF handouts: 6-slides per page for pupil reference. • Keep Slide 8
(Starters) visible during writing; duplicate if needed.

Your PPT template is ready on the canvas. Want me to export it as a Word/PDF
handout pack or tailor the deck for a specific set (SEMH/EAL/higher prior
attainment)?

Y

Taught AI Academy Lesson Generator said:

Thought for 18s

Thought for a few seconds

Your full 45-minute lesson plan and printable visual worksheet are on the canvas now.

Quick teacher notes (evidence-informed):

- Keep the sequence predictable and chunked; trauma-informed practice recommends breaking tasks into parts, offering choices, and using visual cues.
- Provide non-verbal participation routes (thumbs, cards, drawing) and “share your partner’s idea” to support low verbal confidence and inclusion.
- Model first, then guide short practice before independent work (small steps, check for understanding).
- Use calm, specific feedback focused on the task or strategy rather than personal traits.
- SEL/SEMH programmes show benefits when skills like self-management and grounding are explicitly taught and rehearsed.

- De-escalation and relaxation techniques (like controlled breathing) are recommended within trauma-responsive classrooms.

Want me to:

- adapt this for a specific year group or learning route?
 - add literacy/SEMH behaviour supports (e.g., bespoke scripts, visual timers)?
 - turn it into a 3-lesson sequence?
 - generate a Word/Google Docs export or a retrieval/homework version?
- Would you like me to expand on any part of this?

You said:

Please put into tables and let give me some slides titles and structure for lessons

Year 10 Pshe (semh): Managing Stress – 45-minute Lesson & Visual Worksheet

TITLE: Year 10 PSHE (SEMH) – Managing Stress (45 minutes)

INTENT & SAFETY NOTES • Trauma-informed, inclusive, low-stakes throughout. Avoid personal disclosures; learners can pass at any time. • Offer choice of verbal/non-verbal responses (thumbs up/down, cards, whiteboards, drawing). Provide a calm corner if available.

LEARNING OBJECTIVE By the end of the lesson, learners can: identify common stress signs; name at least two helpful coping strategies; and practise a short breathing technique to self-regulate.

SUCCESS CRITERIA (STUDENT-FRIENDLY) • I can spot how stress shows up in body/thoughts/behaviour. • I can use a simple breathing exercise to calm myself. • I can choose at least one healthy next step when I feel stressed.

KEY VOCABULARY (with simple definitions)

1. Stress – the body's response to pressure or challenge.
2. Trigger – something that sets off a strong feeling or reaction.
3. Coping strategy – a helpful action to deal with stress.
4. Grounding – bringing attention back to the here and now.
5. Self-regulation – helping your body and mind feel steady.
6. Support network – people or services who can help.
7. Boundary – a limit that keeps you safe and well.

TIMINGS OVERVIEW (45 minutes) • Starter (5) • Teach/model + visuals (10) • Guided practice: Breathing routine (8) • Independent practice (12) • Group reflection (6) • Plenary/exit (4)

STARTER – “Stress Signals Check-In” (5 minutes) Resources: A4 picture grid (faces/body icons), mini whiteboards or sticky notes. Steps: • Display a simple visual with three columns: Body / Thoughts / Behaviour. • Prompt: “Circle or point to any signals you notice when stressed.” Learners can draw a symbol or place a sticky note. No sharing required. • Quick non-verbal poll: thumbs (👍 sometimes, 🤔 unsure, 👎 not me) to normalise variety.

MAIN TEACHING – What is stress? (10 minutes) Resources: One slide/board with three boxes (Body, Thoughts, Behaviour) and examples; traffic-light visual for helpful vs unhelpful responses. Teacher talk (brief, chunked): • Stress is normal and can be helpful in short bursts; it becomes unhelpful when it lasts or feels too strong. • Show examples: – Body: fast heartbeat, sweaty palms, tense muscles, tummy aches. – Thoughts: “I can’t do this”, racing mind, worrying about ‘what if...’ – Behaviour: snapping, avoiding work, shutdown. Model (trauma-aware): • Use a neutral, fictional scenario: “A test is moved to tomorrow.” Think-aloud how stress might show up and how to respond with one small action (e.g., ‘box breathing’, speaking to an adult, planning 10 focused minutes). • Emphasise choice and control: learners can choose silent strategies.

GUIDED PRACTICE – Breathing Exercise (8 minutes) Technique: Box Breathing (4-4-4-4) with visual. • Script (slow, calm tone):

1. Sit with feet on floor; soften shoulders.
2. Breathe in through nose for 4 (count softly or tap fingers).
3. Hold for 4.
4. Out through mouth for 4.
5. Hold for 4. • Repeat 4 cycles. Offer adaptations: – Eyes open, gaze on a spot. – Trace a finger square on the desk for each count. – If holding

the breath feels uncomfortable, skip the holds and use 4-in / 6-out. •
Quick reflection options: show 1–5 fingers for “how calming was that?”

