Thought for 26s

Great — thanks!

Before I generate your scheme of work, a few quick setup details so I can tailor it spot-on:

1. Subject and topic: I have "Year 9 English – building confidence with paragraph writing." Is there a specific writing focus (e.g., narrative, descriptive, persuasive, response to text), or do you want a mix?
2. Level: Is this general KS3, or should I align to a particular framework (e.g., stepping-stones toward GCSE criteria)?
3. Duration: You've asked for 5 weeks. How many lessons per week and typical lesson length?
4. Setting: Mainstream, alternative provision, or SEND class?
5. Inclusion priorities: I'll prioritise low literacy and low engagement. Any additional needs to plan for (e.g., SEMH, ADHD, ASD, EAL, dyslexia)?
6. Optional add-ons to include (tick any that apply):
 - GCSE prep elements (mini-AO style success criteria)
 - Functional Skills practice tasks
 - Enrichment or careers-linked opportunities

- Embedded literacy (vocabulary, oracy) and/or numeracy (light-touch where authentic)

Once I have these, I'll produce a ready-to-teach 5-week SoW with

Intent–Implementation–Impact, weekly breakdowns, assessment, and inclusive strategies tailored to your group.

You said:

3. 4 per week. 4. PRU. 5. Low literacy. 5. none. 6. fs practice questions

Taught AI Academy SoW Writer said:

Thought for 18s

Year 9 English – 5-Week Scheme of Work

Focus: Building confidence with paragraph writing

Context: PRU (alternative provision); 4 lessons per week; low literacy and low engagement; include Functional Skills practice tasks

Unit Title and Overview

- Title: “Write It Strong: Secure, Clear Paragraphs for Real-World and GCSE Success”
- Overview: A tightly-sequenced unit that builds sentence control, structured paragraphs (Point–Evidence–Explain–So what?), and confident editing. Learners rehearse ideas orally, plan with visuals, and practise short, attainable writing bursts, leading to longer, purpose-driven paragraphs for Functional Skills contexts and pre-GCSE tasks.
- Frameworks: Intent–Implementation–Impact; PRU trauma-informed routines and relational practice (Taught AI Academy Policy).
- Evidence base informing design:
 - Disciplinary literacy, explicit vocabulary, structured talk, and targeted interventions improve outcomes in secondary literacy.
 - Metacognitive 7-step explicit strategy teaching, modelling, guided → independent practice, and structured reflection are effective, with strong impacts reported for writing.
 - Clarifying success criteria, eliciting evidence, and feedback that moves learning

forward.

– PRU policy: small groups, trauma-informed routines, restorative approaches, clear expectations.

Curriculum Intent

- Knowledge & skills:

- Sentence control (fragments/run-ons; conjunctions; accurate punctuation) → topic sentences → evidence and explanation → “So what?” impact line → cohesive devices and vocabulary.

- Writing for purpose/audience typical of Functional Skills (complaint email, information leaflet paragraph, viewpoint response).

- Metacognitive habits: plan–monitor–evaluate using checklists and self-assessment stems.

- PRU-aligned personal development: predictable routines, emotionally safe participation, clear classroom expectations, and restorative reflection. (Taught AI Academy Behaviour/Safeguarding).

- Outcomes by Week 5: learners produce independently a coherent, technically secure paragraph for a real-world FS context and a short pre-GCSE response, meeting agreed success criteria.

Implementation Plan (weekly overview)

Pedagogy thread every week: I do (live model) → We do (joint construction) → You do (scaffolded) → You do (independent), with success criteria co-constructed, live exemplars, retrieval starters, and exit tickets.

Week 1 – Sentences to Sense: foundations for paragraphs

- Lesson focuses:

1. Baseline & routines: quick writes; “golden rules” for paragraph success; sentence diagnostics (run-on vs. fragment).
2. Building blocks: conjunctions for clarity (because, however, therefore); micro-writes (2–3 sentences).

3. Topic sentences: what/why/how; sentence combining for fluency.
4. FS link: compose a clear topic sentence for a workplace email; exit ticket self-check.
 - Strategies/resources: mini-whiteboards, visual sentence stems, model + think-aloud, “two good things, one next step” feedback.

Week 2 – From Point to Proof: P–E–E basics

• Lesson focuses:

1. Model a P–E–E paragraph from a short stimulus (image/brief text).
2. Evidence types: quotation, detail, example; choosing precise evidence.
3. Explanation starters: “This shows...”, “This suggests...”, “This matters because...”.
4. FS link: information leaflet paragraph (health/safety) using P–E–E.
 - Strategies/resources: sentence frames, dual-coded planners, guided practice with highlight-and-label; structured talk protocols to rehearse before writing.

Week 3 – Make It Flow: cohesion, vocabulary, and revision

• Lesson focuses:

1. Cohesive devices (then/therefore/however/in addition; pronoun referencing).
2. Tier 2 vocabulary mini-lessons (select 6–8 words across unit; morphology/etymology).
3. Paragraph surgery: reorder, trim, strengthen topic and explanation lines.
4. FS link: viewpoint paragraph (agree/disagree) with target vocabulary.
 - Strategies/resources: vocabulary booklets; rapid “find-and-fix” drills; colour-code cohesion; peer conferencing with checklists.

Week 4 – Purposeful Paragraphs: audience and tone

• Lesson focuses:

1. Match tone to purpose (complaint, request, advise, inform).
2. Model and co-construct two contrasting paragraphs from one set of notes (formal vs. neutral).
3. Metacognitive review: plan–monitor–evaluate using 7-step prompts.
4. FS link (assessment rehearsal): timed single-paragraph response to a short scenario.
 - Strategies/resources: annotated exemplars at different levels; planning frames; success criteria co-created and displayed.

Week 5 – Write It Strong: independence & assessment

• Lesson focuses:

1. Retrieval & micro-lessons on common errors (CAPS: capitalisation, agreement, punctuation, spelling for meaning).
2. Independent paragraph for FS-style task (choice of scenarios); teacher live-feedback stations.
3. Edit for impact: add “So what?” sentence and precise vocabulary.
4. Showcase & pupil voice: reflective self-assessment and next-steps targets.
 - Strategies/resources: timed write; green-pen improvement; reflection sheet linked to success criteria and PRU rewards.

Lesson-to-Lesson Components (used throughout)

- Do Now (3–5 minutes): retrieval of sentence skills or cohesion.
- Teach & Model (8–12): live paragraph crafting with think-aloud.
- Guided Practice (10–12): joint construction; manipulatives (cut-and-assemble paragraphs).
- Independent Practice (15–20): short burst → extended paragraph.
- Feedback (in-flight): precise, actionable, limited to 1–2 targets; exemplify “what good looks like.”
- Exit Ticket (2–3): micro self-assessment against success criteria.

Impact & Assessment

- Formative (weekly):
 - Entry diagnostics (Week 1) and running records of common errors to inform grouping/intervention.
 - Exit tickets; “Plus/Next step” feedback; peer rehearsals using talk frames.
- Summative (Week 5):
 - Functional Skills style single-paragraph task (purpose/audience stated).
 - Teacher moderation using a simple rubric: clarity of topic sentence; appropriate evidence; explanation quality; cohesion; sentence accuracy and vocabulary.
- Pupil voice & engagement: “confidence thermometer” before/after; sentence-level goals; restorative reflection on learning habits (aligns with PRU policy).
- Implementation review (staff): use Assess–Plan–Do–Review cycle to adjust scaffolds and interventions for targeted pupils.

Inclusive Strategies & Support (low literacy, low engagement; PRU)

- Trauma-informed routines: predictable starts, visual agenda, calm corners, co-regulated breaks, and relational check-ins; restorative conversations post-incident. (Taught AI Academy Behaviour/Safeguarding).
- Small-step instruction and worked examples; gradually remove scaffolds (sentence frames → signposted prompts → independent).
- Structured talk to write: paired rehearsals, roles (Speaker/Coach), “Say it like a writer” stems; teacher-guided, curriculum-specific talk.
- Vocabulary access: explicit Tier 2 teaching, morphology/etymology mini-lessons; word banks on desks and in books.
- Metacognitive checklists: plan–monitor–evaluate prompts printed in books; self-questioning strips for drafting and editing.
- Feedback that moves learning: clarify success criteria, elicit evidence, then give concise, actionable feedback; pupils action it immediately (green-pen).
- Targeted support: brief, high-frequency sentence-combining drills and reading-into-writing activities for the weakest writers.
- Environment & expectations: display success criteria, model paragraphs, routines, and reward effort/progress (PRU rewards).

Resources (ready to prepare)

- Teacher models (one per week at two levels), sentence frames, vocabulary booklets (Tier 2 focus), paragraph planning templates (P–E–E–So what?), success-criteria rubrics, exit ticket slips, green-pen improvement sheets.
- FS practice scenarios: complaint/request email; informing leaflet paragraph; brief viewpoint response.

