

Sample 1

I Need to write a governors reports on the new AI Policy we have written. I would likeyou to summarise where and how it compliments our existing policies and shcool identity. I want 5 highliughts of the exisitng reorts and h5 expected future developpmentd we expect to roll out.

AI Usage Policy: Report for the Governing Body

This report summarises the core components of the new **AI Usage Policy** and outlines how it reinforces the school's existing vision, values, and operational policies, alongside key planned developments.

1. Alignment with School Identity and Existing Policy

The AI Usage Policy is fundamentally designed to align with and strengthen our core educational principles, ensuring that technology serves our mission to provide a **safe, inclusive, and high-quality learning environment** for all children¹¹¹¹¹¹¹¹.

School Policy	AI Policy Compliment
Vision & Values (Kindness, Respect, Creativity) ²²²²	Enforces Respect for privacy (GDPR/DPA) and prioritises Kindness by ensuring inclusive, trauma-informed resource creation ³³³³ . It uses AI to fuel Creativity in resource design ⁴ .
Safeguarding (KCSIE) / Staff Code of Conduct 5555	Mandates that AI use must never include identifiable pupil data or safeguarding logs, directly supporting the core duty to Prioritise pupil safety and uphold Confidentiality ⁶⁶⁶ .

Curriculum (Ambitious, Inclusive, Literacy/Numeracy) ⁷⁷⁷⁷	Facilitates the creation of resources for Literacy and Numeracy and supports an Inclusive curriculum by adapting content for EAL/SEND learners and translating communications ⁸ .
SEND & Inclusion (Removing Barriers, Equity) ⁹⁹⁹⁹⁹⁹⁹⁹⁹	Directly supports removing barriers by creating visuals, scaffolds, and translated materials for EAL, SEND, and disadvantaged learners ¹⁰¹⁰¹⁰¹⁰ . It supports equity by aiming to tailor resources effectively ¹¹¹¹ .
Behaviour Policy (Regulation, Teaching not Punishing) ¹²¹²¹²¹²	Prohibits the use of AI to assess, label, or predict behaviour/needs ¹³ , thus protecting our relational, trauma-informed ethos and preventing the stigmatisation of pupils ¹⁴¹⁴¹⁴¹⁴ .

2. Key Highlights of Existing Controls and Practice

The AI Policy ensures immediate, robust controls are in place to manage the inherent risks of new technology:

- **Zero Pupil Data Input:** We have a strict prohibition on entering *any* identifiable pupil, family, or safeguarding data into AI tools, explicitly naming key school systems (e.g., EHCPs, safeguarding logs) to protect confidentiality¹⁵.
- **Prohibition of Pupil Access:** Children are **not permitted** to use AI tools directly for learning, ensuring all content and interaction remains fully adult-mediated and age-appropriate¹⁶¹⁶¹⁶¹⁶.
- **Professional Judgement Priority:** The policy is underpinned by the principle that AI must **never replace professional judgment** or be used for clinical tasks like medical advice or SEND diagnosis¹⁷¹⁷¹⁷¹⁷.
- **Targeted Augmentation for Staff:** AI is utilised to *augment* staff capacity by generating foundational resources, accelerating the creation of visually adapted materials, and aiding CPD summaries¹⁸¹⁸¹⁸¹⁸¹⁸¹⁸¹⁸¹⁸.

- **Mandatory Review and Compliance:** All AI-generated content must be **carefully reviewed and tailored** by staff before use. Compliance with UK GDPR/DPA (2018) and the use of approved tools are mandatory¹⁹¹⁹¹⁹¹⁹.

3. Expected Future Developments (Roll-Out Plan)

The following developments are integral to the ongoing strategic implementation and maturity of the AI Policy and are expected to be rolled out:

- **Formal Annual CPD & Training:** Roll-out annual staff training and guidance on ethical AI use, data safety, and applying AI in inclusive practice, as explicitly required by the policy²⁰.
- **Formal Policy & Compliance Review:** Ensure the policy undergoes an annual review involving SLT, Governors, the DSL, and the DPO to assess and maintain compliance with evolving technology and legislation²¹²¹²¹²¹.
- **Platform Accreditation & Vetting:** Establish a clear process, led by the SLT and DPO, for identifying and formally approving **secure, ethical AI platforms** that adhere to the policy's data protection principles, such as prohibiting data retention for model training²²²²²²²².
- **Internal Adaptive Teaching Guidance:** Develop and disseminate tailored, internal best-practice guidance and models for using AI output to genuinely aid **adaptive teaching** for mixed-attainment and high-need groups, moving beyond simple resource generation²³²³²³²³.
- **KS2 Digital Literacy/AI Concepts:** Integrate discussions around AI concepts, critical thinking, and digital responsibility into the **KS2 Computing and Digital Literacy curriculum**, framing AI as a tool for adults and promoting digital citizenship²⁴²⁴²⁴²⁴.