INDEPENDENT PRACTICE – Choice Board (12 minutes) Learners select any two tasks. Provide privacy screens if helpful. A) Multiple Choice (5 Qs) – circle answers on worksheet. B) Short Answers (5 Qs) – sentence stems provided. C) GCSE-style Scenarios (5 Qs) – short paragraph or bullet responses; prompts include PEEL frame. D) Design task – draw a personal ‘Calm Card’ with two strategies and a supportive self-talk line.

GROUP REFLECTION – “What Helps Us” (6 minutes) • In pairs or triads, use talk tokens or turn-taking cards. Alternative: one speaker, others respond with emoji cards only. • Prompt cards: – One thing that helps me calm down is... – A sign I might need a break is... – A safe next step in school is... • Each group contributes one anonymous strategy to a class ‘toolkit’ poster.

PLENARY / EXIT TICKET (4 minutes) • Learners tick two items on the exit grid: (1) A stress sign I can spot; (2) One strategy I will try; (3) Who/where I can go for help in school. • Hand in as they leave. Option to keep private.

DIFFERENTIATION & SEMH ADAPTATIONS • Low-verbal options: symbols, checklists, drawing, sentence stems, ‘share your partner’s idea’, thumbs voting. • Predictability: display agenda; signal transitions with a visual timer; allow passes. • Sensory: offer ear defenders, mindful colouring during reflection. • Scaffolds: keyword cards, PEEL frame, model answers for 1–2 items before independent work.

SAFEGUARDING NOTE • Emphasise no personal trauma sharing is required. Provide signposting to in-school support (Pastoral/Safeguarding Lead) if a learner discloses.

—

PRINTABLE WORKSHEET (Visual, Student-Facing)

Page 1 – Understanding Stress (Name: _____ Date: ____) Section A: Spot the Signals (tick or draw) [Table] • Column 1: Body ( fast heartbeat /  sweaty /  tummy ache /  tired / other: _____) • Column 2: Thoughts ( racing mind /  ‘what if...’ /  can’t focus /  negative self-talk / other: _____) • Column 3: Behaviour ( snapping /  avoid /  shut down /  comfort eating / other: _____)

Section B: Helpful or Unhelpful? (circle one)

1. Staying up all night before a test – Helpful / Unhelpful
2. 4-4-4-4 box breathing for two minutes – Helpful / Unhelpful
3. Asking an adult for a short break – Helpful / Unhelpful
4. Skipping meals when stressed – Helpful / Unhelpful
5. Writing a 3-step plan – Helpful / Unhelpful

Page 2 – Breathing Guide (Keep Me!) Box Breathing Card (cut-out) [Large square outline with arrows on each side and numbers 1-2-3-4] • In (4) → Hold (4) → Out (4) → Hold (4) Adaptations: keep eyes open; trace the square; or try 4-in / 6-out if holding feels hard. How did it feel? (circle):  calm  ok  unsure  not for me

Page 3 – Practice Questions A) Multiple Choice (circle one)

1. Stress is... a) Always bad b) A normal body response c) Only in adults d) A sign of weakness
2. A ‘trigger’ is... a) A random habit b) Something that sets off strong feelings c) A type of exercise d) A reward
3. Which is a grounding strategy? a) Doomscrolling b) Holding your breath for 20s c) Naming 5 things you can see d) Skipping lunch
4. Best first step if you feel overwhelmed in class: a) Walk out without telling anyone b) Shout c) Use your Calm Card and signal for a break d) Keep it inside
5. After a stress spike, which thought helps? a) “I must be perfect.” b) “This will last forever.” c) “I can do one small step.” d) “I’m useless.”

Answer key (for staff): 1b, 2b, 3c, 4c, 5c

B) Short Answers (use sentence stems)

1. One sign I notice in my body is _____.

2. When my thoughts speed up, I can _____.
3. A safe place in school for me is _____.
4. A person I can ask for help is _____.
5. A sentence I can tell myself is: "I can _____."

C) GCSE-Style Scenarios (choose two; 4–6 lines each) Use PEEL: Point – Evidence/example – Explain – Link.

1. Jay has a presentation tomorrow. Describe two healthy strategies Jay could use tonight and explain why they help.
2. A friend is scrolling social media at 1am before a mock. Evaluate the impact on stress and suggest a better plan.
3. You feel your heart racing in maths. Assess whether box breathing or leaving the room is the safer first step and justify your choice.
4. Compare two grounding techniques (5-4-3-2-1 vs drawing). Which suits you and why?
5. A deadline moves earlier. Plan three steps to cope today.