Safeguarding, Behaviour, and Compliance Notes

- All activities follow PRU expectations and trauma-informed guidance (predictability, routines, restorative). (Taught AI Academy Behaviour Policy, Safeguarding Protocols).

- Staff use the graduated approach (Assess–Plan–Do–Review) for learners needing additional adaptation or intervention.
- Aligned with Ofsted EIF “Quality of Education” intent–implementation–impact expectations (reference).

Functional Skills Integration (each week)

- Week 1: Write a clear topic sentence for a workplace email.
- Week 2: Information leaflet paragraph with accurate evidence and explanation.
- Week 3: Viewpoint paragraph with cohesion and Tier 2 vocabulary.
- Week 4: Timed single-paragraph response (audience and tone).
- Week 5: Summative FS-style task with rubric-based assessment and improvement time.

Monitoring & Staff Reflection

- Short weekly review: What scaffolds can be faded? Which pupils need precision teaching of sentence skills? What vocabulary requires re-teaching?
- Record adjustments and next steps in the Assess–Plan–Do–Review log (PRU SEND procedures).

Would you like to:

- Generate another scheme of work?
- Adapt this for a different learner group or level?
- Add more differentiation, support strategies, or challenge tasks?
- Incorporate additional focuses, such as digital literacy, oracy, or thematic enrichment?

Would you like me to expand on any part of this?

You said:

Plus summarise key parts into a table for me

Taught AI Academy SoW Writer said:

Thought for 7s

Here's a concise, staff-friendly summary of the scheme's key parts, plus a quick weekly snapshot.

Summary Table – Key Components

Section	Focus	Teacher Moves (high-impact)	Learner Outcomes	Assessment	Resources / Notes
Curriculum Intent	Build secure paragraph writing for low-literacy, low-engagement Y9 in PRU	Clarify purpose/audience; co-construct success criteria; explain impact; consistent trauma-informed routines	Write clear topic sentences; use evidence; apply cohesion; improve accuracy	Baseline (W1), ongoing exit tickets, final FS-style task (W5)	Success criteria poster; routines and restorative approach
Implementation (Pedagogy Spine)	I do → We do → You do (guided) → You do (independent)	Live modelling and think-aloud; joint construction; scaffolded frames; gradual release	Increased independence and fluency across 5 weeks	In-flight feedback; green-pen improvements	Model paragraphs at two levels; sentence frames; planners
Knowledge & Skills	Sentence control → Topic sentences → P-E-E-“So what?” → Cohesion → Tone	Mini-lessons; retrieval starters; vocabulary focus (Tier 2)	Accurate, cohesive paragraphs matched to task	Checks on accuracy, cohesion, vocabulary	Do Now retrievals; vocabulary booklets

Functional Skills Integration	Real-world paragraphs each week	Map tasks to scenarios (email, leaflet, viewpoint)	Transfer paragraph skills to FS-style prompts	Weekly mini-tasks; timed rehearsal (W4)	FS task bank; simple rubrics
Inclusion & Engagement	Predictable routines; relational practice; short bursts; success visible	Visual agenda; micro-writes; talk-before-write ; celebrate progress	Improved regulation, confidence, and participation	Confidence “thermometer”; pupil voice (W5)	Calm corner; timered tasks; visible progress trackers
Feedback & Metacognition	Small, actionable targets; plan–monitor–e valuate	“Two stars and a step”; checklists; self/peer review	Learners articulate what improved and why	Exit tickets; reflection sheets	Checklists in books; green pens
Safeguarding/ Behaviour	Trauma-informed, restorative	Clear expectations; planned breaks; de-escalation scripts	Safe engagement; re-entry to learning	Staff APDR notes	Align to site policy

Weekly Snapshot – What to Teach and Check

Week	Core Skill	Functional Skills Link	Must-Have Success Criteria	Quick Checks
1	Sentence control; topic sentences	Topic sentence for workplace email	Clear topic sentence; 2–3 correct sentences; basic punctuation	Do Now diagnostics; exit ticket: write 1 topic sentence
2	Point → Evidence →	Info leaflet paragraph (health/safety)	One clear point; relevant	Highlight-and-label P/E/E; mini self-check

	Explanation (P–E–E)		evidence/detail; “This shows...” explanation	
3	Cohesion and vocabulary	Viewpoint paragraph with Tier 2 words	Logical connectors; pronoun/reference clarity; 2 precise words	Colour-code cohesion; vocabulary usage tally
4	Audience, tone, and purpose	Timed single-paragraph response	Tone fits purpose; formal register where needed; accurate basics	Timed write; peer review against criteria
5	Independence and editing for impact	Summative FS-style paragraph	Meets all criteria + “So what?” impact line	Teacher rubric; green-pen improvements; pupil voice

Would you like me to:

- Add printable one-page rubrics and exit tickets?
- Provide model paragraphs at two levels for each week?
- Adapt this for a different group or add extra differentiation/challenge?

Half-Term Scheme of Work: Functional Skills Mathematics (Year 10) – SEMH (Alternative Provision)

Unit Title and Overview

Title: Number Sense to Everyday Problem-Solving (FS Maths Level 1 pathway with bridges to Level 2)

Duration: 6 weeks (half-term), 4–5 lessons per week (adapt to timetable)

Brief: Build fluency and confidence with whole numbers, decimals, fractions, percentages, ratio, and measures; apply to realistic contexts (money, time, data) with low-stress assessment for learning (AfL) and explicitly scaffolded steps. Mapped to Functional Skills Mathematics Level 1 content with extension signposts to Level 2 where appropriate.

Curriculum Intent

- Knowledge: Secure the underpinning number skills (four operations; equivalence between fractions/decimals/percentages; rounding/estimation; order of operations) and everyday measures, shape, and data handling needed for work and life.
- Skills: Apply maths to “straightforward” problems with two or more connected steps; interpret results and check reasonableness. Bridge to Level 2 “complex” contexts for the most ready.
- Dispositions: Reduce maths anxiety, develop persistence and logical thinking through trauma-informed routines, relational practice, predictable structures, and success experiences. (Taught AI Academy Behaviour Policy; Trauma-Informed whole-school approach.)
- Alignment: Coherent, well-sequenced small-steps instruction, explicit modelling, guided practice, frequent checks for understanding, and cumulative review. (Rosenshine principles; EEF maths guidance.)
- Inclusion: High-quality universal teaching first, with scaffolded access (worked examples, manipulatives/representations, visual prompts), plan–monitor–evaluate metacognitive cycle, and flexible support for dysregulation. (EEF Metacognition; EEF SEND; TAA SEND policy.)
- Compliance: Functional Skills subject content (DfE/Ofqual) and workplace relevance.

(References: Based on Ofsted EIF “Quality of Education” guidance; Taught AI Academy Behaviour, Safeguarding, and Inclusion policies—see citations above.)

Implementation Plan (Weekly Sequence, Pedagogy, Resources)

Teaching Approach Every Week

- Opening: Calm start routine; retrieval of last lesson/week (3–4 questions); agenda and success criteria on board; regulation check-in. (Rosenshine; TAA trauma-informed routines.)
- I–Do/We–Do/You–Do: Short explicit teaching in small steps with worked examples;

guided practice with teacher circulation and verbal scaffolds; independent practice with choice of mild/moderate/spicy challenge; exit check. (Rosenshine; EEF Maths.)

- Metacognition: Plan–Monitor–Evaluate prompts on tasks; “What strategy? Why? Did it work?” (EEF Metacognition.)
- Low-stress AfL: No-hands questioning, whiteboards, thumbs scale, hinge questions, minimal-marking codes, and feed-forward tasks; feedback specific, actionable, and sparing. (EEF Feedback.)
- Regulation & Safety: Predictable timings, opt-out/opt-in for demonstrations, quiet corner, de-escalation scripts, choice of tasks, and brief movement breaks. (Hanover trauma-responsive.)
- Representations: Number lines, bar models, ratio tables, and multilink/coins where helpful as temporary scaffolds. (EEF Maths examples.)

Weekly Outline (edit timings to your timetable)

Week 1 – Baseline, Place Value, Four Operations & Estimation

Content: Reading/writing large numbers; operations; $\times/\div$ by 10, 100, 1000; rounding to 10/100 and 1dp; sensible estimates. (L1 nos. 1–4, 3, 12, 2.)

Contexts: Stock counts, text/data usage, till totals.

Scaffolds: Place-value grids; worked examples; number line rounding. (EEF Metacognition—worked examples.)

AfL: Baseline check (untimed, multiple entry points), mini-whiteboard drills, exit question. (EEF Feedback.)

Extension (L2): Estimation strategies in multi-step bills.

Week 2 – Fractions & Decimals

Content: Compare/order common fractions & decimals; fraction of a quantity; add/subtract/multiply/divide decimals (2dp). (L1 nos. 8–11.)

Contexts: Recipes, discount splits, parts of shifts.

Representations: Number lines for equivalence; bar models for “fraction of”; manipulatives as temporary scaffold. (EEF Maths Boxes B/C.)

