I want this resource adapted for an Year 8 EAL Boy. Reading and spelling age of 6 years old. Please make this accessible for him with enough work to learn the right words and be a part of the lesson.

Taught AI Academy - Resource Generator said:

Thought for 19s

Just checking—have you read the Taught AI Academy Acceptable AI Use Policy and confirm that you will not include any personal names or identifying data about students, families, or staff?

Please type “Y” to confirm before we continue.

Y

Taught AI Academy - Resource Generator said:

Thought for 27s

Great—thanks for confirming. I’ll adapt your uploaded “History of Chocolate” comprehension for a Year 8 EAL learner with a reading/spelling age of ~6, so he can access the lesson, learn key words, and participate confidently.

Before we dive in, a few quick planning questions (you can answer now or later and I’ll refine):

- What subject focus do you want (English/History/Geography cross-curricular)?
- Any known interests (football, gaming, art, cooking) I can hook into?
- Any barriers I should plan for (attention, low confidence, recent arrival, trauma indicators)?
- Do you want this as one core worksheet adapted into three versions (visual/support, core, stretch)?

Meanwhile, here's a ready-to-use, differentiated resource set for today's lesson.

LESSON TITLE

The History of Chocolate – key words, simple reading, and class participation

LEARNING OBJECTIVE

- I can learn and use 8–12 key words about chocolate history.
- I can find simple facts in a short text and show what I understand.
- I can join in pair talk using sentence frames.

WHY THIS APPROACH

- Pre-teaching vocabulary and using visuals supports EAL access and confidence in subject language. This is recommended by the Bell Foundation: teach key words with pictures, model language, and use bilingual support where possible.
- Chunked, predictable tasks with lots of modelling align with Rosenshine's principles (small steps, model, guide practice, check understanding).
- Trauma-informed tweaks (clear routines, choice, low-stakes responses, visual organisers) reduce overload and support regulation.
- Targeted vocabulary and morphology (e.g., cacao/cocoa) align with EEF literacy guidance for secondary.

CORE TEXT SOURCE (simplified and supported)

Based on your uploaded "History of Chocolate" comprehension (Twinkl). Key facts include: first cacao growers (Olmecs), Mayans/Aztecs' uses, Columbus and Cortés, first chocolate house in London, first bar c.1830, and key ingredients.

ENGAGEMENT HOOK (2–3 minutes)

Show a small selection of chocolate wrappers or images on screen. Ask:

- "What is this?" (Chocolate)
- "Where do you think chocolate comes from?"

Accept one-word or pointing responses; model full sentences: “Chocolate comes from cacao beans.” (Teacher models, pupils repeat.)

KEY VOCABULARY (teach-before-reading: 8–12 words)

chocolate, cacao bean, cocoa butter, sugar, milk powder, hot chocolate, money, Spain, London, bar, Aztec, Maya

Fast routine (5–7 minutes):

1. Say it + Show it: teacher shows picture + says word, students repeat 2x (choral, then pair). Bell Foundation recommends visuals and modelling for classroom language and key words.
 2. Match it: students match picture to word on mini-cards.
 3. Use it: sentence frames on board:
 - “This is a ____.”
 - “The Aztecs used ____ as money.”
 - “The first chocolate bar was in ____.”(Teacher models first; paired practice.)
-

DIFFERENTIATED TASKS (three versions)

All tasks use the same page numbers from the source to keep the learner in the same lesson as peers.

A) VISUAL/SUPPORT (most scaffolded)

- Mini-picture glossary (images + simple definitions) for the 12 key words.
- Reading: teacher or peer reads a short, simplified paragraph (2–3 sentences at a time) taken from the uploaded text. Learner tracks with finger; stop after each chunk for a yes/no or either/or question. Trauma-informed: chunked instruction; predictable sequence.
- Word Work 1 – Sound it out:
 - cacao, cocoa, chocolate (underline ch, co, ca patterns) – quick say-and-trace. EEF recommends explicit vocabulary routines and multiple encounters.
- Match and Stick: match word → picture → simple definition (cut-and-stick).

- Yes/No/Copy Answers (from the source facts):
 - “The Olmecs grew cacao first.” (Yes)
 - “The first chocolate house was in Paris.” (No)
 - “Write: 4 ingredients: _____.” (Copy from word bank: beans, butter, sugar, milk powder.)
- Talk Frame (pair):
 - “I learned the word _____.”
 - “Chocolate was a _____ in Aztec times.” (money)

B) CORE (some scaffold)

- Reading: short adapted text (90–120 words) using sentences from the source with simplified syntax.
- Cloze with word bank (10 words): chocolate, cacao, Maya, Aztec, Spain, London, bar, sugar, money, beans.
- Retrieval Questions (tick, copy-one-word, underline evidence):
 1. Who grew cacao first? (Olmecs)
 2. The Aztecs used cacao seeds as _____. (money)
 3. Where was the first chocolate house opened? (London)
 4. When was the first real chocolate bar made? (1830)
 5. Circle the ingredients: cocoa beans, cocoa butter, sugar, milk powder.
 - Talk and Write Frames:
 - “First, the _____ grew cacao.”
 - “Later, the _____ used cacao for _____.”
 - “The first chocolate bar was in _____.”