D) Design Task – My Calm Card (mini-poster) • My two go-to strategies:

_____ and _____. • Words that help me:

"_____." • Who/where can help me in school:

_____. (Use icons/colour if helpful.)

Page 4 – Group Reflection Cards (cut-outs) • One thing that helps me calm down is... • A sign I might need a break is... • A safe next step in school is...
(Use turn-taking tokens; non-verbal reactions allowed.)

Page 5 – Exit Ticket Tick two you can do today: [] I can spot this stress sign:

_____ [] I will try this strategy: _____ [] If I need help, I can go to: _____ Feeling check (circle): 😊 😐 😞 😡 😢 (Optional comment box)

OPTIONAL WRITING FRAMES (attach if needed)

1. Sentence starters: "When I feel _____ I can _____." "My plan is: first _____, then _____, finally _____."
2. PEEL template boxes for one scenario.

RESOURCES LIST • Visual slides/board with Body–Thoughts–Behaviour. • Box Breathing card (printable on Page 2). • Choice board worksheet (Pages 1–5). • Talk tokens/emoji cards; timer; calm corner items.

TEACHER PROMPTS (for low verbal confidence) • “You can point, circle, draw, or write a word.” • “Share your partner’s idea if you prefer.” • “You may keep your answers private—hand in blank if you choose.”

EXTENSION / CHALLENGE (2 tasks)

1. Evidence mini-compare: Which two strategies work fastest for you and why? (Use a 1–5 calm rating.)
2. Create a 3-step micro-routine you could use before an exam (e.g., breathe – plan – positive self-talk).

SIGNPOSTING (customise to school) • In-school: Pastoral team / Safeguarding Lead / School counsellor. • Out-of-school (non-directive): trusted adult, GP, NHS 111 (urgent concerns).

TABULAR LESSON PLAN (PRINT-FRIENDLY)

Self-regulation	Helping body and mind feel steady	
Support network	People/services who can help	
Boundary	A limit that keeps you safe and well	

Table 3: Differentiation & SEMH Supports

Need/Barrier	Strategy	How it looks in this lesson
Low verbal confidence	Non-verbal response routes	Thumbs/cards/drawing; partner-share; sentence stems
Anxiety/activation	Predictable structure & choices	Agenda on slide; options in choice board; pass is allowed
Sensory overload	Reduce input; regulate first	Ear defenders; calm corner; shorter tasks first
Working memory load	Small steps & visuals	Three-box model; PEEL frame; model answers
Motivation/effort	Quick wins & specific praise	"You traced the square smoothly—nice pacing."

Table 4: Worksheet Structure (Visual)

Page	Planning		
	Title	What students do	Low-verbal option
1	Understanding Stress	Tick/draw stress signals in Body/Thoughts/Behaviour	Icons only; circle images

2	Box Breathing Card	Cut-out card; choose adaptation; rate feeling	Circle emoji rating
3	Practice Questions	MC (5), Short (5), GCSE-style (5) choose two	Bullet words; sentence stems
4	Reflection Cards	Use in pairs/triads	Emoji reactions only
5	Exit Ticket	Tick two next steps; signpost	Tick boxes; draw symbol

SLIDE DECK OUTLINE (TITLES & STRUCTURE)

Slide 1 – Title & Calm Start • “Managing Stress” (Year 10 PSHE) • Today’s ground rules (pass allowed; non-verbal ok) • Visual: soft colour strip + calm icon

Slide 2 – Learning Objective & Agenda • LO in student-friendly language • 5-step lesson timeline (icons for each segment)

Slide 3 – What Is Stress? • One-sentence definition • “Helpful vs too much” note • Image: stress-thermometer

Slide 4 – Stress Signals: Body | Thoughts | Behaviour • Three columns with 3–4 examples each • Prompt: “Which have you seen before?”

Slide 5 – Helpful vs Unhelpful Responses (Traffic-Light) • Green: breathing, short plan, ask for help • Amber: scroll limit, quick stretch • Red: all-nighter, shouting, skipping meals

Slide 6 – Breathing Technique: Box Breathing 4-4-4-4 • Big square diagram with arrows • Step-by-step 1–4 • Adaptations (eyes open; 4-in/6-out)

Slide 7 – Guided Practice (2 minutes) • On-screen 4-beat counter animation (or teacher count) • “Try 4 cycles—trace the square”

Slide 8 – Choice Board Instructions • A: Multiple Choice • B: Short Answers • C: GCSE Scenarios • D: Calm Card design • “Pick any 2” + timing bar

Slide 9 – Scaffold: PEEL Frame (for scenarios) • P-E-E-L with a model sentence • Sentence starters

Slide 10 – Group Reflection: What Helps Us • 3 prompt cards on screen • Anonymous share to toolkit poster

Slide 11 – Exit Ticket & Check-Out • Two ticks + feeling emoji • “Keep your card if you want”

Slide 12 – Where to Get Help • In-school roles (customise) • Out-of-school signposting (non-directive)

DESIGN NOTES (for slides) • High-contrast, minimal text, large icons. •

Consistent colour code: Body=blue, Thoughts=purple, Behaviour=orange. •

Use timers/animated progress bars for transitions. • Include a quiet symbol in corner to signal non-verbal options.