AfL: Hinge question on equivalence; self-check with model answers; peer “two stars + wish.”

Extension (L2): Compare mixed fractions/decimals in pay scenarios.

Week 3 – Percentages & Ratio/Proportion

Content: Read/write/compare %; find % of amounts; simple % increases/decreases ($\times$ of 5% at L1); simple ratio & direct proportion; unit pricing. (L1 nos. 13, 16; ratio/proportion.)

Contexts: Sales, tax, tips, recipe scaling, fuel efficiency.

Scaffolds: Ratio tables; percentage bars; step-by-step worked examples with gradual fade. (EEF Metacognition; Rosenshine scaffolds.)

AfL: Quick “estimate then calculate” routine; mini-quizzes with immediate whole-class feedback.

Extension (L2): General % change (any size), reverse percentage.

Week 4 – Measures, Money & Time; Perimeter, Area, Volume

Content: Unit conversions (same system); scales (maps/drawings); perimeter & area (rectangles/compound), volume of cubes/cuboids; money/time problems. (L1 nos. 14–22.)

Contexts: Room paint/carpets, packaging, shift rotas, travel times.

Representations: Grid sketches for area; cubes for volume; timeline bars for durations. (EEF Maths—representations used purposefully.)

AfL: Practical station checks (measure & estimate), gallery walk of solutions with checklists.

Extension (L2): Multi-unit problems linking scale, area, and costings.

Week 5 – Handling Information & Data; Averages & Range; Charts

Content: Represent discrete data (tables, bar/line/pie); read/interpret charts; mean & range; simple probability scale and equally likely outcomes. (L1 nos. 23–27.)

Contexts: Attendance trends, fitness tracking, shop footfall.

Scaffolds: Templated tables; colour-coded axes; stepwise mean calculation strips.

AfL: “Data detective” stations with low-stakes checkpoints; exit slip explaining a graph in words. (EEF Feedback clarity.)

Extension (L2): Compare two datasets; interpret composite charts.

Week 6 – Problem-Solving Project & Review

Content: Tying together number, measures, and data in a workplace/life scenario (e.g., planning a pop-up stall or small event: budget, discounts, unit costs, staffing rota, simple break-even, a results chart). Emphasise reasoning, checking, and presentation. (L1 “straightforward” multi-step; bridge to L2 “complex”.)

Process: Plan–Monitor–Evaluate cycle; roles in pairs; step-checkpoints; final reflection. (EEF Metacognition.)

AfL/Summative: Low-stress portfolio evidence (see Assessment). (EEF Feedback.)

Resources (core set for the half-term)

- Manipulatives: Multilink, place-value counters, fraction strips, real/replica coins; number lines and ratio tables (printable). (Use as temporary scaffolds.)
- Worked example packs with faded steps; mini-whiteboards; visual timers; calm corner signage and de-escalation prompt cards.
- Functional Skills-style task banks contextualised to learners’ interests (retail, catering, construction, hair/beauty, sport). (DfE subject content alignment.)

Impact & Assessment (Formative, Summative, Pupil Voice)

Low-Stress AfL (lesson-by-lesson)

- Entry retrieval (3–4 items), mid-lesson hinge question, exit ticket; non-verbal responses (thumbs/traffic lights) to reduce spotlight stress. (EEF Feedback; Rosenshine checks.)
- Mini-whiteboard “whole-class response” to keep stakes low and identify misconceptions immediately. (Rosenhine; EEF Maths.)

- Feedback is specific, actionable, and sparing; feed-forward tasks at start of the next lesson; self/peer review with success criteria. (EEF Feedback.)

Summative (light-touch; portfolio-based)

- Skills snapshots: two untimed “checkpoint” sheets (end of Weeks 3 & 6) covering number/percentages and integrated problem-solving.
- Project evidence: Week 6 planning sheet, calculations with checking, and brief written interpretation of results (accept bullet points/voice notes if literacy is a barrier).
- Functional Skills readiness: map evidence to L1 statements; flag stretch to L2 where shown. (Subject content L1/L2.)

Pupil Voice & Self-Regulation

- Weekly confidence rating + “What helped me succeed?” prompts; co-created coping menu for maths stress; plan–monitor–evaluate reflection boxes on tasks. (EEF Metacognition; Hanover trauma.)

Inclusive Strategies & Support (SEMH-aware, trauma-informed, SEND-responsive)
Environment & Relationships

- Predictable routines, visual schedule, calm starts, positive greetings; consistent expectations displayed; restorative follow-up after incidents. (TAA policy.)
- Quiet corner/regulation options; opt-in roles for board work; micro-breaks; choices within tasks to promote control and safety. (Hanover trauma de-escalation.)

Instructional Scaffolds

- Teach in small steps with high success rate (~80% during guided practice); model thinking aloud; provide and fade scaffolds; cumulative review. (Rosenshine.)
- Worked examples and partially completed examples before independent work; explicit strategy teaching; purposeful use of representations and manipulatives as temporary supports. (EEF Metacognition; EEF Maths.)

Cognition, Metacognition & SEL

- Plan–Monitor–Evaluate prompts on all multi-step tasks; sentence stems for explaining choices; pair talk that is purposeful and guided. (EEF Metacognition.)
- Class SEL routines: emotion check-ins; normalise help-seeking; praise effort and strategies; build in reflection after dysregulation. (EEF SEL review; TAA behaviour policy.)

Assessment Adjustments

- Frequent, low-stakes checks instead of big tests; extended time and breaks available; choice of response modes (oral, typed, scaffolded written); reading supports for wordy problems. (EEF SEND; TAA SEND policy.)

Safeguarding & Pastoral

- Follow TAA safeguarding procedures; staff coordinate with keyworkers, pastoral managers, and SENCO using graduated Assess–Plan–Do–Review. (TAA policy.)
(References: Taught AI Academy Behaviour Policy, 2023; Taught AI Academy Safeguarding Protocol; Based on Ofsted EIF “Quality of Education” guidance.)

Weekly Resources & Checklists (suggested)

- Week 1: Place-value mats; rounding number line strips; estimation “Is it reasonable?” cards.
- Week 2: Fraction/decimal number lines; bar-model scaffolds; worked-example booklet.
- Week 3: Ratio tables and percentage bar templates; price-tag cards for discounts.
- Week 4: Conversion ladders; grid paper for area; cube nets.
- Week 5: Blank tables and chart frames; mean/range step cards; probability line.
- Week 6: Project pack (brief, roles, milestones, reflection sheets); portfolio checklist mapped to L1 (with L2 stretch).

Progression & Stretch

- L1 core mastery first; when secure, introduce L2-style problems: general %

change, reverse %; multi-unit conversions; interpreting composite data displays; evaluate methods and justify decisions in context. (FS Maths L2.)

Home/Enrichment & Careers Links

- Micro-tasks linked to life and work: budgeting a weekly shop; reading a payslip; planning travel times; interpreting workplace charts. (Functional Skills purpose.)
- Invite careers contexts (construction take-offs, catering recipes, retail discounts) to build cultural capital and relevance. (TAA policy on careers.)

Would you like to:

- Add GCSE bridging questions each week?
- Adapt this for Entry Level 3 or for Functional Skills Level 2?
- Build in more differentiation, support strategies, or challenge tasks?
- Incorporate additional focuses, such as digital literacy, oracy, or thematic enrichment?

Would you like me to expand on any part of this?

You said:

Great please put into tables for me and include some EAL strategies for some of the kids

Taught AI Academy SoW Writer said:

Thought for 21s

Brilliant—here's your half-term SoW reformatted into clear, printable tables with added EAL strategies (Bell Foundation—aligned). Citations appear where they underpin content or strategy choices.

Unit Summary (Functional Skills Mathematics – Year 10 SEMH, Level 1 with stretch to L2)

Purpose and content follow Functional Skills Maths subject content (Levels 1–2).

Table 1. Curriculum Intent (III)

Area	What pupils will gain	Evidence base
------	-----------------------	---------------

Intent	Fluent number sense; F/D/%, ratio, measures, data in life/work contexts; reduce anxiety via predictable routines.	Functional Skills purpose & content; problem-solving expectations (L1 “straightforward”, L2 “complex”).
Implementation	Small-steps explicit teaching; worked examples; guided → independent practice; purposeful representations.	Rosenshine principles; EEF KS2–3 Maths (representations/manipulatives).
Impact	Low-stress AfL, quick feedback cycles, and portfolio evidence mapped to FS standards.	EEF Feedback guidance; FS subject content (L1–L2).