C) STRETCH/CHALLENGE (lighter scaffold; still accessible)

- Short text paragraph (from source) with 4 key words blanked; use context to fill.
- Sequencing strip: Put these in order: Olmecs → Maya → Aztecs → Columbus (1502) → Cortés (1519) → first chocolate house in London (1657) → first bar (1830).
- Morphology mini: cacao → cocoa; chocolate (ch makes /ch/); “mass-produce/mass production” (find and copy the term used for producing large quantities = mass-producing/mass production). EEF recommends morphology/etymology to deepen word knowledge.

- Short sentence writing: “In 1830, people made the first chocolate bar.” Provide checklist (Capital letter, finger spaces, full stop).
-

SENTENCE FRAMES & SPEAKING SUPPORT (for all groups)

- “I think the answer is ____ because ____.”
- “The first chocolate house was in ____.”
- “Aztecs used ____ as ____.”

(Teacher models, then students practise in pairs. Open prompts encourage extended talk for EAL learners.)

INCLUSION & TRAUMA-INFORMED STRATEGIES (build into delivery)

- Predictable routine on board: “1 Vocab → 2 Read → 3 Word Work → 4 Questions → 5 Share.”
 - Offer choices to reduce threat: “Write or point,” “speak or circle,” “pair or adult.” Choices and predictability support regulation.
 - Chunk tasks; pause often; use visual organisers (glossary, sequencing).
 - Warm feedback and recasts: if the learner says “Aztec money,” teacher models “Yes—The Aztecs used cacao as money.” Bell Foundation recommends positive response and recasting.
-

ASSESSMENT & PARTICIPATION

Quick wins (low-stakes):

- Can he match 8/12 words to pictures?
- Can he point to where the answer is in the text?
- Can he say one complete frame aloud with a partner?

EEF emphasises building self-efficacy via scaffolded tasks and explicit strategy use.

Progress notes (TA/teacher):

- Vocabulary known (tick list of 12).

- Reading behaviours: tracks text, answers yes/no, copies key word.
- Speaking frames used independently?

These align with secondary literacy guidance to provide targeted vocabulary instruction and scaffolded reading strategies.

HOME/SUPPORT EXTENSION (optional)

- Send home visual flashcards of the 12 words; encourage matching games.
 - Suggest subtitles on TV in English to increase exposure to print and audio.
-

READY-TO-PRINT PAGES (you can copy into Word/Docs now)

Page 1 – Picture Glossary (12 boxes: image + word + simple definition)

- chocolate • cacao bean • cocoa butter • sugar • milk powder • hot chocolate • money • Spain • London • bar • Aztec • Maya

Page 2 – Reading (Support version)

- Two short chunks (3–4 lines each) adapted from the source. After each chunk: one yes/no question (with picture cues).

Page 3 – Word Work

- Trace and say: chocolate, cacao, cocoa
- Match: word → picture → definition (cut and stick)
- Cloze (with word bank) for Core/Stretch

Page 4 – Questions

- Mixed formats: tick, copy-one-word, circle, find-and-copy “mass-producing” (or “mass production”) from the text.

Page 5 – Sequencing Strips (for Stretch)

- Timeline cards to cut and order: Olmecs → Maya → Aztecs → Columbus (1502) → Cortés (1519) → London (1657) → 1830 bar.

Page 6 – Talk Frames

- Large sentence frames with icons; traffic-light self-check (green = I can say it; amber = with help; red = not yet).
-

HOW THIS LINKS TO THE SHARED CLASS TEXT

All facts, dates, and ingredients match the class resource, so the learner can contribute to whole-class Q&A (e.g., “Where was the first chocolate house?” → “London”).

EXPORT OPTIONS

I can provide this as:

- Word (editable)
 - Google Doc (shareable)
 - PDF (print-ready)
-

NEXT STEPS

- Do you want this adapted further (e.g., add bilingual glossary or audio QR)?
- Shall we build a half-term sequence that grows vocab and sentence complexity each week?
- Would you like a small resource bank for Humanities/English pathways?

Would you like me to expand on any part of this?

You said:

He likes food and sweets and football. HAS ADHD but manages pretty well. Will need short activities to stay on track.

Taught AI Academy - Resource Generator said:

Brilliant—thanks. I’ll tailor the “History of Chocolate” resource to his interests (food, sweets, football) and pace it in short, focused bursts that work well for ADHD. Below is a ready-to-use, printable set you can copy straight into Word/Docs. No personal data included.

TITLE

Chocolate, Food & Football – Reading, Words and Talk

LEARNING OBJECTIVE

- Learn and use 8–12 key words about chocolate history
- Find simple facts in a short text
- Join in with partner talk using sentence frames

PLAN AT A GLANCE (short bursts, predictable routine)

1 Vocab with pictures (4–5 minutes)

2 Read a tiny chunk (2–3 minutes)

3 Do a quick task (3–5 minutes)

4 Share with partner (1–2 minutes)

Repeat the cycle 2–3 times. Use a visible two-minute timer and a “Next Step” card to signal transitions.