All set! I’ve added clean, printable tables for the lesson, vocabulary, supports, and worksheet structure, plus a 12-slide deck outline with titles, key bullets, and design notes—ready to drop into your slides app.

Want me to:

- export a Word/Google Docs version with the tables?
- build the actual slide text (speaker notes included) in your preferred style template?
- adapt for a specific year group or learning route, or add extra literacy/behaviour scaffolds?

Taught AI Academy Lesson Generator said:

Thought for 13s

Great—thanks for confirming. Here’s your ready-to-use, trauma-informed 45-minute Year 7 maths lesson on multiplying decimals with prices and shopping receipts, plus a printable worksheet and answer key.

Lesson Title

Multiplying Decimals in Real Life: Prices, Quantities and Receipts (Year 7)

Timing (45 minutes total)

- 0–5 min: Starter (low-stakes, accessible)
- 5–15 min: Main teaching (live modelling + guided practice)
- 15–30 min: Independent practice (tiered)
- 30–38 min: Challenge/extension + support

- 38–43 min: Visual plenary quiz
- 43–45 min: Exit ticket and reflection

Learning Objective

- To multiply decimals accurately and apply this to real-world shopping contexts (unit prices, quantities, and simple bundled totals).

Success Criteria (Student-friendly)

- I can use a place-value strategy to multiply decimals.
- I can ignore the decimal, multiply whole numbers, then place the decimal correctly.
- I can check if my answer is sensible using estimation/rounding.
- I can read a simple receipt and calculate totals using decimal multiplication.

Key Vocabulary (scaffolded)

- Decimal: A number with a point to show parts of a whole (e.g., 3.5).
- Place value: The value of each digit (ones, tenths, hundredths).
- Quantity: How many items.
- Unit price: Cost for one item.
- Total: The full cost after multiplying price $\times$ quantity.
- Estimate: A sensible, quick guess close to the real answer.
- Rounding: Changing a number to a nearby value that is easier to work with.

Prior Knowledge Check (quick)

- Ask: “What is 125×4 ?” (Answer: 500) → Link to $£1.25 \times 4 = £5.00$ by placing the decimal.

Starter (0–5 min) – “Grab & Go Price Tags”

Display three items on the board:

- Juice: £1.20 each
- Apples (each): £0.45

- Bread roll: £0.65

Prompt (on mini-whiteboards):

1. 2 juices cost £_____
2. 3 apples cost £_____
3. 5 rolls cost £_____

Accessibility scaffold: allow mental rounding first (e.g., 45p $\approx$ 50p), then refine.

Main Teaching (5–15 min) – Live Modelling (I do $\rightarrow$ We do)

Trauma-informed setup: predictable steps, clear worked examples, choices, and wait-time.

Step-by-step method (show both strategies):

1. Estimate first (sense-check)
Example: $\text{£}2.79 \times 3 \approx \text{£}2.80 \times 3 = \text{£}8.40$ (so exact answer should be near $\text{£}8.40$).
2. “Ignore the decimal, multiply, then place it back”
Example: 2.79×3
 - Remove decimal: $279 \times 3 = 837$
 - Count decimal places (2 total in 2.79).
 - Put decimal back: $8.37 \rightarrow \text{£}8.37$
3. Place-value grid / area model (visual)
 $2.79 = 2 + 0.7 + 0.09$
Multiply by 3: $(2 \times 3) + (0.7 \times 3) + (0.09 \times 3) = 6 + 2.1 + 0.27 = 8.37$
4. Column method (when needed)
Line up numbers by place value, multiply as integers, then fix decimal places.

Guided Practice (We do—2 quick examples)

A) $\text{£}1.25 \times 4$

- Estimate: $\text{£}1.25 \approx \text{£}1 \rightarrow$ about $\text{£}4\text{--}\text{£}5$
- Exact: $125 \times 4 = 500 \rightarrow$ two decimal places $\rightarrow \text{£}5.00$

B) 0.6×0.7

- Estimate: About $1 \times 1 = 1$ but smaller, so < 1
- Exact: $6 \times 7 = 42$; total 2 decimal places $\rightarrow 0.42$

Inclusion & Support Moves (throughout)

- Chunking instructions on the board, visual models, quiet processing time.