Table 2. Weekly Plan (6-week half-term)

Week	Focus & FS links	Contexts	Representations & Scaffolds	Low-stress AfL	Stretch to L2
1	Place value, $\times/\div$ by 10/100/1000, rounding, estimation (L1).	Stock counts, data bundles, till totals	Place-value mats, number lines; worked examples (faded).	MWB checks, hinge Q, exit ticket; no-hands cold-call with think time.	Multi-step estimation in bills; reasonableness checks.
2	Fractions $\leftrightarrow$ decimals; fraction of quantity; ops with decimals (L1).	Recipes, shift splits	Number lines, bar models; partially completed examples.	Self-mark with model; peer “two stars & a wish”.	Compare mixed scenarios.
3	Percentages; simple % inc/dec; ratio & direct proportion (L1).	Sales, tips, ratio tables; unit pricing	Percentage bars; I-We-You modelling.	Estimate→calculate routine; quick quizzes with whole-class feedback.	General % change; reverse %; multi-step.

4	Measures, conversions; money & time; perimeter/area/volume (L1).	Carpets/paignt, packaging, rotas	Conversion ladders; grid sketches; cubes for volume.	Practical stations; gallery walk with checklist.	Multi-unit problems linking scale, area, cost.
5	Handling data; charts; mean & range; simple probability (L1).	Attendance, fitness, footfall	Table templates; colour-coded axes; mean step strips.	“Data detective” stations; exit slip explaining a graph.	Compare two datasets; composite charts.
6	Integrated project (budget/discounts/rata/chart). L1 multi-step with L2 elements.	Pop-up stall or event	Planning frames; checklists; metacognitive PME prompts.	Portfolio evidence (calculations + reasoning) + reflection.	Evaluate methods; justify choices to audience.

Table 3. SEMH-Aware Lesson Flow (applies weekly)

Phase	What it looks like	Research anchor
Calm start & retrieval	Visual agenda; 3–4 retrieval Qs from last lesson/week; regulation check-in.	Rosenshine checks; reduces cognitive load.
I-Do / We-Do / You-Do	Short explanations, many examples; guided practice before independence.	Rosenshine: small steps, high success rate.
Purposeful reps	Number lines, bar/ratio tables, manipulatives as temporary scaffolds.	EEF Maths representations.
Low-stress AfL	MWBs, hinge Qs, traffic-lights; actionable, concise feed-forward.	EEF Feedback.

Exit & reset	1–2 exit items; preview next step; options for catch-up slot.	FS progression & fluency focus.
--------------	---	---------------------------------

Table 4. EAL Strategies embedded each week (Bell Foundation)

Need/Band (illustrative)	Practical strategies in maths	Where it appears
Band A: New to English	Pre-teach key maths words with visuals and bilingual glossary; print slides; sentence frames and substitution tables; allow first-language note-making; DARTs (match/sort/sequence).	Starter vocab; guided practice; independent tasks
Band B: Early Acquisition	Clear, chunked instructions; model language; allow discussion with an L1 buddy; active listening tasks; speaking frames; think time before Qs.	Explanations; partner talk; hinge Qs
Band C/D: Developing/Competent	Highlight command words (analyse, compare); model how to turn a table/graph into sentences; dictogloss for method write-ups; error-correction codes.	Data lessons; project week write-ups
All EAL learners	Build personal bilingual dictionaries; regular recap of topic vocabulary; encourage dual-coding (icons on steps), and culturally explicit examples.	Throughout

Table 5. Scaffolded Numeracy Skills Progression

Strand	Scaffolds (fade over time)	Example tasks
Number & ops	Worked → partially worked examples; place-value counters; estimation checklists.	“Is this reasonable?” bill totals; multiply/divide by powers of 10.
F/D/%	Number lines; bar models; equivalence mats; ratio tables.	% discount then tax; split a recipe; compare tariffs.
Measures & geometry	Conversion ladders; grid sketches; cubes/nets; timeline bars.	Perimeter/area costings; rota durations; packaging volume.

Data & probability	Table/graph frames; mean/range step cards; probability line.	Create and explain a chart from class survey (mean + range).
--------------------	--	--

Table 6. Assessment for Learning (low-stress) & Evidence Map

When	Tool	What to capture	Mapping
Start of lesson	3–4 retrieval Qs; thumbs/traffic-lights	Prior knowledge; misconceptions	FS underpinning skills secure.
Mid-lesson	Hinge question (MWBs); brief pair-explain	Readiness to move on; language use	Teacher adjusts step size (Rosenshine).
End	Exit ticket (1–2 items)	Independent success; next step	Feed-forward starter next lesson (EEF).
Week 3	Skills snapshot	Number/percentages; L1 “straightforward” reasoning	problems.
Week 6	Project portfolio	Planning, calcs, checks, interpretation	Evidence toward L1; note any L2 attributes.

Table 7. Inclusion & Regulation (SEMH-aware routines)

Element	Practical move	Research anchor
Predictability	Visual agenda; clear success criteria; micro-break options	Supports attention & reduces load (explicit teaching).
Choice & control	“Mild/Medium/Spicy” task tiers; opt-in board work	Builds persistence within FS purpose.
Access to language	Dual-coded steps; framed talk; bilingual supports	Bell Foundation classroom strategies.
Feedback climate	Specific, actionable, minimal marking codes	EEF Feedback recommendations.

Table 8. Resources (weekly)

Week	Printable/Practical resources
1	Place-value mats; rounding number-line strips; estimation reasonableness cards.
2	Fraction/decimal number lines; bar-model templates; worked/part-worked examples.
3	Percentage bars; ratio tables; price-tag discount cards.
4	Conversion ladders; grid paper & cube nets; money/time frames.
5	Table and chart frames; mean/range step cards; probability line.
6	Project brief, checkpoints, PME reflection sheets; portfolio checklist against FS L1/L2.

Notes for staff use and compliance

- References to Ofsted EIF (Quality of Education) principles are embedded via explicit teaching, sequencing, and responsive checks.
- Align with Taught AI Academy behaviour, safeguarding, SEND/inclusion expectations when implementing routines and adjustments.
- This SoW maintains explicit mapping to Functional Skills Maths content and assessment demands.

Would you like me to:

- Add a one-page pupil-friendly knowledge organiser for each week?
- Build a bank of EAL-ready vocabulary cards (with visuals) matched to Weeks 1–6?
- Adapt this for Entry Level 3 or push more Level 2 stretch?

Would you like me to expand on any part of this?

Y

Taught AI Academy SoW Writer said:

Thought for 31s

Great — thanks for confirming. I’ll draft the full 6-lesson PSHE scheme now, using a KS3 (Year 8) pitch, mixed ability, and with explicit support for low verbal confidence and trauma-informed practice.

Unit Title and Overview

Respectful Relationships (KS3, Year 8)

Duration: 6 lessons (approx. half term)

Context: Mixed-ability class with low verbal confidence. Emphasis on interactive, low-stakes talk, visuals, and choice of response modes. Trauma-informed routines embedded throughout (predictable structures, opt-in participation, co-constructed norms). (Based on Ofsted EIF “Quality of Education” guidance; Taught AI Academy Behaviour Policy, 2023; Taught AI Academy Safeguarding Protocol, p. 12;)

Curriculum Intent

- Knowledge: Pupils understand what “respectful relationships” look and feel like (friendships, online conduct, boundaries, consent, inclusion), can name unhelpful behaviours, and know how to seek help.
- Skills: Active listening, turn-taking, perspective taking, assertive communication, help-seeking.
- Attitudes: Value of diversity, empathy, kindness, and responsibility for one’s impact.
- Sequencing: Builds from personal values and group norms → communication → boundaries/consent → online respect → resolving conflict → allyship and help-seeking.
- Inclusion: Structured talk, sentence stems, visual scaffolds, and options to respond non-verbally to support low verbal confidence and EAL learners. (EEF: disciplinary literacy & structured talk; Bell Foundation strategies for scaffolding talk)

Implementation Plan (Weekly Breakdown, Resources, Strategies)

Lesson 1 — Building a Safe Space & What Respect Looks Like

Objectives: Establish relational norms; define “respect”.

Activities:

- Warm welcome & feelings check-in (visual scale, opt-in) → co-create class “Respect Charter” (teacher offers options to sign with initials, sticker, or thumbs card).
- Gallery walk: picture prompts of everyday interactions; pupils place colour-coded dots for “respectful/not sure/disrespectful” then discuss in pairs using stems: “I noticed...”, “A respectful choice could be...”.
- Exit: “One norm I can commit to this week is...”.

Trauma-informed notes: Predictable routine, clear opt-outs, advance signposting of tasks, calm-corner signal. (Hanover trauma-sensitive environment; predictable structures; safe spaces)

Literacy/talk scaffolds: Visual stems on screen/mini-cards; sentence frames for low-verbal pupils. (EEF structured talk; Bell Foundation scaffolds)

Lesson 2 — Communication: Listening, Voice, and Impact

Objectives: Practise active listening; use “I” statements; recognise tone/body language.

Activities:

- Teacher-modelled mini-role-play (poor vs. respectful listening).
- Triads rotate through micro-stations: mirroring, paraphrasing, “I feel...when...because...next time...”.
- “Talk tokens” game (limit turns; permit non-verbal contributions via cards/whiteboards).
- Exit: Personal “listening goal”.