Would you like me to draft specific wording for the **Governor's Resolution** to formally adopt the AI Usage Policy?

Sample 2

I am working on a catch up programme for our low achievers. I want to focus on numeracy and literacy. This programme will be rolled out over the full school year and will look at

targeted interventions for every year group. The idea is that we will be able to move some kids out of this catch up intervention group while others may move in. |Through the plan I Need a constant focus on WAL pupils who make up a large part of the cohort which is currently falling behind.

Strategic Design for a Whole-Year Catch-Up Programme (Numeracy & Literacy)

Designing a flexible, continuous catch-up programme requires leveraging evidence-based interventions and ensuring the model supports sustained improvement, particularly for **Working at Lower (WAL)** pupils.

This strategy integrates core elements of effective implementation with targeted, high-impact interventions.

1. Foundational Principles & Alignment

Your programme should be framed by the following core principles, aligning with the school's vision and evidence-based practice:

- **Targeted and Diagnostics-Led:** Intervention is driven by precise, ongoing assessment of individual knowledge gaps, focusing intently on the next small step.
- **High-Impact Strategies:** Prioritise delivery mechanisms proven to yield the greatest learning gains, especially for pupils who are significantly behind.
- **WAL Pupil Equity Focus:** Explicitly resource and timetable support to ensure **WAL pupils**, particularly those from disadvantaged backgrounds, receive sustained, high-quality interaction that closes the attainment gap.
- **Integration, Not Isolation:** Catch-up work must be explicitly linked to, and reinforce, the **Taught Curriculum** across all year groups¹¹¹¹.

2. Recommended Intervention Models (By Impact)

For a resource-efficient, high-impact programme running across a full year, focus on models that demonstrably work for pupils needing to "catch up."

Intervention Model	Primary Focus & Rationale	Average Impact (EEF)	Application to Your Programme
Small Group Tuition	Targeted instruction (2–5 pupils) allows for specific feedback and closely matched content, ideal for remediating precise numeracy and literacy gaps.	+4 months ² (Low Cost)	The core delivery mechanism for daily/weekly sessions. Maximise impact by maintaining groups of 3 or 4 ³ .
One-to-One Tuition	Highest impact, particularly effective for identifying and addressing deep-seated individual misconceptions.	+5 months ⁴ (Moderate Cost)	Use selectively as a high-intensity boost for WAL pupils who are significantly falling behind or as a short, 6–10 week block to secure foundational skills ⁵ .
Metacognition & Self-Regulation	Teaching pupils strategies for planning, monitoring, and evaluating their learning fosters independence and resilience (WAL pupils need to learn <i>how</i> to learn).	+8 months ⁶ (Very Low Cost)	Embed explicit teaching of self-correction, planning, and articulation into all sessions. This aligns with the school's value of Resilience ⁷ .
Peer Tutoring (Reciprocal)	Effective for consolidating learning and boosting confidence/self-esteem for both tutors and tutees.	+7 months ⁸ (Very Low Cost)	Use for consolidation and fluency once a concept is taught. Older pupils (e.g., Year 6) tutoring younger pupils (e.g., Year 3) on secure

			knowledge can be highly motivating.
--	--	--	-------------------------------------

3. Structural & Operational Plan (Full-Year Cycle)

3.1. Entry & Exit Strategy

The key to a successful, ongoing programme is clear criteria for movement to ensure high-intensity resources target those in greatest need.

- **Assessment (Entry):** Use **diagnostic assessments** (not just summative scores) to pinpoint specific gaps (e.g., in phonological awareness, number bonds, or algebraic reasoning). Identify the **root cause** of the gap, not just the symptom⁹.
- **Intervention Duration:** Schedule interventions in fixed **6 to 10-week blocks** with clear, measurable goals (e.g., "secure all Year 2 common exception words" or "fluent recall of 4x table").
- **Review (Exit):** At the end of the block, review progress against the goal. If the pupil meets the **mastery criteria** (e.g., 80-90% on target skill), they **exit the core intervention** but move to a '**maintenance**' group (see below). If they do not meet the goal, adjust the intervention intensity and duration for the next cycle.