- Offer manipulatives (place-value grids, digit cards).
- Provide a “calm challenge” option for quick finishers.
- For EAL: dual-coding (icons + words), sentence frames for explanations.
- For ADHD/SEMH: short timed bursts, visible steps, positive choices, movement break option (stand to solve one).

Independent Practice (15–30 min)

Section A: Multiple Choice (tick one)

1. $£2.79 \times 3 =$
A £8.37 B £7.28 C £8.73 D £9.37
2. $£0.65 \times 5 =$
A £3.05 B £3.25 C £2.50 D £3.15
3. $1.2 \times 3.4 =$
A 4.08 B 3.28 C 4.80 D 3.68
4. $0.03 \times 0.4 =$
A 0.012 B 0.12 C 0.0012 D 0.004
5. $12.5 \times 0.4 =$
A 5.00 B 4.00 C 0.5 D 50.0

Section B: Short-Answer (show working)

1. $£2.99 \times 5 =$ _____
2. $£4.20 \times 0.5 =$ _____
3. $7.25 \times 0.8 =$ _____
4. $3.5 \times 4 =$ _____
5. $0.75 \times 0.6 =$ _____

Section C: Exam-Style / Problem-Solving (Year-7 friendly)

1. A café sells hot chocolate for £1.45. How much for 6?
2. A shop sells pens at £0.85 each. You buy 12. Find the total.
3. Oranges cost £1.39 each. A box contains 8. Estimate first, then find the exact cost.
4. Bread is £1.29, butter is £2.15. You buy 3 breads and 2 butters. Find the total.
5. A receipt shows: Milk $£1.09 \times 4$, Cereal $£2.65 \times 2$, Bananas $£0.35 \times 6$. What is the total? Show an estimate and an exact answer.

Challenge / Stretch (30–38 min)

1. Error Spotting: A student says $0.4 \times 0.6 = 2.4$ because “ $4 \times 6 = 24$ ”. Explain the mistake and correct it.
2. Design a Deal: Choose any two items below, set a quantity (2–12), and calculate the total. Then write a tip to help someone check their answer by

estimation.

Items: Smoothie £2.35, Yoghurt £0.75, Pasta £1.89, Soap £1.20, Notebook £2.49.

Visual Plenary Quiz (38–43 min) – “Which Receipt Matches the Basket?”

On the board, show this basket using icons or quick sketches:

Basket: 2 juices (£1.20 each), 3 apples (£0.45 each), 1 bread roll (£0.65).

Four mini-receipts (students hold up A/B/C/D cards or fingers):

A: $2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$; Total £4.40

B: $2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.25$; $1 \times £0.65 = £0.55$; Total £4.20

C: $2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$; Total £4.30

D: $2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$; Total £4.50

(Answer: A – correct item totals and correct final total. Use estimation to justify.)

Exit Ticket (43–45 min)

“ $£1.75 \times 4 = \underline{\hspace{2cm}}$ ” and “Is your answer sensible? Explain in one sentence.”

Optional Writing Frames / Scaffolds

- Estimation sentence frame: “I rounded _____ to _____, so my estimate is _____.”

- Worked-example frame:

1. Remove the decimal → multiply as whole numbers → _____
2. Count decimal places: _____
3. Place the decimal → answer: _____
4. Check with estimation: _____

Differentiation & Inclusion

- High support: Provide place-value grid, worked-example cards, and partially completed steps.

- EAL: Pair with vocabulary cards (word + icon + example price), sentence stems to explain method.

- SEND/ADHD: Short tasks with clear timers; option to stand; quiet card to request think-time; reduce writing by allowing oral explanation with teacher scribe.

- Stretch: Multi-step totals, mixed decimals $\times$ decimals, and explanation writing (“why the decimal moves”).

Resources to Prepare

- Mini-whiteboards and pens
 - Price cards/printed item list
 - Place-value grids (laminated)
 - Pupil worksheet (below)
-

Printable Worksheet (Student Version)

Title: Multiplying Decimals – Prices, Quantities and Receipts

A. Key Examples (copy and complete)

1. $\pounds 2.79 \times 3 \rightarrow$ Estimate: _____ Exact: _____
2. $\pounds 1.25 \times 4 \rightarrow$ Estimate: _____ Exact: _____
Steps:
 - Remove decimals and multiply: _____
 - Count decimal places: _____
 - Place the decimal: _____
 - Final answer: $\pounds$ _____