ENGAGEMENT HOOK (2 minutes)

Show 3 images: a chocolate bar, hot chocolate at a stadium, a footballer’s half-time snack. Ask:

- “What do you see?”
- “Which is your favourite?”

Model: “I like hot chocolate.”

KEY WORDS (teach-before-reading)

chocolate, cacao bean, cocoa butter, sugar, milk powder, hot chocolate, money, Spain, London, bar, Aztec, Maya

FAST VOCAB ROUTINE (5–7 minutes)

- Say & show: you say each word with a picture, he repeats twice
- Match: picture to word (mini-cards)
- Use: sentence frames on board

- “This is a _____.”
- “The Aztecs used _____ as money.”
- “The first chocolate bar was in _____.”

DIFFERENTIATED TASKS

A) VISUAL/SUPPORT (most scaffolded)

Reading (teacher/peer reads aloud; he tracks text):

- Chunk 1 (3 lines): “Chocolate comes from the cacao bean. Long ago, the Maya and Aztec people used cacao. The Aztecs even used the beans as money.”

Yes/No: “Aztecs used beans as money.” (Yes)

- Chunk 2 (3–4 lines): “Chocolate reached Spain and then London. People opened a chocolate house in London. Later, in 1830, the first chocolate bar was made.”

Either/Or: “First bar made in 1830 or 1930?” (1830)

Word Work 1 (3–4 minutes):

- Trace and say: chocolate • cacao • cocoa
- Circle the first sound: ch / ca / co
- Match-and-stick: picture → word → short definition

Participation Talk (1–2 minutes):

- “I learned the word _____.”
- “Chocolate was _____ for the Aztecs.” (money)

B) CORE (some scaffold)

Short adapted text (about 90–110 words, same facts as the class text):

- The Maya and Aztecs used cacao beans. Aztecs used them as money. Chocolate later reached Spain and London. In 1657, a chocolate house opened in London. In 1830, people made the first chocolate bar.

Cloze with word bank (10 words):

chocolate, cacao, Maya, Aztec, Spain, London, bar, sugar, money, beans

Retrieval (tick/copy/underline):

- 1 Who used cacao first? (Maya/Aztec)
- 2 Aztecs used cacao as _____. (money)
- 3 Where did a chocolate house open? (London)
- 4 When was the first chocolate bar? (1830)
- 5 Circle the ingredients: cocoa beans, cocoa butter, sugar, milk powder

Talk & Write Frames:

- “First, the _____ used cacao.”
- “Later, people in _____ drank chocolate.”
- “The first chocolate bar was in _____.”

C) STRETCH/CHALLENGE (lighter scaffold)

Context cloze (4 blanks):

“The _____ and _____ used cacao beans. Chocolate reached _____ and then _____. The first chocolate bar was made in 1830.”

Sequencing strips (order): Olmecs → Maya → Aztecs → Columbus (1502) → Cortés (1519) → London chocolate house (1657) → first bar (1830)

Morphology mini: cacao → cocoa; chocolate (ch = /ch/). “mass-produce” vs “mass production” (spot in text if included)

FOOTBALL-THEMED MINI-TASKS (sprinkle between chunks)

1. Stadium Snack Sort (3 minutes)
 - Sort picture cards: “half-time snack” vs “history word”
 - Say one sentence: “Hot chocolate is a snack.” / “Aztec is a history word.”
2. Match the Kit Numbers (2 minutes)
 - 1657 → “London chocolate house”
 - 1830 → “first chocolate bar”

He holds up the number card when you say the fact.
3. Player Interview (2–3 minutes, pair)
 - Partner asks: “Where was the first chocolate house?”
 - He answers with frame: “It was in _____.”

SPELLING & PHONICS (quick, repeatable)

- Tap-and-say syllables: cho-co-late (3), ca-ca-o (2), co-co-a (3)
- On mini whiteboard: write “ch” three times; build: ch+ocolate → chocolate
- Swap first sound: m-oney (say it), write the m in money

ADHD-FRIENDLY DELIVERY (built-in supports)

- Short cycles with a visible timer; clear “Now/Next” on the board
- Give choice: point/circle/say/write to show understanding
- Movement breaks: “Stand if the answer is ‘London’”
- Concrete goal: “Collect 4 word-matches = green tick”
- Immediate, warm feedback: “You matched 3 words—great focus. Next: read one line.”

SENTENCE FRAMES (display throughout)

- “I think it is _____ because _____.”
- “The first bar was in _____.”
- “Aztecs used _____ as _____.”

ASSESSMENT (low-stakes, quick ticks)

- Can he match 8/12 words to pictures?
- Can he find and point to one answer in the text?
- Can he say one full sentence frame?
- Can he place 1657 and 1830 correctly?