Trauma-informed notes: Choice of role or observer; chunked practice; praise specific behaviours. (Hanover: break tasks into parts; focus on positive reinforcement)

Feedback: Brief, purposeful verbal feedback on task/strategy, not persona. (EEF feedback principles)

Lesson 3 — Boundaries & Consent (Everyday Contexts)

Objectives: Define boundaries; practise asking/declining respectfully; recognise pressure.

Activities:

- “Everyday consent” scenarios (borrowing items, photos, personal space, group chats). Pupils choose response mode: role-card read-aloud, comic-strip storyboard, or “decision-line” with sentence stems.
- Teach/coach the “Ask–Listen–Respect” routine; practise with prompt cards.
- Exit: “Two ways I can show I respect boundaries this week.”

Trauma-informed notes: Content sensitivity warning; pupils can observe or write instead of act; teacher offers alternative quiet task. (Trauma-responsive: anticipate triggers, provide choices, de-escalation paths)

EAL/low-verbal: Visual icons for “ask/yes/no/maybe/stop”; substitution tables. (Bell Foundation)

Lesson 4 — Respect Online: Kindness, Privacy, and Digital Footprints

Objectives: Identify respectful/unhelpful online behaviours; practise bystander moves.

Activities:

- “Red/Amber/Green” card sort: screenshots of anonymised posts/captions; small groups justify placements with stems: “This is amber because...”.
- Bystander scripts carousel: “Pause–Check–Support–Report” with choices of DM template, reporting steps, or supportive comment bank.
- Exit quiz (low-stakes, quick oral/whiteboard).

Trauma-informed notes: Avoid displaying harmful content; focus on skill-building; predictable routine. (Predictability & minimising triggers)

Literacy: Targeted vocabulary (privacy, consent, harassment, footprint); spaced retrieval at lesson starts. (EEF vocabulary & retrieval)

Lesson 5 — Disagreeing Well: Conflict, Repair & Restorative Moves

Objectives: Use respectful disagreement; understand impact vs. intent; practise repair.

Activities:

- Explicit teaching: “Curious questions” vs. “Gotcha questions”.
- Fishbowl with scripted roles (or silent debate on A3 placemats for low-verbal participation).
- Restorative sentence stems practice: “When X happened, I felt...because...Next time...”.
- Exit: “One restorative move I can try.”

Trauma-informed notes: De-escalation ladder is visible; teacher models calm tone; opt-in speaking. (Acting-Out cycle awareness; restorative/positive reinforcement)

Feedback: Live, specific, and concise; time to act on feedback inside the lesson.

(EEF: verbal feedback & time to use it)

Lesson 6 — Allies & Support: Inclusion, Diversity, and Help-Seeking

Objectives: Recognise exclusionary behaviours; practise allyship; map support routes.

Activities:

- “Circle of support” mapping (school and community).
- Scenario jigsaw: pupils choose to create a poster, record a 30-sec audio script, or write a DM template showing allyship.
- Class pledge refresh; personal action plan (private).

Trauma-informed notes: Check-in and opt-out; quiet creation options; normalise help-seeking. (Hanover: teacher–student relationships, psychological safety)

Literacy/talk: Paired rehearsal before any share-out; teacher models vocabulary and stems. (EEF structured talk)

Core resources provided (print or slide):

- Sentence stems & talk frames; visual icons and word banks (Tier 2/3 language).
(EEF disciplinary literacy)

- Calm-corner visuals and regulation choices; predictable agenda slide each lesson.
(Hanover trauma-sensitive environment)

- Role cards with graduated challenge; silent-debate templates; reflection exit tickets.
- EAL supports: substitution tables, key instruction verbs, bilingual dictionary option.
(Bell Foundation)

Impact & Assessment

Formative (ongoing):

- Entry/exit tickets focused on one concept/skill.
- Live checks during stations; mini-whiteboards for low-verbal responses.
- “Green/Amber/Red” self-assessment of confidence after practice.

- Planned time to act on feedback in-lesson (close the loop). (EEF feedback: timely, actionable, monitored use)

Summative (end of unit):

- Pupil-designed product (choice): respectful-communication guide, allyship poster, or 60-sec audio PSA; assessed with a simple rubric (knowledge, strategy use, respectful language).
- Short reflective write-up or audio note: “A strategy I used and why it worked.” (EEF: combine reading/writing; sentence combining for clarity)

Pupil Voice:

- 3-question anonymous check-out in Lesson 6: safety, usefulness, one change request.
- Small-group conversation with stems for low-verbal pupils (or written emoji scale). (Bell Foundation: structured opportunities, check understanding)

Inclusive Strategies & Support

Trauma-informed practice (all lessons):

- Predictable routines; posted agenda; warnings before transitions; opt-in roles; calm-corner; co-constructed norms; focus on positive behaviours; de-escalation script accessible to staff. (Hanover: predictability, safe spaces, positive reinforcement, de-escalation)
- Chunked tasks, multiple modalities (speak, write, draw, signal), and explicit choices to reduce overwhelm. (Hanover: break tasks; multiple representations)

Low verbal confidence & EAL:

- Structured talk routines (think-pair-share, talk tokens, sentence stems, substitution tables); allow written/visual responses; rehearsal time before share-out. (EEF: structured talk; Bell Foundation scaffolds)
- Visual vocabulary, word banks, “word of the day”, and explicit instruction on instruction verbs and key terms. (EEF vocabulary; Bell Foundation)

SEND/SEMH attention:

- Step-by-step instructions on board and handouts; break long tasks into mini-tasks; frequent check-for-understanding; strategic seating; movement breaks; explicit praise; options to demonstrate learning in varied formats. (ADHD evidence-based strategies—clear, broken-down instructions; responsive seating; choice)

Feedback & cognitive supports:

- Keep feedback concise, task/strategy-focused; plan time to use it; model using feedback; avoid over-specification of method; balance teacher judgement on timing. (EEF feedback guidance)
- Retrieval and rehearsal: quick starters revisiting vocabulary/strategies; graphic organisers for planning; modelling and scaffolded practice → gradual release. (EEF literacy; Rosenshine principles)

Safeguarding & Signposting

- Establish confidential help-seeking routes; remind of reporting lines; avoid eliciting disclosures in public discussion. (Taught AI Academy Safeguarding Protocol)
- Use de-identified scenarios; pre-warn sensitive content; provide alternative tasks if needed. (Taught AI Academy Behaviour Policy; Hanover trauma-informed strategies)

Implementation Notes (Ill alignment)

- Intent: Knowledge, skills, attitudes sequenced to build safe, respectful behaviours and cultural capital (allyship, digital citizenship).
- Implementation: Short, varied, interactive routines with explicit modelling, structured talk, visual scaffolds, and optional participation; teacher uses live, purposeful feedback. (EEF literacy & feedback)
- Impact: Formative checks each lesson; summative product with choice; pupil voice informs iteration; behaviour and relational climate monitored (calm-corner use, respectful language frequency). (Based on Ofsted EIF “Quality of Education” guidance)

Would you like to:

- Generate another scheme of work?
- Adapt this one for a different learner group or level?
- Add more differentiation, support strategies, or challenge tasks?
- Incorporate additional focuses, such as digital literacy, oracy, or thematic enrichment?

Would you like me to expand on any part of this?

Please put into tables for me

Taught AI Academy SoW Writer said:

Thought for 13s

Perfect—here's your 6-lesson PSHE scheme reformatted into clear, printable tables.

I've kept the trauma-informed and low-verbal supports visible in every lesson and included brief source attributions in line with Taught AI Academy guidance.

Unit Overview

Item	Details
Unit title	Respectful Relationships (KS3, Year 8)
Duration	6 lessons (half term)
Context	Mixed ability; low verbal confidence; emphasis on structured talk, visuals, and choice of response modes
Core themes	Respect in friendships and groups; communication; boundaries and consent (everyday contexts); online respect; conflict and repair; allyship and help-seeking
Pedagogical stance	Trauma-informed routines (predictable structure, opt-in participation, co-constructed norms); explicit modelling and scaffolded practice

(Based on Ofsted EIF “Quality of Education”; EEF Literacy & Feedback; Bell
References (brief) Foundation EAL guidance; Hanover trauma-informed strategies; TAA
Behaviour & Safeguarding policies)

Weekly Implementation Plan (Lessons 1–6)