B. Multiple Choice (tick one)

1. $\pounds 2.79 \times 3 =$ A $\pounds 8.37$ B $\pounds 7.28$ C $\pounds 8.73$ D $\pounds 9.37$
2. $\pounds 0.65 \times 5 =$ A $\pounds 3.05$ B $\pounds 3.25$ C $\pounds 2.50$ D $\pounds 3.15$
3. $1.2 \times 3.4 =$ A 4.08 B 3.28 C 4.80 D 3.68
4. $0.03 \times 0.4 =$ A 0.012 B 0.12 C 0.0012 D 0.004
5. $12.5 \times 0.4 =$ A 5.00 B 4.00 C 0.5 D 50.0

C. Short-Answer (show working)

1. $\pounds 2.99 \times 5 =$ _____
2. $\pounds 4.20 \times 0.5 =$ _____
3. $7.25 \times 0.8 =$ _____
4. $3.5 \times 4 =$ _____
5. $0.75 \times 0.6 =$ _____

D. Exam-Style Problems

- Hot chocolate is £1.45 each. Buy 6. Total cost = _____
- Pens are £0.85 each. Buy 12. Total cost = _____
- Oranges are £1.39 each. Box of 8.
Estimate: _____ Exact: _____
- 3 breads at £1.29 each and 2 butters at £2.15 each. Total = _____
- Receipt: Milk £1.09 × 4; Cereal £2.65 × 2; Bananas £0.35 × 6.
Estimate: _____ Exact: _____

E. Challenge / Stretch

- Explain the error: " $0.4 \times 0.6 = 2.4$." Correct answer = _____ Why? _____
- Create a mini-receipt using two items and a quantity (2–12). Calculate the total and write an estimation tip.

F. Visual Plenary – Which Receipt is Right?

Basket: 2 juices (£1.20 each), 3 apples (£0.45 each), 1 bread roll (£0.65).

Circle the correct receipt: A / B / C / D and justify with a one-sentence estimate.

G. Reflection

- One strategy I found helpful today was: _____
- My confidence multiplying decimals is (circle): Low / OK / Good / High.

Teacher Answer Key (for quick marking)

Starter

- £2.40 2) £1.35 3) £3.25

Section B (MCQ)

- A (£8.37)
- B (£3.25)
- A (4.08)
- A (0.012)
- A (5.00)

Section C (Short-Answer)

- $£2.99 \times 5 = £14.95$
- $£4.20 \times 0.5 = £2.10$
- $7.25 \times 0.8 = £5.80$
- $3.5 \times 4 = 14.0$

5. $0.75 \times 0.6 = 0.45$

Section D (Exam-Style)

1. $\text{£}1.45 \times 6 = \text{£}8.70$
2. $\text{£}0.85 \times 12 = \text{£}10.20$
3. Estimate: $\text{£}1.40 \times 8 \approx \text{£}11.20$; Exact: $\text{£}1.39 \times 8 = \text{£}11.12$
4. $3 \times \text{£}1.29 = \text{£}3.87$; $2 \times \text{£}2.15 = \text{£}4.30$; Total = $\text{£}8.17$
5. Milk: $\text{£}1.09 \times 4 = \text{£}4.36$; Cereal: $\text{£}2.65 \times 2 = \text{£}5.30$; Bananas: $\text{£}0.35 \times 6 = \text{£}2.10$;
Total = $\text{£}11.76$
(Estimate e.g., $\text{£}1 \times 4 + \text{£}3 \times 2 + \text{£}0.40 \times 6 \approx \text{£}4 + \text{£}6 + \text{£}2.40 = \text{£}12.40 \rightarrow$ close to exact.)

Challenge

1. Correct: 0.24 (since $4 \times 6 = 24$ and two decimal places total $\rightarrow 0.24$).
2. Varies; check estimation tip mentions rounding (e.g., $\text{£}2.49 \approx \text{£}2.50$).

Plenary

Correct receipt: A ($\text{£}4.40$).

Suggested Behaviour/SEN Supports (quick reference)

- Clear steps on board; timed chunks; celebrate partial success.
- Provide quiet re-set option and choice of task order (A before C, etc.).
- For EAL: model one worked example aloud with visuals; allow bilingual glossary.

Would you like this adapted for a specific year group or learning route?

Any literacy, SEMH, or behaviour needs to consider?

Would you like this turned into a 3-lesson sequence?

Need a Word/Google Docs export or retrieval/homework version?

Would you like me to expand on any part of this?