3.2. Delivery Fidelity (Focus on WAL Pupils)

To maximize impact, ensure staff delivering the support are highly trained and that delivery adheres to the intended model ("fidelity")¹⁰.

- **Staff Training (Mechanism 6 & 10):** All staff (Teachers and TAs) delivering small-group work must receive initial and ongoing CPD on the specific intervention methods (e.g., explicit instruction, rehearsal of techniques, how to give high-quality feedback)¹¹.
- **WAL Pupil Focus (Literacy):** For **WAL pupils** struggling with reading, ensure the intervention is grounded in a rigorous, systematic synthetic **Phonics** approach matched to their reading level, regardless of their age¹². This is a statutory curriculum priority¹³.
- **WAL Pupil Focus (Numeracy):** Use the **Concrete-Pictorial-Abstract (CPA)** approach within the intervention setting to rebuild foundational number sense that may have been missed¹⁴.

3.3. Sustaining Progress (The "Maintenance" Model)

To avoid regression and maintain momentum after a pupil exits the core intervention, establish a low-intensity "maintenance" phase:

- **Maintenance Groups:** These are fluid, informal groups (e.g., part of a "collaborative learning" lesson or a peer-tutoring pair) that offer **spaced retrieval practice** of the previously learned content/skill (Mechanism 2)¹⁵.
- **Teacher Check-Ins:** The class teacher holds **brief, informal check-ins** (Mechanism 9/13) with exited pupils weekly to ensure the new learning is retained and embedded into their mainstream work.

4. Key Actions for Leadership & Management

Strategic Action	Rationale and Policy Link
Audit Staff Capacity & Training	Identify which staff members (Teachers/TAs) will deliver the 1:1 and small-group support. Invest in specialist training to meet the "focused and highly effective professional development" criteria for Outstanding Leadership ¹⁶ .
Develop Diagnostic Tool Library	Consolidate or purchase reliable literacy and numeracy diagnostic tools . Ensure they yield actionable data rather than just grades ¹⁷ .
Formalise Intervention Plans	Create a simple, shared "Intervention Plan" template for every child in the programme (e.g., 6-week goal, resources, exit criteria). This unifies practice (Mechanism 4) ¹⁸ .
SLT Monitoring Schedule	Integrate "learning walks" or "book looks" to specifically monitor the fidelity (how closely the intervention is delivered to the plan) and impact of the catch-up sessions. This ensures the programme is a high-priority function ¹⁹ .

Would you like me to develop a detailed structure for the **6-week Intervention Plan** template or draft a **briefing note for TAs** outlining their key responsibilities in delivering this high-impact support?

Sample 3

I need a school attendance improvement plan. This needs to align with our values and policies, while putting greater pressure on parents who it seems enable absenteeism. The plan should be over three terms, and staged 1,2,3. We are employing an attendance mentor who can wrk directly with families and even do home visits and bring kids to schools in the extreme cases, but obviously I need to manage their workload. Please can you draft this please for me.

Strategic Attendance Improvement Plan (3-Term Phased Approach)

This plan is designed to be a strategic framework for improving whole-school attendance, aligning with our core values of **Kindness, Respect, and Resilience**

111 while establishing clear expectations and targeted support, particularly for persistent and severe absence cases. The language emphasises parental

responsibility as a key component of our shared commitment to a child's **Ready to Learn** attitude²².

The plan incorporates an **Attendance Mentor** role, ensuring their high-value time is managed through a staged process focused on escalation and high-needs intervention³.

Overall Strategic Intent

To establish a clear, consistent, and supportive whole-school attendance culture that proactively addresses barriers, teaches positive **learning behaviours**⁴, and ensures prompt, rigorous intervention for non-attendance to close the **attainment gap**⁵.

Phase 1: Term 1 – Universal Clarity & Proactive Teaching

Focus: Universal whole-school expectations, clarifying parental responsibilities, and early intervention via soft-touch communication. This builds a **consistent approach**⁶ across the school.

Strategy	Action Points	Alignment & Rationale
1. Universal Communication	Issue an updated Attendance Charter (via newsletter/website/text message) clearly defining Safe, Kind, Ready to Learn ⁷⁷⁷⁷ behaviours, the 32.5 minimum expectation ⁸ , and the direct link between attendance and outcomes ⁹ .	Clarity & Consistency: Ensures all staff, parents, and pupils understand expectations, addressing the top improvement area identified by Ofsted ¹⁰ . This sets a foundation of respect for the school's commitment ¹¹ .