Lesson	Objectives	Interactive Activities (trauma-informed design in italics)	Talk & Literacy Scaffolds	Resources
1. Safe Space & What Respect Looks Like	Establish norms; define respect	Gallery walk with picture prompts; class “Respect Charter”; exit commitment. <i>Predictable routine, opt-in roles, calm-corner signal.</i>	Sentence stems (“I noticed...”, “A respectful choice could be...”); mini word bank	Agenda slide; norms poster; colour-dot stickers; exit ticket
2. Communication: Listening, Voice, Impact	Practise active listening; use “I” statements	Modelled mini-role-play; triad micro-stations (mirroring, paraphrasing, “I feel...when...”); talk-token game. <i>Choice of role/observer; chunked tasks; specific praise.</i>	“I-statement” frame; listening checklist; visual tone/body-language icons	Role cards; timers; talk tokens; mini whiteboards
3. Boundaries & Consent (Everyday)	Define boundaries; ask/decline respectfully; recognise pressure	Scenario choice: acted read-through, comic-strip storyboard, or decision-line. Teach “Ask–Listen–Respect” routine. <i>Content warning; alternative quiet task available.</i>	Icons for ask/yes/no/stop; substitution tables; short scripts	Scenario cards; storyboard templates; routine prompt cards
4. Respect Online	Identify respectful/unhelpful posts; practise bystander moves	Red/Amber/Green card sort of anonymised posts; carousel of bystander scripts (“Pause–Check–Support–Report”); low-stakes exit quiz. <i>Avoid</i>	Vocabulary focus: privacy/consent/harassment/footprint; retrieval starter	Screenshot cards (sanitised); reporting flowchart; quiz cards

<i>harmful content; predictable routine.</i>				
5.	Use respectful disagreement; understand impact vs intent; practise repair	Fishbowl discussion with scripted roles or silent debate placemats; restorative stems practice. <i>Visible de-escalation ladder; opt-in speaking.</i>	Stems: “A different view...”, “I’m curious about...”, restorative sentence frames	Role scripts; placemats; de-escalation poster
6. Allies & Support	Recognise exclusion; practise allyship; map help routes	“Circle of support” mapping; scenario jigsaw → poster/audio/DM template; pledge refresh + private action plan. <i>Quiet creation options; normalise help-seeking.</i>	Paired rehearsal before share-out; key vocabulary bank; optional audio submission	Support-route s map; template pack; pledge sheet

Assessment, Impact & Pupil Voice

Area	What this looks like	When	Notes
Formative checks	Entry/exit tickets; mini-whiteboards; confidence self-rating (Green/Amber/Red); live checks at stations	Every lesson	Keep feedback concise, task/strategy-focused with time to act on it (EEF Feedback)
Summative product	Choice: respectful-communication guide, allyship poster, or 60-sec audio PSA	Lesson 6	Simple rubric: knowledge, strategy use, respectful language; multiple modes accepted
Reflection	Short write-up or audio: “A strategy I used and why it worked”	Lesson 6	Supports metacognition; sentence frames for low-verbal confidence

Pupil voice	3-question anonymous checkout: safety, usefulness, one change	Lesson 6	Offer emoji scale / bilingual option for accessibility
-------------	---	----------	--

Inclusive Strategies Matrix

Need/Barrier	Strategy	Where used	Rationale/Source (brief)
Low verbal confidence	Sentence stems, talk tokens, paired rehearsal, mini-whiteboards, option to draw/write instead of speak	All lessons	Structured talk and scaffolding improve participation (EEF Literacy; Bell Foundation)
EAL	Visual vocab banks, substitution tables, key instruction verbs, bilingual dictionaries	1–6	Reduces language load; supports comprehension/production (Bell Foundation)
SEMH / dysregulation	Predictable agenda; opt-in roles; calm-corner; movement breaks; praise specific behaviours	All lessons	Trauma-informed practice builds safety and engagement (Hanover; TAA Behaviour Policy)
Attention/working memory	Chunk instructions; break tasks; timers; visual checklists	2–5	Evidence-based ADHD classroom strategies; Rosenshine scaffolded practice
Social anxiety	Choice of observer/actor; silent debate; private submissions (audio/poster)	2, 3, 5, 6	Choice and low-exposure pathways reduce threat and enable success (Trauma-informed)

Resources & Routines

Category	Items
----------	-------

Visuals & organisers	Agenda slide; norms/charter poster; de-escalation ladder; word banks; icons (ask/yes/no/stop)
Activity packs	Role cards (graded challenge); scenario cards (de-identified); storyboard & placemat templates
Tools for inclusion	Talk tokens; timers; mini-whiteboards; headphones/quiet task cards; bilingual dictionaries
Retrieval & feedback	Starter prompts revisiting vocabulary; quick quizzes; exit tickets; time to apply feedback

Safeguarding & Signposting

Focus	Practice
Protective framing	Use de-identified scenarios; pre-warn sensitive content; option to opt out without penalty
Boundaries during discussion	Avoid eliciting public disclosures; reinforce reporting routes; staff to follow TAA Safeguarding Protocol
Help-seeking	“Circle of support” map (school and community); remind pupils how to access support privately
Staff alignment	Share de-escalation script; record concerns via agreed channels; uphold TAA Behaviour Policy

III (Intent–Implementation–Impact) Alignment Summary

Strand	What good looks like in this unit
Intent	Clear knowledge/skills/attitudes sequence: norms → communication → boundaries/consent → online respect → conflict repair → allyship/help-seeking; builds cultural capital and safe participation

Implementation	Short, varied, interactive routines; explicit modelling; scaffolded practice; structured talk; visual supports; predictable trauma-informed routines; purposeful feedback with in-lesson use
Impact	Frequent formative checks; summative choice product; reflective metacognition; pupil voice informs iteration; monitoring of relational climate and language of respect

Brief Source Referencing (for policy folders / staff notes)

Area	Reference
Quality of Education	Based on Ofsted EIF guidance
Literacy & Feedback	EEF Improving Literacy; EEF Teacher Feedback
EAL Scaffolds	Bell Foundation: Classroom Strategies (Secondary)
Trauma-Informed	Hanover Institute: Trauma-Informed Instruction
Behaviour & Safeguarding	Taught AI Academy Behaviour Policy; Taught AI Academy Safeguarding Protocol

Would you like to:

- Generate another scheme of work?
- Adapt this one for a different learner group or level?
- Add more differentiation, support strategies, or challenge tasks?
- Incorporate additional focuses, such as digital literacy, oracy, or thematic enrichment?

"Build a catch-up science SoW for Year 7 covering 'states of matter', with a focus on short, visual tasks and links to everyday life."

Taught AI Academy SoW Writer said:

Thought for 9s

Just checking—have you read the Taught AI Academy AI Use Policy and confirm that you will not include any personal names or identifying data about students, families, or staff?

Please type "Y" to confirm before we continue.

You said:

Y

Taught AI Academy SoW Writer said:

Thought for 4 seconds

Great — thanks!

To tailor this properly, could you confirm a few setup details:

1. What is the level? (Entry Level, Functional Skills L1/2, or GCSE-prep KS3)
2. What is the duration of the unit? (e.g., 4–6 weeks half-term, or a different length)
3. Is this for mainstream, alternative provision, or SEND learners?
4. Any inclusion priorities to plan for? (e.g., EAL, ADHD, ASC, low literacy, SEMH/dysregulation)
5. Would you like any of the following included?
 - GCSE exam preparation
 - Functional Skills practice tasks
 - Enrichment or careers-linked opportunities
 - Embedded literacy or numeracy

If you'd prefer, I can draft a complete SoW now with sensible defaults (6-week catch-up unit for KS3, mixed-ability in AP/SEND context, strong EAL/ADHD/SEMH supports, and embedded literacy + numeracy).

You said:

GCSE grade 2. 3 weeks 12 lessons. PRU. SEMH needs.

Taught AI Academy SoW Writer said:

Thought for 38s

Scheme of Work: Year 7 Catch-Up Science (GCSE grade 2 working at KS3)

Unit: States of Matter – Short, Visual, Everyday Science

Duration: 3 weeks (12 x 45–60 min lessons)

Setting: PRU (Alternative Provision) with SEMH needs

Unit Title and Overview

- Big idea: All materials are made of particles. Their arrangement and movement explain the properties of solids, liquids and gases and the changes we see every day (melting, boiling, evaporation, condensation, sublimation).
- Rationale for PRU/SEMH: Highly structured, visual-first lessons with lots of quick wins, movement breaks, choice, and real-world hooks (kettle steam, deodorant spray, bike pumps, cooking). Predictable routines minimise cognitive load and support regulation, with short tasks and visual organisers throughout (trauma-informed, scaffolded practice; predictable sequences).
- Knowledge & skills: Particle model; states and state changes; heating/cooling curves (qualitative); diffusion and gas pressure in everyday contexts; reading simple graphs; planning/observing simple practicals safely; using key vocabulary accurately (particle, compress, diffuse, evaporate, condense, freeze, melt, sublimation).
- Prior gaps targeted: Misconceptions about “particles expanding” vs increased spacing, “steam is smoke”, “cold is a substance”; limited graph-reading; low confidence with scientific language. (Use ongoing checks for understanding; short modelling–guided practice–independent cycle.)