Thought for 7s

Y7 Maths – Multiplying Decimals (tables + Worksheets)

Title: Year 7 Maths – Multiplying Decimals with Prices & Receipts

Lesson Duration: 45 minutes

Table 1: Timing & Lesson Flow

Segment	Time	What Students Do	What Teacher Does
Starter	0		
	– 5 min	Quick price calculations on mini-whiteboards	Display items, circulate, note misconceptions
Main Teaching	5		
	– 15 min	Watch modelling, respond to prompts	Model step-by-step methods (estimate → multiply as integers → place decimal → check)
Independent Practice	1		
	5 – 30 min	Complete Sections A–C (tiered)	Check-in, scaffold, mini-conferences
Challenge/Extension	3		
	0 – 38	Error-spotting & create-a-deal	Extend reasoning, invite explanations

	m		
	i		
	n		
	3		
	8		
	–		
Visual	4	Choose A/B/C/D	Cold-call, discuss estimation
Plenary	3	receipt	justification
Quiz	m		
	i		
	n		
	4		
	3		
	–		
	4	Submit 2 quick	
Exit Ticket	5	answers +	Collect, quick sample check
	m	reflection	
	i		
	n		

Table 2: Learning Objective & Success Criteria

Learning Objective	Success Criteria
Multiply decimals accurately and apply to real-world shopping contexts (unit prices, quantities, simple bundle totals).	• I estimate first to sense-check. • I multiply as whole numbers, then place the decimal. • I use place value correctly. • I check if my answer is reasonable by rounding. • I can read a simple receipt and find totals.

Table 3: Key Vocabulary (with scaffolds)

Term	Student-friendly Definition	Example
Decimal	A number with a point showing parts of a whole	3.5, 0.45
Place value	Value of each digit by its position	Tenths, hundredths
Quantity	How many items	4 bottles
Unit price	Cost for one item	£1.20 each
Total	Full cost after multiplying	$£1.20 \times 3 = £3.60$
Estimate	A sensible, quick guess close to exact	$£1.99 \approx £2$
Rounding	Changing to a nearby, easier value	$£2.79 \rightarrow £2.80$

Table 4: Prior Knowledge & Starter (0–5 min)

Prompt	Items	Student Task	Answers
Warm-up link	125×4 then $£1.25 \times 4$	Connect whole-number $\times$ to decimal $\times$	500;

			£5
			.0
			0
Starter Q1	Juice £1.20 each	Find cost of 2	£2
			.4
			0
Starter Q2	Apples £0.45 each	Find cost of 3	£1
			.3
			5
Starter Q3	Bread roll £0.65 each	Find cost of 5	£3
			.2
			5

Table 5: Main Teaching – Step-by-Step Modelling

Step	Teacher Model	Worked Example
1. Estimate	Round numbers to check size of answer	$£2.79 \times 3 \approx £2.80 \times 3 = £8.40$
2. Multiply as integers	Ignore decimal → multiply whole numbers	$279 \times 3 = 837$
3. Place decimal	Count total decimal places and insert	2.79 has 2 d.p. → 8.37
4. Check reasonableness	Compare exact with estimate	8.37 close to 8.40 → sensible

Visual method	Place-value/area model	$(2 \times 3) + (0.7 \times 3) + (0.09 \times 3) = 6$ $+ 2.1 + 0.27 = 8.37$
---------------	------------------------	--

Table 6: Guided Practice (We Do)

Question	Estimate	Integer Multiply	Decimal Places	Exact Answer
A) $\begin{array}{r} \pounds 1.25 \\ \times 4 \end{array}$	$\approx \pounds 1 \times 4 = \pounds 4$ (or $\pounds 5$)	$125 \times 4 =$ 500	2	$\pounds 5.00$
B) 0.6×0.7	< 1	$6 \times 7 = 42$	2	0.42

STUDENT WORKSHEET

(Printable)

Table 7: Key Examples – Copy and Complete

Example	Estimate	Integer Multiply	Decimal Places	Exact Answer
$\begin{array}{r} \pounds 2.79 \\ \times 3 \end{array}$				
$\begin{array}{r} \pounds 1.25 \\ \times 4 \end{array}$				

Table 8: Multiple Choice (Circle One)

#	Question	A	B	C	D
1	$£2.79 \times 3$	£8.37	£7.28	£8.73	£9.37
2	$£0.65 \times 5$	£3.05	£3.25	£2.50	£3.15
3	1.2×3.4	4.08	3.28	4.80	3.68
4	0.03×0.4	0.012	0.12	0.0012	0.04
5	12.5×0.4	5.00	4.00	0.5	5.0

Table 9: Short-Answer – Show Working

#	Question	Working Space	Answer
1	$£2.99 \times 5$		
2	$£4.20 \times 0.5$		

3	7.25×0.8
4	3.5×4
5	0.75×0.6

Table 10: Exam-Style Problems (Reasoning)

	Scenario	Estimate	Exact Working	Exact Answer
1	Hot chocolate £1.45 each; buy 6			
2	Pens £0.85 each; buy 12			
3	Oranges £1.39 each; box of 8			
4	3 breads £1.29 each and 2 butters £2.15 each			
5	Receipt: Milk £1.09×4; Cereal £2.65×2; Bananas £0.35×6			

Table 11: Challenge / Stretch

	Task	Your Explanation / Working
1		

Error spotting: “ $0.4 \times 0.6 = 2.4$.” Correct it and explain.