2. Proactive Monitoring (Phase 1 Threshold)	Monitor all absence cases, particularly those nearing Persistent Absence (PA) (below 95% threshold) ¹² .	Early Intervention: Focuses attention on pupils early, before the problem becomes chronic, thus reducing the Mentor's later workload ¹³¹³¹³¹³ .
3. High-Value Parental Engagement	Introduce 'Attendance Focus' for parents of habitually late pupils or those with emerging PA. Share simple resources to support routines, linking to home learning environment strategies ¹⁴¹⁴¹⁴¹⁴ .	Partnership: Utilises low-cost methods, such as personalised communication and helpful tips, which evidence suggests promotes positive dialogue and greater impact ¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵¹⁵ .
4. Staff Training & Consistency	All staff (teaching, support, admin) receive CPD on the new staged policy, including positive greetings at the door ¹⁶ and consistent, non-confrontational communication for latecomers.	Leadership & Quality: Ensures a unified whole-school approach ¹⁷ and equips staff to manage low-level disruption effectively ¹⁸ . Training must include how the Attendance Mentor role works (Phase 2/3 only).

Phase 2: Term 2 – Targeted Intervention & Escalation

Focus: Direct intervention for established Persistent Absence (PA) and clear **escalation** pathways. This is where the Attendance Mentor begins their targeted work.

Strategy	Action Points	Alignment & Rationale

1. Attendance Review Meeting (ARM)	For pupils hitting or falling below the Persistent Absence (PA) threshold , initiate formal ARM with parents. The purpose is review, reflection, and setting clear goals ¹⁹¹⁹¹⁹¹⁹ .	Accountability & Goal Setting: Formalises the process, demanding parental resilience/effort in supporting the goals ²⁰ . It focuses solely on attendance and the removal of barriers.
2. Attendance Mentor Introduction	Attendance Mentor is assigned to all Phase 2 cases. Initial work is on-site (e.g., check-ins, action plan creation). Mentor caseload is strictly managed to prioritise impact over volume ²¹ .	Targeted Support: Uses high-cost resource (Mentor) efficiently by matching intensive support to specific needs ²²²²²²²² .
3. Structured Action Planning	Co-create a Pupil Attendance Support Plan detailing agreed actions, monitoring frequency, and clear consequences of non-compliance . This includes exploring barriers to attendance (e.g., transport, routines) ²³ .	Shared Responsibility: Provides explicit and structured actions, akin to an SEND Support Plan ²⁴ , ensuring the intervention is closely matched to needs ²⁵ .
4. Reinforce Positive Attendance	Introduce high-visibility rewards for improved attendance/punctuality, focusing on affirmation and reinforcement after progress ²⁶ . This is applied school-wide to model expected learning behaviour ²⁷ .	Motivation: Reinforces success, shifting the focus from punishment ²⁸²⁸²⁸²⁸ to positive encouragement and demonstrating school-wide values.

Phase 3: Term 3 – Intensive Support, Statutory Action & Sustainability

Focus: Statutory action for unengaged PA cases, intensive wrap-around support for complex needs, and embedding positive habits for future sustainability.

Strategy	Action Points	Alignment & Rationale
1. Severe Absence Threshold	For pupils reaching Severe Absence (SA) or non-engagement with Phase 2, statutory referral to the Local Authority is actioned. This is communicated clearly to the parent as the necessary consequence of non-compliance ²⁹ .	Statutory Compliance: Fulfils legal obligation, removing barriers to a good Leadership and Management judgement ³⁰ , and ensuring appropriate external agency support.
2. Intensive Mentor Interventions	Attendance Mentor conducts home visits (accompanied, following safeguarding protocol ³¹), runs 'Ready to Learn' support programmes, and physically escorts children to school in extreme cases only ³² .	Managed Workload: The highest time-cost activity is restricted to the smallest and most severe caseload (SA) to maximise resource impact and avoid Mentor burnout ³³ .
3. End-of-Year Review and Transition	SLT reviews all attendance data to assess plan impact. Successful strategies are embedded into the <i>Curriculum/Behaviour Policy</i> ³⁴ . Unresolved cases are handed over to the LA/external support for the following academic year ³⁵ .	Sustainability & Reflection: Ensures the work is maintained and informs the next cycle of improvement planning, moving away from a one-off initiative ³⁶³⁶³⁶³⁶ .