Curriculum Intent (III – Ofsted-aligned)

- Intent: Rebuild secure conceptual understanding of the particle model so pupils can explain familiar everyday phenomena; develop language for thinking in science; re-engage pupils through success in short, visual practicals and low-stakes quizzes. (Based on Ofsted EIF “Quality of Education” and TAA policy expectations for behaviour/safety.)
- Implementation: Consistent lesson structure (Meet & Greet → Do Now retrieval → Micro-teach with dual coding → Tiny practical/demo → Mini-whiteboard checks → Exit ticket). Small steps with worked examples and frequent checks for understanding; high success rate aim ~80%.
- Impact: Rapid recall of key vocabulary and diagrams; pupils can narrate particle-level explanations for common changes of state; improved regulation and engagement captured in exit tickets, pupil voice, and behaviour/participation logs. (Taught AI Academy trauma-informed routines.)

Implementation Plan (weekly sequence, resources, strategies)

Lesson structure every time (approx.):

- Meet & Greet and visual agenda on board (predictability) → Do Now (3 Q retrieval) → Teach & Model (5–7 mins) → Short visual task/practical (10–15 mins) → Guided practice (mini-whiteboards) → Reflect & Exit Ticket. (Predictable routines support SEMH; break tasks into parts.)

Week 1: Particles & States

1. What is matter? Intro to particle model; solids, liquids, gases. Visuals + particle card sorts. Demo: packed beads in cups vs marbles in bag to model spacing/flow. Strategy: explicit modelling + think-aloud; sentence frames for EAL.
2. Properties from particles: compressibility, shape, volume. Everyday links: why can we squeeze a deodorant can? Balloon vs syringe. Mini-investigation with syringes (no needle) to “compress air”. Checks for understanding every step.
3. Changes of state 1: melting/freezing with chocolate/ice. Draw before/after particle diagrams; introduce state-change map. Literacy: word bank + image glossary.

4. Changes of state 2: evaporation/condensation. Everyday links: kettle/"steam" on mirror, drying clothes. Condensation on cold can demo. Exit ticket: explain condensation with particles. (Small steps, guided to independent.)

Week 2: Heating/Cooling, Diffusion, Gas Pressure

5. Heating and cooling curves (qualitative). Read simple temp-time graph for ice warming/melting. Numeracy: axes, intervals. Scaffold with partially completed graphs and mini whiteboards.
6. Diffusion in liquids and gases. Visual task: food colouring in warm vs cold water; "smell spreads" scenario. Quick write using frames: "Particles move... therefore...". Retrieval quiz (low-stakes).
7. Gas pressure idea: particles hitting surfaces. Syringe & marshmallow in syringe (sealed) or bike pump analogy. Everyday links: crisp packets on planes, bicycle tyres. Short comic-strip storyboard to dual-code explanation. (EAL frames + visuals.)
8. Sublimation + everyday misconceptions. Safe video/teacher demo (dry ice if available with risk assessment; otherwise iodine/"air freshener" as a concept talk). Correct "steam is smoke", "cold flows in" using hinge questions.

Week 3: Apply & Explain Everyday Phenomena

9. Explain the kitchen: boiling pasta (steam/condensation), fridge frost (deposition), lids stuck (cooling/pressure). Rotating stations with quick, visual tasks; pupils create "Because particles..." captions. Responsive feedback moves.
10. Weather and states: puddles disappearing (evaporation), dew/fog (condensation). Reading simple diagrams; pupils sequence pictures to tell the "particle story".
11. Consolidation practical carousel (short, safe):
 - Ice-salt melt race (observations);
 - Condensation on cold surface;
 - Diffusion of scent (sealed jar opened at the back, timed);
 - Syringe compression.

Each station: 3-step visual instruction card + one question to explain with particles.

(Task checklists as visual scaffold.)

12. Review & confidence build: Retrieval game, oral rehearsal, and pupil voice.

Mini-assessment (see below) + targets. Trauma-informed close: success celebration, preview of next topic. (Predictable closure and positive reinforcement.)

Resources (all lessons)

- Mini whiteboards; visual word banks; dual-coded slides; large particle cut-outs; syringes (no needle), balloons, ice, chocolate, food colouring, clear cups, thermometers; timer; laminated station cards; visual agenda. (Short, visual tasks + scaffolds are recommended for SEND/EAL access.)

Impact & Assessment

- Formative (every lesson):

- Do Now retrieval (3 Q) and hinge questions; cold-call + mini-whiteboards to “check all” understanding; quick verbal summaries (“Because particles...”) to catch misconceptions early. (Frequent checks reduce errors and support retention.)

- Exit tickets with a visual (label and explain).

- Summative (Lesson 12):

- 15-mark mixed assessment: 8 marks multiple choice/image-based; 4 marks diagram completion; 3 marks “Explain this everyday scenario with particles.” Grading for growth, not sanction.

- Pupil Voice & Engagement:

- “Two stars and a wish” on what felt doable/what to practise; simple confidence scale before/after. (Responsive feedback to guide next steps.)

- Success indicators:

- 80%+ correct on hinge checks across lessons 9–12; increased correct use of target vocabulary in spoken/written frames; improved participation consistency (tracked).

Inclusive Strategies & Support (SEMH-aware, PRU context)

Trauma-informed routines

- Highly predictable structure and posted visual agenda; calm starts; brief, clear transitions with countdowns; positive, non-confrontational language; co-regulation and choice (e.g., “Would you like to write or draw the particle diagram?”).
- Use low-arousal environment, clear expectations, and de-escalation scripts where needed; provide short movement breaks and roles (timekeeper, equipment lead).
- Establish a small “cool-down” area with sensory tools; teach and rehearse how to use it without stigma.

High-quality teaching & scaffolding

- Teach in small steps; model–guide–independent with dual-coded diagrams; worked examples and sentence starters; frequent retrieval and revisiting across the 3 weeks.
- Visual scaffolds: checklists for practicals; partially completed diagrams; word–image glossaries; substitute tables/speaking frames for explanations.
- Metacognitive prompts: “Plan–Do–Review” slips: What will I look for? What did I see? How do particles explain it? (Model the thinking, then gradually remove scaffolds.)

Language & literacy (including EAL)

- Pre-teach and revisit 6–8 key words per week with images; bilingual dictionaries allowed; daily oral rehearsal using frames (“When water evaporates, the particles...”).
- Short, structured talk: think-pair-share; sentence stems visible; pictorial organizers; teacher checks comprehension of instructions and idioms.

Feedback & motivation

- Immediate, specific, actionable feedback during guided practice; focus on success steps; praise effort/strategy; keep tasks short to maintain a high success rate.

Behaviour, safeguarding & routines (Taught AI Academy alignment)

- Consistent expectations displayed and rehearsed; relational, restorative stance; escalate via agreed PRU protocols; ensure safety/risk assessment for demos; uphold KCSIE. (Taught AI Academy Behaviour & Safeguarding expectations; trauma-informed whole-school approach.)

Weekly at-a-glance plan (printable)

Week 1

L1 Particles & states (intro, card sort, model) – exit: label particle diagram.

L2 Properties from particles (syringe/balloon) – exit: “Why can’t you compress a liquid?”

L3 Melting/freezing (ice/chocolate) – exit: draw before/after particles.

L4 Evaporation/condensation (kettle/mirror) – exit: explain condensation.

Week 2

L5 Heating/cooling curves (qual.) – exit: identify melting on a graph.

L6 Diffusion (food colouring) – exit: temperature effect sentence frame.

L7 Gas pressure (syringe/bike pump) – exit: compressibility explanation.

L8 Sublimation & misconceptions – exit: correct “steam is smoke”.

Week 3

L9 Kitchen applications station work – exit: choose one station, explain with particles.

L10 Weather/water cycle micro-apps – exit: dew/condensation explanation.

L11 Practical carousel with visual checklists – exit: photo + caption card.

L12 Review + mini-assessment + pupil voice – exit: target next steps.

Safeguarding & H&S

- Follow PRU routines, risk assess heat sources; teacher demo preferred for kettles/boiling; PPE as needed; enforce safe handling and clear stop signals. (Align to Taught AI Academy policy; KCSIE.)

Reference & Policy Notes (for compliance/documentation)

- Based on Ofsted EIF “Quality of Education” intent–implementation–impact framing.
- Evidence-informed teaching: Rosenshine (small steps, checks, high success); EEF Metacognition (model–guide–independent); EEF Teacher Feedback (specific, actionable); EEF SEND (scaffolding, high-quality teaching for all); Bell Foundation (explicit language teaching for EAL); Hanover Trauma-Informed (predictability, co-regulation, de-escalation).
- Taught AI Academy Behaviour/Safeguarding and Trauma-Informed Approach referenced.

Would you like to:

- Generate a pupil-friendly booklet (visual glossaries, station cards, exit tickets)?
- Adapt this for a different group (e.g., higher prior attainers or EAL-new to English)?
- Add more differentiation/challenge tasks (e.g., particle model limitations, latent heat demos)?
- Incorporate additional focuses like digital literacy, oracy routines, or careers links?

Would you like me to expand on any part of this?

You said:

Please put into tables for me

Taught AI Academy SoW Writer said:

Thought for 9s

Perfect—here’s your SoW reformatted into clean, printable tables.