Design a deal: pick 2 items (Smoothie £2.35, Yoghurt £0.75, Pasta £1.89, Soap £1.20, Notebook £2.49), choose quantities (2–12), calculate total, write an estimation tip.

Table 12: Visual Plenary – Which Receipt Matches the Basket? Basket items: 2 juices (£1.20 each), 3 apples (£0.45 each), 1 bread roll (£0.65)

Option	Line Items	Stated Total
A	$2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$	£4.40
B	$2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.25$; $1 \times £0.65 = £0.55$	£4.20
C	$2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$	£4.30
D	$2 \times £1.20 = £2.40$; $3 \times £0.45 = £1.35$; $1 \times £0.65 = £0.65$	£4.50

Justify your choice using estimation: I rounded ... to ..., so my estimate is ..., which supports option ... because ...

Table 13: Exit Ticket & Reflection

Q1	Q2	Reflection
£1.75 $\times 4 =$ _____ —	Is your answer sensible? One-sentence reason.	Strategy I found helpful today: _____. Confidence: Low / OK / Good / High

TEACHER ANSWER KEY

(Quick Marking)

Table 14: Starter Answers

Q1	Q2	Q3
£2.40	£1.35	£3.25

Table 15: Multiple Choice Answers

#	Correct
1	A (£8.37)
2	B (£3.25)
3	A (4.08)
4	A (0.012)
5	A (5.00)

Table 16: Short-Answer Solutions

#	Solution
1	£14.95
2	£2.10
3	£5.80
4	14.0

5	0.45
---	------

Table 17: Exam-Style Solutions

#	Estimate	Exact
1	$£1.50 \times 6 \approx £9.00$	$£1.45 \times 6 = £8.70$
2	$£0.85 \approx £0.90 \rightarrow £0.90 \times 12 \approx £10.80$	$£0.85 \times 12 = £10.20$
3	$£1.40 \times 8 \approx £11.20$	$£1.39 \times 8 = £11.12$
4	$\approx £1.30 \times 3 + £2.20 \times 2 \approx £3.90 + £4.40 = £8.30$	$3 \times £1.29 = £3.87;$ $2 \times £2.15 = £4.30; \text{Total } £8.17$
5	$\approx £1 \times 4 + £3 \times 2 + £0.40 \times 6 \approx £4 + £6 + £2.40 = £12.40$	$£4.36 + £5.30 + £2.10 = £11.76$

Table 18: Challenge Solutions (Indicative)

#	Notes
1	$0.4 \times 0.6 = 0.24$ (two decimal places). Misconception: treated decimals as whole numbers.
2	Varies; check rounding/estimation tip is explicit and total is correct.

Differentiation & Inclusion

(Quick Reference)

Table 19: Supports & Scaffolds

Need	Strategy
EAL	Dual-coding (icons + words), sentence stems, model one aloud
ADHD/S EMH	Timed bursts, visible step list, movement/stand option, choice of task order
SEND (general)	Place-value grids, worked-example cards, reduced writing load (scribe/labels)
Stretch	Multi-step totals, mixed decimals×decimals, explanation “why the decimal moves”

Table 20: Optional Writing Frames

Frame	Prompt
Estimation	“I rounded ____ to ____, so my estimate is ____.”
Worked Example	1) Remove decimal → multiply as whole numbers → ____ 2) Count decimal places: ____ 3) Place decimal → answer: ____ 4) Check with estimation: ____

Resources to Prepare: Mini-whiteboards, price cards, laminated place-value grids, pupil worksheet copies.

Done! I’ve laid the entire lesson and both the student worksheet and teacher answer key into clear tables on the canvas—ready to print or paste into Word/Google Docs.

Want me to:

- tailor this for a specific year group or route?

- add literacy/SEMH supports for a particular class?
- turn it into a 3-lesson mini-sequence or a homework pack?
- export as a Word/Google Doc?

ChatGPT can make mistakes. Check important info. See [Cookie Preferences](#).

ChatGPT says: Done! I've laid the entire lesson and both the student worksheet and teacher answer key into clear tables on the canvas—ready to print or paste into Word/Google Docs. Want me to: - tailor this for a specific year group or route? - add literacy/SEMH supports for a particular class? - turn it into a 3-lesson mini-sequence or a homework pack? - export as a Word/Google Doc?