Key Policy Lines & Staff Guidance

Attendance Mentor Role (Workload Management)

- The Attendance Mentor's time is solely for **Phase 2 and Phase 3** interventions.
- **Phase 1 monitoring is the collective responsibility of all class-based staff/SLT.**
- Mentor caseload will be capped and reviewed **fortnightly** by SLT/DSL to prioritise **Severe Absence (SA)** or non-engagement with Phase 2 interventions.
- Home visits or physical escorts are strictly **Phase 3 actions**, used as a last resort, and require a minimum of 48 hours notice to the family (except in urgent welfare checks, which fall under safeguarding protocol ³⁷).

Parental Responsibility Statement (to be integrated into policy)

"At Taught AI Primary, we recognise that establishing consistent routines for attendance and punctuality is a core responsibility of parents, fundamental to fostering a child's **Resilience** ³⁸ and ensuring they are **Ready to Learn** ³⁹. We commit intensive resources to support families who face genuine barriers; however, where persistent absence is due to a clear lack of parental prioritisation or engagement, statutory action will be swiftly pursued. We maintain the highest expectations that parents will partner with us to ensure their child's success."

Alignment with Behaviour Policy

Attendance issues, particularly lateness, should initially be treated through the lens of **Ready to Learn** expectations, dealt with promptly, calmly, and followed up by the Phase 1 monitoring team, rather than by class teachers ⁴⁰. This prevents **low-level disruption** ⁴¹ in the classroom and keeps the focus on **learning behaviours** ⁴².

Would you like me to draft specific text for the Phase 2 Attendance Review Meeting to guide the Mentor's conversation, or perhaps a section for the Staff Code of Conduct outlining their role in Phase 1?

Sample 4

I would like to produce new proposal to the council for us to expand or provision. We want to start meeting the need for Primary aged children with adverse childhood experiences who are dropping off attending. This will be children at risk of going into care, where we want to get extra support available. This will require funding for a team of two family liaison officers who will work with families and support the kids coming into school. They will be therapeutically trained and able to do with with families, social workers and allow us to offer a much more integrated support to these at risk children. I need a three year plan, milestones targets, and funding estimates for all of these please/

Proposal: The 'Anchors' Therapeutic Inclusion Programme (Adverse Childhood Experiences Focus)

This proposal outlines a three-year strategic plan for implementing the **'Anchors' Therapeutic Inclusion Programme**. This programme is designed to address the complex needs of primary-aged children with Adverse Childhood Experiences (ACEs) who are at risk of educational disengagement and/or entering local authority care. The core component involves integrating therapeutically trained Family Liaison Officers (FLOs) to work directly with pupils, families, and external agencies (e.g., Social Services), fostering consistency and engagement.

Strategic Intent

To provide early, integrated, and therapeutic support for primary-aged children identified as having Adverse Childhood Experiences (ACEs), thereby improving attendance, engagement, behaviour, and ultimately, securing placement stability and reducing the risk of exclusion or entry into care. This approach aligns with our school's values of **Kindness, Respect, and Resilience**¹.

ACEs are significant stressful events in childhood/adolescence (like abuse, neglect, or parental mental illness) which have a strong link with chronic issues and often manifest as challenging behaviour in school²²²². **Targeted approaches** are key to meeting the needs of individuals with challenging behaviour³.

Three-Year Implementation Plan and Milestones

The plan follows the EEF's implementation framework phases: **Explore, Prepare, Deliver, and Sustain**⁴.

Year	Phase Focus	Key Milestones & Deliverables	Rationale & Evidence Link

Year 1	Prepare & Pilot	Recruitment & Training: Recruit 2x Therapeutically Trained FLOs. Initial CPD for FLOs and core SLT/Pastoral staff in trauma-informed practice and the EMR/2x10 models 5555 . Programme Design: Finalise 'Anchors' pupil referral criteria, intervention roadmaps (e.g., using a staged intervention ladder, informed by FBA principles ⁶), and data-sharing agreements with Social Services (GDPR compliant). Pilot & Launch: Begin phased intake	Securing high-quality professional development is vital for effective implementation⁷⁷⁷⁷ . Starting small (Pilot/Reach) allows for high fidelity and refinement before scaling⁸⁸⁸⁸ . Tailoring the approach to individual needs is most effective for challenging behaviour⁹ .
----------------------	-----------------------------------	--	--

		of 8-10 identified pupils.	
Year 2	Deliver & Evaluate	Scale Up: Expand intake to a full caseload (approx. 15-20 pupils across KS1/2). FLOs engage consistently with families/agencies for multi-agency working 10. Mid-Year Review: Formal evaluation of implementation outcomes (e.g., FLO fidelity, teacher acceptability) and final outcomes (e.g., pupil attendance, behaviour incidents, suspensions ¹¹). Data is used to inform adaptations ¹².	Monitoring and feedback drives ongoing improvement ¹³. Whole-school consistency in behaviour policy and response is key to successful implementation ¹⁴. Targeted approaches show the largest behaviour effect ¹⁵.