Unit Summary

Item	Details
Unit Title	States of Matter – Short, Visual, Everyday Science
Duration	3 weeks, 12 lessons (45–60 mins)
Context	PRU (Alternative Provision) – learners working around GCSE Grade 2, KS3 content catch-up

Priorities	SEMH needs; short visual tasks; predictable routines; clear everyday links
Big Idea	Particle model explains properties and changes of state (melting, freezing, evaporation, condensation, sublimation)
Everyday Links	Kettle steam and mirrors; deodorant and syringes; bike pumps/tyres; cooking and fridge frost; puddles, dew and fog

Curriculum Intent–Implementation–Impact

III Strand	What this looks like in this unit
Intent	Rebuild secure particle-model understanding; strengthen scientific vocabulary and simple graph reading; re-engage through quick, visual practicals and regular success.
Implementation	Consistent lesson routine: Meet & Greet → Do Now (3Q retrieval) → Micro-teach with dual-coded visuals → Tiny demo/practical → Guided practice (mini-whiteboards) → Exit ticket. Small steps; frequent checks.
Impact	Pupils explain everyday phenomena at particle level; improved vocabulary accuracy; increased engagement evidenced by exit tickets, behaviour/participation logs, and mini-assessment.

12-Lesson Sequence (3 Weeks)

Lsn	Focus & Key Knowledge	Everyday Hook	Short Visual/Practical Task	Key Vocabulary	Exit Ticket / Assessment	Inclusion Notes (PRU/SEMH)
1	What is matter? Particle model; 3 states	“What’s inside everything?”	Particle card sort; bead/marble spacing demo	particle, solid, liquid, gas	Label a particle diagram for each state	Visual agenda; sentence stems; mini-whiteboards

2	Properties from particles	“Why can air be squeezed?”	Syringe (no needle) and balloon compressibility	compress, flow, volume, shape	Why can't you compress a liquid?	Short steps; model language; quick checks
3	Melting & freezing	Chocolate/ice at room temp	Observe & sketch before/after particles	melt, freeze, energy	Draw & annotate particles before/after	Word–image glossary; choice: draw or write
4	Evaporation & condensation	Kettle steam on mirror/cold can	Condensation on cold surface demo	evaporate, condense, vapour	Explain condensation with particles	Hinge Qs; optional cool-down role task
5	Heating/cooling curves (qualitative)	“When does ice actually melt?”	Read simple temp–time graph (scaffolded)	heat, temperature, melting point	Circle where melting happens on graph	Part-completed graphs; pair talk first
6	Diffusion in liquids & gases	Smell spreading; food colouring	Food colouring in warm vs cold water	diffuse, collide, random motion	Complete frame: “Particles move... so...”	Timed task; sentence frames for oracy
7	Gas pressure	Bike pump / crisp packet on plane	Syringe + marshmallow (sealed)	pressure, collisions, surface	Why does pressure increase when compressing gas?	Comic-strip storyboard; teacher checks
8	Sublimation &	Iodine/air freshener	Video/teacher demo;	sublime, deposition, vapour	Correct the statement:	Calm, low-arousal Q&A;

	misconception concept; “steam ≠ smoke”		misconception cards		“Steam is smoke.”	mini-whiteboards
9	Kitchen applications	Boiling pasta; pan lids; fridge frost	Stations: steam/condense; stuck lids; frost	apply, explain, evidence	Choose one station—“Because particles...”	Station checklists; roles (timer/equipment)
10	Weather & states	Puddles disappear; dew/fog	Sequence picture cards → particle story	evaporate, condense cycle	Explain dew on grass with particles	Visual sequencing; guided verbal rehearsal
11	Practical carousel (consolidation)	Mixed applications	4 stations: ice-salt race; condensation; scent diffusion; syringe compression	revise set	Photo/draw + caption card per station	Very short instructions; success steps
12	Review & mini-assessment	Retrieval, confidence, targets	15-mark mixed paper (MCQ/diagrams/explain)	revise set	Pupil voice + target setting	Celebrate wins; preview next topic

Assessment & Impact

Area	Approach	Evidence Collected
Formative (every lesson)	Do Now retrieval (3Q), hinge questions, mini-whiteboards, guided practice feedback, exit ticket with visual	Teacher logs of hinge Q accuracy, annotated work, exit tickets
Summative (Lesson 12)	15 marks: 8 MCQ/image-based; 4 diagram completion; 3 “Explain the scenario with particles”	Assessment scripts, class profile of strengths/gaps

Pupil Voice & Engagement	“Two stars and a wish”; confidence scale before/after unit	Pupil voice sheets; comparison of confidence ratings
Success Indicators	80%+ correct on hinge Qs by Lessons 9–12; Running records; vocabulary correct use of target vocabulary; improved participation consistency	trackers; behaviour/participation data

Resources & Preparation

Category	Items / Notes
Core Equipment	Mini-whiteboards, timers, thermometers, clear cups, food colouring, ice, chocolate, balloons, syringes (no needles), marshmallows, kettles/boiled water for demo only, laminated station cards
Visual Supports	Dual-coded slides, particle cut-outs, word–image glossaries, part-completed graphs/diagrams, checklists for practicals, visual lesson agenda
Printing	Station instruction cards (3 steps), vocabulary mats, exit tickets, retrieval quizzes, mini-assessment (Lesson 12)

Inclusive Strategies (PRU / SEMH-aware)

Strand	Practical Strategies
Trauma-informed routines	Predictable lesson sequence; calm Meet & Greet; short transitions with countdowns; co-regulation and choices (write or draw); optional cool-down space with sensory tools
Scaffolding & pace	Teach in small steps; model → guide → independent; frequent checks; short, high-success tasks; worked examples; reduce cognitive load with visuals
Language & literacy (incl. EAL)	Pre-teach 6–8 key words weekly; sentence stems visible; think-pair-share; bilingual support allowed; explicit teaching of instructions/idioms

Metacognition	Plan–Do–Review slips: What will I look for? What did I see? How do particles explain it? Fade prompts over time
Feedback & motivation	Immediate, specific, actionable feedback; praise effort and strategies; celebrate “quick wins”; maintain ~80% success rate
Behaviour & safeguarding alignment	Relational/restorative stance; clear expectations rehearsed; follow PRU protocols and KCSIE; risk assess heat/pressure demos; teacher-led demos for hot water

Mini-Assessment Blueprint (Lesson 12)

Section	Marks	Item Types	Sample Focus
A	8	Multiple choice with images	Identify state from particle diagram; choose correct statement about evaporation/condensation
B	4	Diagram completion	Complete heating curve labels and mark melting segment; fill particle diagrams before/after a change
C	3	Short explanation	“Explain why a bathroom mirror fogs after a hot shower using particles.”

Everyday Applications Map (for display or pupil booklets)

Scenario	Particle-level explanation (prompt)	Misconception to address
Steam on a mirror	Particles evaporate from hot water, then slow and condense on cold surface	“Steam is smoke”
Puddles disappearing	Liquid particles gain energy and escape into the air as gas	“Water is absorbed into ground only”

Crisp packets on planes	Gas particles push on surfaces; pressure changes with temperature/volume	“Air sucks the bag out”
Stuck jar lids	Cooling reduces particle energy; contraction reduces pressure difference magically”	“Metal shrinks and grips
Fridge frost	Water vapour deposits on cold surfaces; or condensation then freezing	“Cold leaks out”

Health & Safety (PRU context)

Hazard	Control Measures
Hot water/steam	Teacher demo only; keep distance; PPE as needed; clear stop signals
Glassware/wet floors	Use trays; manage spills promptly; non-slip areas
Syringes/pressure	No needles; model safe use; do not seal with excessive force; supervise
Chemicals (if iodine used)	Use alternatives if unsure; follow CLEAPSS/local guidance; ventilation

Reference & Policy Notes (for documentation)

Source / Framework	How it's reflected here
Ofsted EIF – Quality of Education	Intent–Implementation–Impact structure; coherent sequencing; assessment informing teaching
Rosenshine’s Principles	Small steps; modelling; guided practice; high success rate; frequent checks

EEF – Metacognition & Self-Regulation; Teacher Feedback; SEND	Plan–Do–Review prompts; immediate actionable feedback; high-quality teaching and scaffolding for all
Bell Foundation (EAL)	Vocabulary pre-teach; sentence stems; visuals; checking understanding of instructions
Trauma-informed practice	Predictability; co-regulation; low-arousal environment; de-escalation and choice
Taught AI Academy Behaviour & Safeguarding	Relational approach; PRU protocols; KCSIE alignment; risk assessment for demos

Would you like to:

- Generate pupil-facing printable packs (glossaries, station cards, exit tickets, mini-assessment)?
- Adapt this for a different learner group or level (e.g., higher prior attainers, newcomers to English)?
- Add more differentiation, support, or challenge tasks (e.g., particle-model limitations, latent heat)?
- Incorporate additional focuses like digital literacy, oracy routines, or careers links?

Would you like me to expand on any part of this?