READY-TO-PRINT PAGES

Page 1: Picture Glossary (12 boxes)

chocolate • cacao bean • cocoa butter • sugar • milk powder • hot chocolate • money

• Spain • London • bar • Aztec • Maya

(Each box: image, word, child-friendly definition, trace line)

Page 2: Short Reading (Support version)

Two 3–4 line chunks + one Yes/No or Either/Or under each

Page 3: Word Work

Trace-and-say, sound circles (ch / ca / co), match-and-stick picture→word→definition

Page 4: Core Cloze + Retrieval

Cloze (10-word bank) + 5 mixed-format questions

Page 5: Sequencing Strips & Key Dates

Cut-out timeline cards; bold the years 1657 and 1830

Page 6: Talk Frames & Self-Check

Large sentence frames with icons; traffic-light self-check (green/amber/red)

IN-CLASS INTEGRATION WITH THE MAIN RESOURCE

Keep the same facts and dates as the class sheet so he can join whole-class Q&A.

Use the same page order so he stays with the group. Source to align with:

/mnt/data/history-of-chocolate-comprehension_ver_5.pdf

EXPORT OPTIONS

I can provide this as Word, Google Doc, or PDF—just say which you prefer.

NEXT STEPS

- Want me to add a bilingual mini-glossary or QR audio for the key words?
- Shall I build a half-term mini-sequence (chocolate → spices → tea/coffee → sugar trade) with the same routine?
- Do these tasks feel the right length for him?

Would you like me to expand on any part of this?

Taught AI Academy - Resource Generator said:

Thought for 25s

Brilliant — thanks for confirming.

I've dropped a ready-to-print extension worksheet into the canvas titled "Year 7 Human Body – Extension Worksheet (15–20 minutes)". It's trauma-informed, clearly chunked, and gives your high-attainer meaningful stretch without needing extra resources. It includes three tasks (interconnected systems writing, a mini data investigation, and a movement diagram) plus self-check criteria and a short answer guide.

A couple of quick checks so I can fine-tune it (and adapt for others if useful):

- What subject/topic focus do you want today (e.g., general body systems,

movement & muscles, digestion)?

- Any barriers to consider (e.g., attention span, dyslexia overlays, anxiety triggers)?
- Do you want versions for Visual/Support and Core too, or is this one high-challenge sheet enough for today?
- Preferred export format: Word, Google Doc, or PDF?
- Would you like me to align the next set of extensions to your class's interests (music, gaming, football, fashion, beauty, etc.)?

If you're happy, I can also spin this into a small bank of quick "early-finisher" sheets for the unit.

Put into tables please

Taught AI Academy - Resource Generator said:

Year 7 Human Body – Extension Worksheet (15–20 Min)

TITLE: Human Body Systems – Challenge Extension (15–20 minutes)

Overview

Section	Details
Purpose	Deepen understanding of how organs and systems work together; use scientific vocabulary; explain reasoning in full sentences.
Safety & Wellbeing	Student chooses task order; allow short brain/eye break between tasks; quiet paired talk allowed but independent written answers.
Equipment	Pen/pencil, highlighter, ruler; use your completed body chart.

Success Criteria (self-check)

By the end I can...	T i c k
---------------------	------------------

Name organs and the system they belong to	☐
Explain how two or more systems work together	☐
Interpret simple data and justify conclusions	☐
Use key terms correctly (e.g., diaphragm, alveoli, tendons, arteries)	☐

Key Vocabulary

Terms	Terms
diaphragm	trachea
bronchi	alveoli
heart	arteries
veins	capillaries
stomach	small intestine
large intestine	skeleton
joint	tendon
ligament	biceps
triceps	quadriceps
hamstrings	spinal cord
neurons	

Task A – Interconnected Systems (choose ONE scenario)

Item	Details
------	---------

Timing	6–8 minutes
Output	6–8 lines explaining how systems interact; underline at least four key terms.
Scenario 1	Jogging up the stairs for the bus
Prompts (S1)	respiratory (diaphragm, lungs, alveoli) → circulatory (heart rate, arteries, oxygen delivery) → muscular (quadriceps/hamstrings contracting) → skeletal (knee joint) → nervous (balance, signals)
Scenario 2	Eating a chicken wrap at lunch
Prompts (S2)	digestive (stomach acid, small intestine, absorption) → circulatory (nutrients to cells) → muscular (peristalsis, jaw muscles) → nervous (saliva triggered by smell)
Sentences starters	“When I..., my ... system first... This causes... As a result, the ... system... Finally, ... so that ...”

Task B – Mini Data Investigation

Item	Details
Timing	5–7 minutes
Data	Pupil X (resting → after 1 minute star jumps)
Heart rate (bpm)	72 → 120

Breathing rate (breaths/min)	14 → 28
Q1	Calculate the increase for both measurements.
Q2	Explain why these changes help the muscles during exercise (use oxygen and carbon dioxide).
Challenge	What might happen to performance if the alveoli were damaged? Give one reason.

Task C – Movement Snapshot (diagram + labels)

Item	Details
Timing	6–8 minutes
Action	Sketch a simple stick figure doing a plank or a squat.
Labels (must include)	one major joint + movement (e.g., knee – flexion/extension); two muscles as an antagonistic pair (e.g., quadriceps/hamstrings); one role of the core (stability, posture).
Challenge	Add one injury-prevention tip a sports coach would give.