		Internal CPD: FLOs lead whole-school training on therapeutic interaction and de-escalation for all staff (teaching, TAs, lunchtime).	
--	--	--	--

Year 3	Sustain & Embed	Embed & Transition: The programme becomes an integrated part of the SEND/Pastoral offer. Embed FLOs into statutory SEND/CP review cycle. Develop a formal handover procedure for Y6 leavers to secondary schools. Sustainability Planning: Document the refined 'Anchors' operational manual. Secure long-term recurrent funding via local authority commissioning or core budget reallocation (based on proven impact metrics). Dissemination: Share impact data with governors and local authority partners/RSC to	Sustainability requires embedding the approach into normal practice and systems (e.g., induction for new staff)¹⁷¹⁷¹⁷¹⁷. Demonstrating impact with high-quality evidence is necessary for securing future buy-in and funding¹⁸.
----------------------	-----------------------------------	--	---

		become a credible external resource ¹⁶ .	
--	--	---	--

Proposed Targets and Measures

Target setting should include a balanced focus on **Implementation Outcomes** (How well the programme is working) and **Final Outcomes** (The positive impact on pupils)¹⁹.

Target Area	Baseline (Pre-Programme)	Target End of Year 1	Target End of Year 3
Pupil Engagement (Final Outcome)	Pupil attendance rate for target cohort (e.g., 80-85%).	Increase target cohort attendance by +5% points (e.g., to 85-90%).	Target cohort attendance reaches or exceeds the national primary average (e.g., 96%+).
Behaviour Management (Final Outcome)	Average number of weekly 'Serious Incident' log entries for cohort.	Reduce a Serious Incident logs by 25%.	Reduce Serious Incident logs by 50% from baseline/Zero exclusions for target cohort ²⁰ .
Staff Capacity (Implementation Outcome)	Staff Survey: % reporting confidence in de-escalation/therapeutic responses (e.g., 40%).	Increase staff confidence in de-escalation/therapeutic responses to 65%.	Staff confidence reaches 85% with documented consistency across

			classes/phases ²¹
Family Partnership (Final Outcome)	Family Engagement Score (e.g., 2.5/5).	Family Engagement Score improves to 3.5/5.	Family Engagement Score improves to 4.5/5.

Funding Estimates and Justification

The core investment is in two full-time, expert Family Liaison Officers (FLOs) who possess therapeutic training (e.g., in attachment, trauma-informed practice, or social work) above the standard school support staff qualification.

Category	Year 1 Estimate	Year 2 Estimate	Year 3 Estimate	Rationale
Salaries (2x FLO)	£65,000	£67,000	£70,000	Reflects salaries + on-costs (e.g., employer NI/pension) for therapeutically trained, skilled professionals.
Training & CPD	£7,500	£4,000	£2,500	Intensive initial trauma/ACE training for FLOs, SLT, and core pastoral team (Year 1). Refresher and whole-school training cascade (Years 2 & 3).

Resources	£1,500	£1,000	£500	Materials for Nurture/Regulation spaces, therapeutic tools (e.g., sand tray, worry dolls), sensory resources.
Supervision/Networking	£1,000	£1,000	£1,000	Dedicated external professional supervision for FLOs to manage complex caseloads and prevent burnout.
Contingency (10%)	£7,500	£7,300	£7,300	Unforeseen costs, e.g., transport support for family meetings or urgent materials.
Total Annual Cost	£82,500	£80,300	£81,300	Total 3-Year Projection: £244,100

Justification:

The investment directly targets the most vulnerable pupils whose disengagement leads to significant long-term societal and educational costs (e.g., exclusion, alternative provision, and potential care placements).

- Cost-Effectiveness:** A core element of successful school-to-school support is intensive, sustained, hands-on engagement across the support staff²². This integrated model aims to provide the high-intensity, bespoke support that is known to be effective²³, but at a potentially lower cost than external commissioning or permanent exclusion costs.
- Preventative Focus:** By addressing the root causes of poor behaviour and low attendance early (ACEs/trauma), the 'Anchors' programme acts as a preventative measure, protecting educational funding and maximizing each child's chance for long-term success²⁴.