Choose Your Path

Complete	Notes
Task A + one of B or C	If you finish early, complete all three tasks.

Stretch Extension (early finisher)

Prompt	Key terms to include
--------	-------------------------

Write a short paragraph: "How the circulatory and respiratory systems maintain homeostasis during rest and exercise."

capillaries, gas
exchange,
heart rate

Reflection (2 minutes)

Question

My
notes

What new link between systems did I explain today?

Which key terms did I use accurately?

Support Prompts (use only if needed) | Word bank | oxygen, nutrients, energy, waste, contraction, absorption | | Sentence frames | "The ... system helps the ... system by ..." • "This increases ... so that ..." |

Teacher Notes (answers/guidance)

Task	Guidance
------	----------

A – Scenario 1	diaphragm contracts → lungs expand → air to alveoli → O ₂ diffuses to blood → heart rate increases → arteries deliver O ₂ to leg muscles → quadriceps/hamstrings move knee joint; nervous system maintains balance and pace.
-------------------	--

A – Scenario 2	chewing + saliva start digestion → stomach acid breaks down protein → small intestine absorbs nutrients into bloodstream → circulated to cells; nervous system controls peristalsis and swallowing.
-------------------	---

B – Calculations	Heart rate increase: +48 bpm; breathing rate increase: +14 breaths/min.
---------------------	---

B – Expla natio n	More O2 delivered and CO2 removed; supports aerobic respiration and sustained energy release.
B – Chall enge	Damaged alveoli = reduced surface area for gas exchange → less O2 uptake → earlier fatigue/lower performance.
C – Plank	Shoulder/spine stabilisation; core prevents sagging; antagonistic control (rectus abdominis vs erector spinae).
C – Squat	Hip and knee flexion/extension; quadriceps vs hamstrings/gluteus maximus; coaching cue: knees track over toes; neutral spine.

Accessibility & Inclusion

Option	Detail
Output formats	Bullet points, full sentences, or voice note then transcribe.
Scaffold	Visual scaffold available on request: partial diagram and word bank.
Support	Clear timings and student choice to reduce stress and support focus.

Year 9 Ratio Worksheet – Manchester United Theme (trauma-informed, Differentiated)

TITLE: Ratios with Manchester United – Year 9

Purpose • Practise simplifying ratios, sharing amounts, and using ratios in real contexts – all through Manchester United examples • Designed for a pupil who is not keen on maths but is motivated by football

How to Use • Work through the “Visual/Support” section first if you need a warm-up • Then try “Core Tasks” • Challenge yourself with “Stretch/Challenge” if you finish early • Use the “Helpful Hints” and “Worked Example” boxes – no trick questions

Safe Start & Regulation • You choose the order of questions. Short breaks are OK between tasks • If a task feels frustrating, pause and try a different one

Equipment • Pen/pencil, ruler, highlighter, calculator allowed

Key Words • Ratio, Simplify, Share/Divide, Parts, Total, Percentage, Fraction

VISUAL/SUPPORT (Entry Level–Foundation)

1. Kit Colours – Blocks The number of red blocks to black blocks in a United scarf pattern is 8 : 4. (a) Draw 8 red squares and 4 black squares. (b) Simplify the ratio 8 : 4.
 2. Training Cones – Bar Model A coach sets out cones in the ratio attackers : defenders = 3 : 2. There are 15 attackers. (a) How many defenders? (b) How many players altogether?
 3. Ticket Snacks – Pictorial Sharing United fans buy snacks in the ratio crisps : drinks : pies = 2 : 3 : 1. There are 18 items in total. Use a bar model or equal groups to find how many of each. Crisps _____ Drinks _____ Pies _____
 4. Substitutes Minutes – Number Line Two subs share 70 minutes in the ratio 2 : 5. Mark a number line into 7 equal parts. (a) First sub gets _____ minutes (b) Second sub gets _____ minutes
-

CORE TASKS (Foundation–Secure)

5. Simplify the Ratios (a) Home : Away shirts sold = 25 : 35 → _____ (b) Goals : Assists = 18 : 45 → _____ (c) Training minutes : Rest minutes = 300 : 25 → _____
6. Split the Budget The club shop invests £700 across three ranges in the ratio Retro : Home : Training = 5 : 3 : 2. How much goes to each range? Retro £ _____ Home £ _____ Training £ _____
7. Match Ball Share Two academies share 30 new match balls in the ratio 3 : 2. How many balls does the second academy receive? _____
8. Fitness Equipment A gym has 60 items. The ratio “cardio” to “strength” is 4 : 1. How many cardio items? _____
9. Fan Poll 1500 fans choose a red scarf, 9000 choose a black hat. Write the ratio scarf : hat in simplest form. _____

10. Pitch Time A 240-minute training block is split for drills in the ratio 1 : 2 : 5 (warm-up : skills : match play). How long is match play?
_____ minutes
 11. Kit Stock In the megastore, red : white : third shirts = 24 : 16 : 8. (a) Write the simplified ratio red : white : third. _____ : _____ : _____ (b) If white : third is 2 : 1 and there are 14 white shirts, how many third shirts? _____
 12. Prize Share Two players split a charity bonus in the ratio 2 : 3. The second player receives £240. (a) How much does the first player receive? £ _____ (b) How much was the total bonus? £ _____
 13. Split the Takings Divide £945 between coaching and community projects in the ratio 2 : 5. Coaching £ _____ Community £ _____
 14. Crowd Tickets At an Old Trafford friendly, children : adults = 2 : 3. There are 80 children. Adult tickets cost £8. Child tickets are a quarter of the adult price. Work out the total money from ticket sales. £ _____
 15. Appearance Bonus Two squad members share a payment in ratio 2 : 3. The second receives £25 more than the first. How much does each receive? First £ _____ Second £ _____
 16. Squad Ratio The ratio of defenders to other players is 4 : 5. If there are 220 defenders, how many players in the full squad? _____
 17. Fractions & Percentages from Ratios In a training group, keepers : outfield = 2 : 3. (a) What fraction are keepers? _____ (b) What percentage are outfield? _____ %
 18. Set-Piece Angles Angles in a free-kick tactic are in the ratio 1 : 2 : 9. What is the largest angle? _____ °
 19. Analyst Angles Three camera angles are in the ratio 2 : 3 : 5. The smallest is 50°. Find the other two angles. _____ ° and _____ °
 20. Academy Places Four partner schools send players to a talent day. One school sends both U14 and U15 players in the ratio 1 : 3. It sends 21 U15 players. The other 3 schools send the same number of players each. Work out the total number of players at the talent day. _____
-

STRETCH/CHALLENGE (Secure–Deep)

21. Combined Ratios – Merch Mix Sales one day: home : away = 7 : 5. Next day: home : third = 3 : 2. If 140 home shirts sell across both days combined and each ratio scales consistently within its day, find possible away and third sales that fit both days. Show reasoning.
22. Reverse Ratio – Sports Science Protein : carbs in a recovery shake is 3 : 5. A nutritionist says protein should be 24g. (a) What is the total

- shake mass? (assume protein+carbs only) _____ g (b) If carbs increase by 20%, what is the new ratio protein : carbs, simplified?
23. Ratio to Fraction to Percentage – Scouting For a short-list with defenders : midfielders : forwards = 5 : 4 : 3 and 48 players in total: (a) How many midfielders? (b) What fraction and percentage are forwards? (c) If $\frac{1}{4}$ of defenders are left-footed, how many left-footed defenders?
24. Multi-Step – Academy Bursary Two bursaries are awarded to squads A and B in the ratio 4 : 7. Squad B gives $\frac{3}{11}$ of its share to community projects. If the total bursary is £3025, how much money does Squad B keep? Show full working.
-

WORKED EXAMPLE (Bar Model) Question: Two physios share 70 minutes in the ratio 2 : 5. How many minutes each? • Step 1: Total parts = $2 + 5 = 7$ • Step 2: One part = $70 \div 7 = 10$ minutes • Step 3: First physio = 2 parts = 20 minutes; Second = 5 parts = 50 minutes Answer: 20 minutes and 50 minutes

HELPFUL HINTS • Simplify by dividing both numbers by the same number (common factor) • For sharing, find the total number of 'parts' first, then one part = $\text{total} \div \text{parts}$ • Convert ratio $\rightarrow$ fraction by $\text{parts} / \text{total}$; percentage = $\text{fraction} \times 100$ • Use a bar model when stuck

SUCCESS CRITERIA (Choose your level) • Visual/Support: I can match pictures/bars to simple ratios and share amounts with help • Core: I can simplify ratios, share in a given ratio, and solve 2–3 step word problems • Stretch: I can link ratios to fractions/percentages and solve multi-step, reverse and combined ratio problems

ADAPTATIONS & SCAFFOLDS • EAL: Provide word bank with icons (share, total, part, simplify). Pair talk before writing answers •

SEMH/Trauma-Informed: Offer choices, chunk tasks, praise effort, allow movement breaks, avoid time pressure • Literacy: Read questions aloud; highlight numbers and ratio symbols first; use worked examples

EXIT CHECK (Low Stakes)

1. Simplify 12 : 18
 2. Share 90 in the ratio 1 : 2
 3. In ratio 2 : 3, what fraction is the first part?
-

TEACHER NOTES • This worksheet adapts standard ratio items into a Manchester United context to increase relevance and motivation • Use mini-whiteboards for the Visual/Support section; model bar methods; interleave short retrieval prompts in future lessons

Brilliant — thanks for confirming. I'll tailor the uploaded ratio worksheet to a Manchester United theme and keep it trauma-informed and differentiated. I've put a ready-to-print version in the canvas on the right.

Before we lock it in, a few quick setup questions (answer what you can):

- What subject/topic focus do you want beyond ratios (if any)?
- Do you want to upload any existing resources to adapt further?
- What's the learner's current level (e.g., Entry Level 3, GCSE Foundation)?
- Any known barriers (e.g., attention, dyslexia, EAL, SEMH/trauma triggers) I should design around?
- Do you want multiple versions (visual/support, core, stretch) — I've included all three today. Keep all, or prefer a single version?

Why this build:

- I've remixed the questions from your uploaded ratio worksheet into a Man United context (e.g., sharing equipment, ticket pricing, kit ratios), preserving

the maths progression and structures you'd expect in exam-style questions while adding a football hook .

- The structure and scaffolds align with EEF guidance on worked examples, visual representations/bar models, and low-stakes checks to support memory and reduce cognitive load .

Export options:

- I can provide this as Word, Google Doc, or PDF — which format do you prefer?

Do you want me to:

- Add a one-page answer sheet?
- Include a quick retrieval starter (3 questions) for next lesson?
- Swap any Man United contexts (e.g., merch → training stats) to match his interests even more?

Would you like me to expand on any part of this?

Thought for 26s

Year 9 Ratio Worksheet – Manchester United Theme (eal Spanish Support)

TITLE: Ratios con Manchester United – Year 9 (EAL Español)

Propósito / Purpose • Practicar razones (ratios): simplificar, compartir cantidades y usar razones en contextos reales de Manchester United •

Apoyos EAL para hispanohablantes: vocabulario bilingüe, frases modelo, imágenes/bar models

Lenguajes del Aprendizaje / Language Objectives • Comprender y usar palabras clave de razones en inglés con apoyo en español • Explicar pasos usando oraciones modelo (sentence frames)

Cómo usar / How to use • Empieza con “Visual/Apoyo”, luego “Núcleo/Core”, después “Reto/Challenge” si te sientes listo • Puedes elegir el orden; toma mini-pausas si lo necesitas

Equipo / Equipment • Lápiz/bolígrafo, regla, rotulador. Calculadora permitida

Palabras clave (Key Words) • ratio (razón) • simplify (simplificar) • share (repartir) • parts (partes) • total (total) • fraction (fracción) • percentage (porcentaje) • bar model (modelo de barras)

Marcos de Oración / Sentence Frames • The ratio is $__ : __$ because $______$.
(La razón es $__ : __$ porque $______$.) • Total parts = $__$. One part = $__ \div __ = __$.
(Partes totales = $__$. Una parte = $__ \div __ = __$.) • I will share $__$ in the ratio $__ : __ \rightarrow __$ and $__$. (Reparto $__$ en razón $__ : __ \rightarrow __$ y $__$.) • Simplify by dividing by $__$. (Simplifico dividiendo entre $__$.)

VISUAL / APOYO (Entry–Foundation)

1. Colores del kit / Scarf Blocks La bufanda tiene rojo : negro = 8 : 4. (a) Dibuja 8 cuadrados rojos y 4 negros. (b) Simplifica 8 : 4 $\rightarrow$ $______$
2. Conos de entrenamiento / Bar Model Delanteros : defensas = 3 : 2. Hay 15 delanteros. (a) ¿Cuántos defensas? $______$ (b) ¿Cuántos jugadores en total? $______$
3. Snacks en el estadio / Sharing Crisps : drinks : pies = 2 : 3 : 1. Hay 18 en total. Crisps $______$ Drinks $______$ Pies $______$
4. Minutos de suplentes / Number Line Dos suplentes comparten 70 min en razón 2 : 5. (a) Primer suplente $______$ min (b) Segundo $______$ min

Apoyo Visual / Visual Hints • Dibuja barras para cada parte. • Marca el total y divide en partes iguales.

NÚCLEO / CORE (Foundation–Secure)

5. Simplifica las razones / Simplify (a) Home : Away shirts = 25 : 35 $\rightarrow$ $______$ (b) Goals : Assists = 18 : 45 $\rightarrow$ $______$ (c) Training : Rest minutes = 300 : 25 $\rightarrow$ $______$
6. Presupuesto de la tienda / Split the Budget £700 en Retro : Home : Training = 5 : 3 : 2. Retro £ $______$ Home £ $______$ Training £ $______$
7. Balones del club / Match Balls Dos academias comparten 30 balones en 3 : 2. Segunda academia recibe $______$

8. Gimnasio / Fitness Equipment 60 ítems. Cardio : Strength = 4 : 1.
Cardio = _____
9. Encuesta de fans / Fan Poll 1500 eligen bufanda roja, 9000 gorro negro. Escribe scarf : hat en forma simple: _____
10. Tiempo de cancha / Pitch Time 240 min en 1 : 2 : 5 (calentamiento : habilidades : partido). Partido = _____ min
11. Stock de camisetas / Kit Stock Red : White : Third = 24 : 16 : 8. (a) Simplifica _____ : _____ : _____ (b) Si White : Third = 2 : 1 y hay 14 white, ¿third? _____
12. Bono solidario / Prize Share Dos jugadores comparten en 2 : 3. El segundo recibe £240. (a) Primero recibe £ _____ (b) Total £ _____
13. Reparto / Split the Takings Divide £945 en 2 : 5. Coaching £ _____ Community £ _____
14. Entradas / Crowd Tickets Niños : adultos = 2 : 3. Hay 80 niños. Adulto £8. Niño = 1/4 del precio adulto. Total recaudado £ _____
15. Bonus de apariciones / Appearance Bonus 2 : 3. El segundo recibe £25 más que el primero. Primero £ _____ Segundo £ _____
16. Proporción de defensas / Squad Ratio Defenders : otros = 4 : 5. Hay 220 defensas. Total jugadores = _____
17. De razón a fracción/porcentaje / Fractions & % Keepers : outfield = 2 : 3. (a) Fracción de keepers = _____ (b) % de outfield = _____ %
18. Ángulos de falta / Set-Piece Angles 1 : 2 : 9. El ángulo mayor = _____ °
19. Ángulos de análisis / Analyst Angles 2 : 3 : 5. El menor = 50°. Otros = _____ ° y _____ °
20. Plazas de academia / Academy Places Una escuela envía U14 : U15 = 1 : 3 y manda 21 U15. Otras 3 escuelas envían el mismo número cada una. Total jugadores = _____

RETO / STRETCH (Secure–Deep)

21. Razones combinadas / Merch Mix Día 1: home : away = 7 : 5. Día 2: home : third = 3 : 2. Si en total se venden 140 home, encuentra ventas posibles de away y third. Explica tu razonamiento.
22. Razón inversa / Sports Science Proteína : carbohidratos = 3 : 5. Proteína = 24 g. (a) Masa total = _____ g (b) Si carbohidratos ↑20%, nueva razón (simplificada) = _____
23. De razón a fracción y porcentaje / Scouting Def : Mid : For = 5 : 4 : 3, total 48. (a) ¿Midfielders? _____ (b) Fracción y % de For _____ ; _____ % (c) Si 1/4 de defensas son zurdos, ¿cuántos? _____

24. Beca de academia / Academy Bursary A : B = 4 : 7. B dona 3/11 de su parte. Total £3025. ¿Cuánto mantiene B? Muestra el proceso.

EJEMPLO RESUELTO / WORKED EXAMPLE (Modelo de barras) “Dos fisios comparten 70 min en 2 : 5. ¿Cuántos minutos cada uno?” • Partes totales = 2 + 5 = 7 • 1 parte = $70 \div 7 = 10$ min • Fisio 1 = 2 partes = 20 min; Fisio 2 = 5 partes = 50 min Respuesta: 20 min y 50 min

Pistas útiles / Helpful Hints • Divide ambas partes por el mismo número para simplificar • Para repartir: calcula partes totales $\rightarrow 1 \text{ parte} = \text{total} \div \text{partes}$ • Convierte razón $\rightarrow$ fracción: partes / total; porcentaje = fracción $\times 100$

BANCO DE VOCABULARIO / BILINGUAL WORD BANK • ratio = razón • simplify = simplificar • share/divide = repartir/dividir • parts = partes • total = total • equal parts = partes iguales • fraction = fracción • percentage = porcentaje • minutes = minutos • tickets = entradas • shirts = camisetas • fans = aficionados

Apoyos de lenguaje / Language Supports • Subraya números y símbolos : primero • Usa dibujos y modelos de barras antes de calcular • Lee las preguntas en voz alta con tu profesor/a

CRITERIOS DE ÉXITO / SUCCESS CRITERIA • Visual/Apoyo: relaciono dibujos con razones y reparto con guía • Núcleo: simplifico razones y resuelvo problemas de 2–3 pasos • Reto: conecto razones con fracciones/porcentajes y problemas inversos

NOTAS PARA DOCENTES / TEACHER NOTES (EAL & Trauma-Informed) •

Modela en voz alta y usa ejemplos resueltos; práctica guiada antes de independencia (Rosenshine) • Estructura predecible, opciones y pausas breves para autorregulación; evita presión de tiempo (trauma-informado) • Habla en “doble canal”: instrucción breve en inglés + glosa española entre paréntesis • Usa andamiajes visuales y vocabulario explícito; promueve conversación guiada en parejas antes de escribir

SALIDA RÁPIDA / EXIT CHECK

1. Simplifica $12 : 18 \rightarrow$ _____
2. Reparte 90 en $1 : 2 \rightarrow$ _____ y _____
3. En $2 : 3$, ¿qué fracción es la primera parte? $\rightarrow$ _____

Done — I’ve added a full EAL Spanish-support version in the canvas with bilingual vocabulary, sentence frames, and simplified prompts. It keeps everything Manchester United-themed and mirrors the ratio skills from your original worksheet . I’ve also built in predictable routines and short, chunked instructions consistent with trauma-informed practice and guided modelling (Rosenshine) to reduce cognitive load and boost success for EAL learners .

Quick tweaks I can make right now:

- Add picture icons beside each key word
- Create a one-page answer sheet (English only or bilingual)
- Turn the first section into a cut-and-stick bar-model activity
- Provide a Google Docs or Word version—what’s your preference?

Would you like me to swap any contexts (e.g., more training-stats, fewer merch questions) to match his favourite parts of Man United?
